Contract Summary

This contract is for the purchase and delivery of Ultra Low Sulfur Diesel and Biodiesel (year round blend of B5, with the options to purchase blends of B10, B15 and B20). This is not a fixed-price contract; it is an indexed price contract. Price changes daily. See pricing and purchase details below.

Eligible Entities wishing to participate in this contract must make arrangements with the appropriate awarded vendor and must remain with the vendor for twelve months or the remainder of the contract term. Vendors have been directed to request this commitment in writing.

Benefits and Cost Savings

- Competitive Pricing
- Qualified and Experienced Vendors
- Prompt Pay Discount
- Lower differential pricing for the purchase of 8,000 gallons or more
- **Contract Renewal has removed the \$75.00 Service charge for deliveries under 500 gallons and locked in differential pricing for two years.**

Who Can Use This Contract?

Applicable Procurement Law: MGL c. 7, § 22; c. 30, § 51, § 52; 801 CMR 21.00

07. Non-profit, UFR-certified organizations that are doing business with the Commonwealth;
08. Other states and territories with no prior approval by the State Purchasing Agent required; and
09. Other entities when designated in writing by the State Purchasing Agent.

How to use the contract

Check the Zone listing (on page 9) to determine the city or town where you will have the diesel delivered. Contact the vendor responsible for that Zone to discuss locations, account requirements and arrange for delivery. The contract covers eight zones across the state. Each zone has one awarded contractor. These contractors are responsible for servicing the eligible users within that zone.

Pricing and Purchase Options

Purchase Options: Purchases made through this contract will be direct, outright purchases.

Pricing and buying details:

Contract ENE40 calls for the delivery of Ultra Low Sulfur Diesel (ULSD) and Biodiesel (year round blend of B5, with the options to purchase blends of B10 and B15) to be purchased at a fixed differential price to be applied to the low wholesale Boston Price as published daily in the OPIS-Oil Price Daily (Formerly the JOC). Additional taxes and federal environmental fees will be billed as separate line items on invoices.

Pricing of ULSD and Biodiesel is calculated as:

Summer Blend (Apr-Sep) ULSD Pricing

Ultra-Low Sulfur Diesel + Applicable Differential Price = Total Summer Blend Price

Winter Blend (Oct-Mar) ULSD Pricing

Ultra-Low Sulfur Diesel Premium* + Applicable Differential Price = Total Winter Blend Price

**Listed as “w/additive”*

Verifying the Commodity Price:

To find the published daily index wholesale price, go to the [ENEFY17 Daily Pricing Index](#) MBPO record on COMMBUYS.

To access the record manually:

- Go to www.commbuys.com.
- Click on “Contract & Bid Search” on the log-in page.
- Click the radio button for Contracts/Blankets.
- In the Contract/Blanket Description field, type in **ENEFY17 Daily Pricing Index**.
- Then click “Find It” (note: hitting Enter won’t work, you have to click Find It).
- Access MBPO record number PO-17-1080-OSD03-SRC02-00000007966.
- Under attachments open the Daily Index file for the date you would like to view. Diesel Prices are second from the top.

The Less Than Truckload Differential (LTL) pricing is applicable for all deliveries 7,999 gallons and under. The Truckload Differential (TL) pricing is applicable for deliveries of 8,000 gallons or more.

Additional Services

Standalone Equipment

Contractors must provide on-site deliveries to stand alone equipment such as snow melters or other construction/lawns and grounds equipment. The differential pricing for this service is to be negotiated on a case by case basis.

Environmentally Preferable Product Information

ULSD

Ultra Low Sulfur Diesel (ULSD) describes a new EPA standard for the sulfur content in on-road diesel fuel sold in the U.S. The allowable sulfur content for ULSD (15 ppm) is much lower than the previous U.S. standard for Low Sulfur Diesel (LSD, 500 ppm), which further reduces emissions of sulfur compounds (blamed for acid rain). ULSD also may be used with emission control retrofit devices that greatly reduce emissions of oxides of nitrogen and particulates that may contribute to asthma and other respiratory illnesses.

Biodiesel

Biodiesel is a renewable fuel made from agricultural resources, vegetable oils, and/or animal fats, that all provide the same amount of energy. Biodiesel reduces particulate matter and tailpipe emissions that impact climate change, such as carbon dioxide (CO₂) [although some increase in nitrogen dioxide (NO_x) may occur depending on the duty cycle of the engine]. Biodiesel is nontoxic, biodegradable, and suitable for sensitive environments, making biodiesel spills far less harmful to the environment and much less expensive to clean up than a diesel spill.

Summary of Where to Obtain Important Contract Information in COMMBUYS

There are three vendors on this contract and the vendors have been assigned a unique Master Blanket Purchase Order (MBPO) each. Vendors' differential prices are located on the description for each line item identified with the Master Blanket Purchase Order. There are two line items on each MBPO, each being a zero dollar line. The first line is the differential price line, and the second line is for taxes.

How to place an order

Contract Users should continue to place orders in the normal fashion by contacting the appropriate vendor. Orders should not be placed through COMMBUYS. The order should be recorded once invoices are received using the RPA Release function.

This contract has RPA Release enabled to allow contract users to capture spend after-the-fact associated with this contract. Contract Managers have carefully selected the contracts that would qualify for RPA Release transactions. Typically this is due to system or process impracticality and/or emergency situations preventing the standard COMMBUYS purchase order processes from being followed to process paper invoices. For more details please consult the COMMBUYS Policy Document.

Once the paper invoice for the goods or services is received by the agency, follow the directions in the [RPA Release Job Aid](#) located at Job Aids for Purchasers when entering the information into COMMBUYS; use below guidance for entering items off of the paper invoice and into a Release Requisition in the “Items” Tab:

1. Follow directions in RPA Release Enabled Requisition Job Aid until you come to the Search field in the “Items tab.”
2. In the “Items” tab Search field, type in the following to get the items: contract description (“ENE40”), and the vendor name.
3. Select the appropriate catalog line; at least two lines should be added, tax line and gallon line; an additional Delivery Service Charge line may be added if there is a Delivery Service Charge is on the invoice.
4. In the line for the gallons, enter the total gallons received in the Quantity and the total price in the unit price. **This total should not include taxes.**
5. In the line for taxes, enter 1 in the Quantity and enter the total amount of taxes in the unit price.
6. Enter accurate invoice numbers in the mandatory Invoice Number field for each item.
7. Attach scanned copies of all records pertaining to order placement (could be an unofficial email quote), the receipt of goods or services, and the final invoice in the “Attachments” section.
8. The final invoice amount should match the Release Requisition total on the Summary tab.
