Hello,

As a resident of Easthampton MA, I have seen first hand what public solar can do. We put a solar field over our capped landfill over a decade ago. GENIUS!

Reusing already cleared land makes sense for solar. Cutting down forests and taking over meadows makes no sense. Habitat for pollinators and all wildlife is dwindling. Landfills are an eyesore and using that land for solar makes sense.

Please be sensible and put solar fields on abandoned industrial sites or landfills. Clearing out wooded areas and meadows for solar is shortsighted.

Sincerely,

Rebecca Zumbruski
