

Technological advances create both challenges and opportunities for law enforcement. The ability to obtain, analyze and understand digital evidence obtained from computers, mobile devices, GPS devices, gaming consoles, event data recorders, digital video surveillance systems, digital cameras, social media applications and countless other sources has become essential to law enforcement.

The 2016 NCCC will educate law enforcement, digital forensic examiners, and prosecutors on ways to investigate crimes involving digital evidence, properly seize the evidence, examine it, and ultimately prosecute cases involving digital evidence. To help law enforcement navigate through this landscape, the conference will feature three tracks of instruction: a track for prosecutors, a track for investigators and a track for digital evidence forensic examiners. Each track will have multiple breakout sessions featuring instruction from nationally recognized experts in the field of cyber crime.

The 2016 NCCC features:

<i>Instructors</i>	Instructors are invited to speak on carefully selected topics. The most well-recognized prosecutors, investigators, and digital forensic experts from across the country will discuss the latest and most important legal and technical topics in the field.
<i>Low Cost</i>	\$350 includes <u>ALL</u> lecture sessions, lab sessions, materials and food* (*Breakfast/Lunch)
<i>Appropriate Attendee Demographic</i>	This is currently the only cyber crime conference restricted to law enforcement from national and international agencies.
<i>Lecture Sessions</i>	Lectures are focused around law enforcement needs and interests rather than on specific industry products.
<i>Hands-On Lab Sessions</i>	Opportunity to attend hands-on lab sessions. Some labs will provide a certificate upon successful completion of exam.
<i>Networking</i>	Opportunities to meet colleagues in the field to discuss the latest trends and developments in cyber crime.

Responses from Attendees of prior NCCC:

- “Great conference all around. Better than many national/international conferences I've attended on the same subjects.”
- “It was one of the best organized and put together conferences I've been too. All the free material and access to vendors and top practitioners in the field was fantastic.”
- “I feel much more comfortable with computer terminology and I feel able to present a case to a jury.”
- “I've been in the business for 40 years and it was one of the top 5 conferences I have ever attended.”
- “I really enjoyed this conference and found the information to be very relevant and helpful. I hope to be able to attend this conference every year. It was the best conference/training opportunity I have ever attended!!! Thank you so much!”
