

How to use the Fiscal Year 2018 Fuel Prices Index

Overview

In order to take advantage of fluctuations in the price of fuels, the Commonwealth has established pricing that is tied to daily wholesale fuel prices published in the Oil Prices Daily publication and released by the Oil Price Information Service (OPIS) on its Statewide Contracts for fuels. Vendors on these contracts have supplied a fixed differential price for each of eight designated zones across the Commonwealth. Users of Statewide Contracts for fuels should reference both the date of purchase's index price for the appropriate fuel and the vendor's differential price for their zone to determine the total per-unit price. Units of measurement are provided at the end of this guide. Additional taxes and federal environmental fees may be applied as separate line items on invoices.

The only product that does not use daily prices is Propane. Propane index prices are pulled from the Weekly Propane Newsletter published by Butane-Propane News (BPN). The price used is the weekly Selkirk benchmark principal average.

Statewide Contracts that use the Daily Fuel Prices Index

- ENE40 – Diesel Fuels: Ultra Low Sulfur Diesel and Biodiesel
- ENE41 – Gasoline
- ENE45 –No. 2 Heating Oil and No. 4 and No. 6 Residual Fuel
- ENE46 – Propane

Please see the following pages for an overview of the contracts and their differential prices, as well as links to their Contract User Guides.

ENE40 – Diesel Fuels

Contract Summary

This contract is for the purchase and delivery of Ultra Low Sulfur Diesel and Biodiesel (year round blend of B5, with the options to purchase blends of B10, B15 and B20).

Eligible Entities wishing to participate in this contract must make arrangements with the appropriate awarded vendor and must remain with the vendor for twelve months or the remainder of the contract term. Vendors have been directed to request this commitment in writing.

ULSD Summer Blend (Apr-Sep): “ULSD” on Index

ULSD Winter Blend (Oct-Mar): “ULSD w/ additive” on Index
