

**Office of the State Auditor**  
**DATA ANALYTICS FRAUD EXAMINER**  
(Bureau of Special Investigations)  
Boston

---

**Posting Number 2014-57**

**SALARY RANGE (Grade 11) CSA926: \$41,862.95 to \$62,794.95 (Commensurate with experience)**

**GENERAL STATEMENT OF DUTIES:**

The incumbent is responsible for investigating fraudulent claims, transactions, and or complaints of unlawful receipt of funds within the public assistance programs in the Commonwealth of Massachusetts. The incumbent also is responsible for collecting, understanding, and analyzing information using a variety of tools, databases and data analysis techniques to detect fraud. This includes analyzing trends in data, patterns of behavior, accurately quantify and aggregate risk and succinctly communicate items of interest to management

The Data Analytics Fraud Examiner must also present conclusions in reports and answer questions about the data and finding, in order that the Director and other members of the Bureau of Special Investigations (BSI) may better understand information obtained.

**SUPERVISION RECEIVED:**

Work under the direct supervision of the Assistant Director overseeing the BSI Data Analytics team.

**SUPERVISION EXERCISED:**

None.

**DUTIES AND RESPONSIBILITIES:**

- Work with BSI, Audit Operations, and OSA's IT Department to identify data and analysis requirements for reports and data analysis projects.
- Proactively monitor and review electronic account and transaction data for suspicious activity and possible fraud.
- Identify and document existing trends and patterns in Medicaid claim data, Electronic Benefits Transfer (EBT) card transactional data, as well as a variety of other transactional and operational data sets
- Efficiently and quickly Identify anomalies / patterns in data
- Within data sets being analyzed, the examiner must identify relationships, outliers, conditions and other behaviors that may indicate an increased risk for fraud, waste or abuse.
- Document data models and protocols for mining production databases in conjunction with data owners and department managers.
- Identify sources of data and data fields for reports, mapping, and computations required to create metrics for reports.
- Review, investigate, and resolve irregular transactions and identify areas requiring increased security controls to protect an organization and its end users from future incidents of fraud.
- Apply quality assurance best practices for data mining/analysis services.
- Develop, implement, and maintain change control and testing processes for modifications to data models.
- Keep detailed records of suspicious activity, analyze trends, communicate security threats to management, and provide recommendations for loss mitigation as needed.
