The Massachusetts Healthcare Landscape

- MA Chapter 224 seeks to increase transparency around health care costs and quality and provide consumers with a greater level of information around costs of their care by health plans.

- MA stakeholders are urgently seeking effective ways to communicate the importance of cutting waste and lowering cost while putting the patient at the center of care.

- **MHQP’s Goal:** to leverage existing initiatives and partnerships to encourage interest in the *Choosing Wisely* campaign and recommendations within the context of Chapter 224 reforms taking place in Massachusetts.
