Subject:	"400 MW Review Public Comments."
Date:	Thursday, September 19, 2019 11:14:53 AM

To DOER:
The DOER should be commended on this 400MW review.
Thank you all and keep up the great work.

ASP develops solar projects on brownfields and landfills in the public sector and some private projects.
I reviewed the 400MW program and attended the session in Boston.
These are our comments and questions regarding the 400MW review.

1 -the town of Kingston MA awarded ASP the contract to develop a 2,000kW landfill solar project. We are 3 months into an interconnection study with NSTAR East. Can the Project apply for and receive a waiver on the ESS requirement rather than filing a new application?
2- Can this public landfill project apply for a separate SOQ for the ESS ?
3- How do you calculate the solar blocks 9-12 will last 7 more years based on 47MW per month of applications (pg 7)?
4- Does volumetric rate include demand charges? (pg 12)
