Subject:	"discourage" logging and solar in forests or undeveloped open space.
Date:	Thursday, September 26, 2019 9:57:12 AM

Please "encourage solar siting" on already-developed locations such as empty spaces and "discourage" siting in forests or undeveloped open space.

Do not log in forests to develop solar, where the trees there are already doing their job of lessening our carbon footprint. We need to protect and keep the trees to sequester carbon and preserve the environment, and our climate.

Thanks very much!
