

Department of Conservation and Recreation - Draft Landscape Designations, May 2011

Notes: This listing of DCR properties is meant to supplement the May 2011 draft designations map with additional information. It shows how many acres from each property are assigned to each landscape designation, but can not detail which parts of each property are assigned to each designation. The 416 properties below are listed as named in DCR's GIS databases; GIS names may not match all names posted at facilities or known locally. The administrative district for each property is listed to help provide context. The column labelled "ELU" identifies in which Ecological Land Unit the property belongs. Properties in the same ELU share similar landscape characteristics and are not necessarily linked geographically.
