BWP HW 10 Facility Modification-Class 2

BWP HW 11 Facility Modification-Class 3

Permit Fact Sheet

1. What is the purpose of these permits?

These permits authorize and set conditions for modifications to existing permits to treat, store or dispose of hazardous waste. There are three classes of permit modifications. Class I modifications are minor changes, Class II's are more involved, while Class III's are major operational changes.

More substantial modifications are subject to greater permit review to evaluate more fully the potential effects on public health and the environment.

Legislative authority for these permits is stated in MGL Chapter 21C, sections 4 and 6. Regulatory authority is found at 310 CMR 30.852 of the Hazardous Waste Management Regulations.

2. Who must apply?

Any treatment, storage or disposal facility (TSDF) which:

- has to change its operations as a result of new regulations, or;
- has minor changes in personnel or in hazardous waste plans, or;
- wishes to offer expanded services or close existing services;

needs to apply for a Class I, II or III permit, as applicable.

Table 310 CMR 30.852 of the Hazardous Waste Management Regulations lists the various types of proposed changes by class.

3. What other requirements should be considered when applying for these permits?

a. Prerequisites.

The applicant must already have a TSDF permit from MassDEP to apply for a permit modification. The permitting process has public notice requirements and the applicant must meet with MassDEP staff prior to submitting an application in order to coordinate public notice. The Class III modifications, in particular, may be subject to other statutes or regulations.

b. Concurrent Applications.

Some of the permit modifications will need to be jointly reviewed by MassDEP and the United States Environmental Protection Agency. Contact the Hazardous Waste Licensing Branch for more information.

c. Additional Information.

All additional information as defined in the Application Completeness checklist included in this application package must be submitted as required with the Transmittal Form in order for the application to be properly processed.
