MUDDY BROOK WILDLIFE MANAGEMENT AREA

(Hardwick)

SIZE: 710 acres of moderately sloped hills and ridges surrounding a large area of mixed wetlands. Access is off Patril Hollow or Muddy Brook Roads. Two woods roads run parallel to the brook and provide easy foot access to the entire area.
U.S.G.S. Quad: Ware

VEGETATION: Mixed hardwood and conifer forest with shrub swamp and open marsh along Muddy Brook.

WATER: Muddy Brook is a slow moving, cold water stream with a large marsh impoundment. Accessory dams built by beaver may increase the size of this impoundment substantially. Native brook trout can be found in the brook.

WILDLIFE: Grouse, deer, woodcock, raccoon, gray squirrel, fox, turkey, aquatic fur-bearers and numerous nongame species. This area is **not** stocked with pheasant.

SPECIAL REGULATIONS: None.
