I am writing to express my strong opposition to placing solar farms on undeveloped land, forests etc. I live in a rural area and. Hose it for peace quiet visual beauty and environmental security! Large solar farms are an eyesore, after their lifespan , they are environmental not advisable . I am aware of the need for alternative forms of energy and in favor of it HOWEVER THE LOCATION OF THESE LARGE SCALE SOLAR FARMS is the issue Place them in commercial areas on roofs of malls or wherever NATURE WIL NOT BE IMPACTED- that means not destroying forests or animal habitat!
These are our most valuable resources!
I am strongly opposed to large scale solar darns in rural natural environments!!
Please listen to the people! Thank you !
