Wolfe, Mark	Cape Cod Hospital	240
Zachariah, Benoy	Boston Medical Center Brockton Hospital*	87
Zelman, Richard	Brigham and Women's Hospital Cape Cod Hospital	579

**Notes:** Data are from Mass-DAC ([www.massdac.org](http://www.massdac.org)) for FY2005. Surgeons are not listed if they performed fewer than 10 procedures statewide in 2005. Surgeries performed in US government hospitals (e.g., Veteran's Affairs (VA) hospitals) are not included in this report. Note that cardiac interventionalists (physicians who perform PCI) are referred to as surgeons in this report.

\* Hospitals that are participating in the Massachusetts Primary Angioplasty Study (Massachusetts special project to allow hospitals with cardiac catheterization services but without cardiac surgery services to provide primary angioplasty in the treatment of acute myocardial infarction).

**Definition:** *Percutaneous Coronary Intervention* (PCI) refers to the placement in persons 18 years of age or older, of an angioplasty guide wire, balloon, or other device (e.g. stent, atherectomy, brachytherapy, or thrombectomy catheter) into a native coronary artery or coronary artery bypass graft for the purpose of mechanical coronary revascularization. Percutaneous Coronary Intervention can also mean Angioplasty or coronary intervention for the purposes of the Massachusetts Cardiac Study.
