Greetings,

Please remove any incentives that allow development on existing forests. I feel strongly that we need to protect forest while we develop our solar infrastructure.

Thank you.

Chris

A simple sentence asking them to remove any incentives for projects on forest land could help prevent projects like those we've been struggling with. I've also asked them to increase incentives for rooftop solar as they have decreased over what they offered a few years ago. They ask that you send emails to:
DOER.SMART@mass.gov
