To whom it may concern,

I am a resident of Williamsburg, Ma. and have lived here for 20 years. I live on the edge of a large forest and am daily reminded of the essential role that it plays in the well being of all creatures including myself and my neighbors.

I heartily support the revision to the SMART program that will protect the forests. The trees are essential in drawing carbon down from the atmosphere and so must not be disturbed in this dire time of climate change.

There are acres of parking lots are producing excess heat and warming the planet that serve as a perfect place for solar panel fields, with the benefit of also keeping people's cars cooler, therefore using less air-conditioning.

Thank you for all you are doing to protect our children's future.

Sincerely,
Beth Fairservis
