Department Approved Recycling Program (DARP)

FY2007-2009 Application

For Municipalities with Curbside Refuse Collection

Municipality Name _____

About DARP

The Department Approved Recycling Program (DARP) is a voluntary program that rewards municipalities for establishing comprehensive recycling programs. These programs are critical to the Commonwealth's ongoing effort to protect our environment and quality of life by reducing waste generation and disposal.

DARP status exempts municipal solid waste loads from comprehensive inspections for "waste ban" materials* (paper; glass, metal and plastic containers; leaves and yard waste) at solid waste disposal facilities. Waste loads from DARP communities are still inspected for the presence of white goods, lead-acid batteries, cathode ray tubes (CRTs) and whole tires. DARP status reflects a municipality's commitment to providing access to recycling and composting programs, and to educating residents about waste reduction.

* "Waste Bans" restrict the disposal and transfer for disposal of certain hazardous and recyclable materials at solid waste facilities in Massachusetts, per 310 CMR 19.017.

Qualifying municipalities will have DARP status through June 30, 2009. A municipality's DARP status may be revoked if it is found that any of the program criteria on which its DARP status was based is not being maintained before that date.

Eligibility Criteria

If you are able to meet the required elements and check off at least one statement each under **1. Recycling Commitment & Access**, **2. Composting Commitment & Access** and **3. Public Education & Participation**, your municipality will receive a DARP designation.

MassDEP will send notification of DARP status to your Chief Executive Officer and will include the municipality on the list of DARP communities to be distributed to solid waste facility operators across the state. MassDEP may ask you to submit documentation in support of your application.

NOTE: DARP status only applies to solid waste loads contracted or collected by the municipality on behalf of residents and/or businesses. DARP status does not apply to waste loads contracted by individual residents, multi-family buildings or businesses in a DARP municipality, or to the municipality itself (e.g., the Parks Department), unless otherwise deemed so by MassDEP.

1. Recycling Commitment & Access

Important:
When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

Required: The municipality maintains a curbside recycling collection service year-round, with pick-ups at least every other week. The program must include, at a minimum: newspaper, mixed paper and corrugated cardboard, glass, metal, and plastic containers #1 - #2. Municipalities must also meet either A, B or C (see below).

Elective: The municipality must do at least one of the following:

A. Provide or facilitate curbside recycling access to small-to-medium sized businesses. Please describe below (continue on a separate attachment, if necessary).

OR

B. Establish a recycling program in all of its offices (town hall, police, DPW, etc.) and schools. This should include collection of recyclable paper, at a minimum; **OR**

C. Provide recycling access to a majority of its multi-family buildings by EITHER collecting, or contracting for collection of paper and containers; OR enforcing an ordinance or by-law requiring haulers servicing multi-family housing to provide recycling and trash collection as an integrated waste management service at a single price.

2. Composting Commitment & Access

Required: The municipality has enacted a by-law, ordinance, regulation or has a municipal solid waste / recycling contract language requirement stating that leaves and yard waste generated by residents must be collected separately and not disposed of with solid waste. Municipalities must also meet either A, B, or C (see next page).

Municipality Name

Eligibility Criteria (continued)

2 .Composting Commitment & Access (continued)

Required: The municipality has enacted a by-law, ordinance, regulation or has a municipal solid waste / recycling contract language requirement stating that leaves and yard waste generated by residents must be collected separately and not disposed of with solid waste. Municipalities must also meet either A, B or C (see below).

Elective: Municipalities must also do at least one of the following:

- A.** Provide curbside collection of leaves and yard wastes at least every other week to all municipally served households between April 15 through November 30; **OR**
- B.** Provide curbside collection of leaves and yard waste for all households at least 12 times per year (fall and spring dates to be determined by the municipality) **AND** operate a home composting bin distribution program, which includes publicizing the availability of home composting bins and disseminating information on home composting; **OR**
- C.** Maintain a drop-off composting site for leaves and yard waste open weekly at least 4 weekend hours each week. The drop-off must be open from April 15 through November 30 and the municipality must publicize the availability of the drop-off composting site.

3. Public Education & Participation

Required: The municipality mails information annually to all residents publicizing its recycling and composting programs. A MassDEP-granted mailing satisfies this requirement. The mailing shall include information about the municipality's recycling bylaws or ordinances, as well as state waste bans. *Alternatively*, the municipality may choose to update its recycling and composting information at least twice annually on the Earth-911 web site (www.earth911.org). Municipalities must also meet either A, B or C (see below).

Elective: The municipality must also do at least one of the following:

- A.** The municipality has an annual per capita residential recycling rate for paper, bottles and cans of 100v pounds or greater as calculated by DEP using data submitted by the municipality on the CY2004 Municipal Recycling Data Sheet; **OR**
- B.** The municipality has a unit-based pricing or "pay-as-you-throw" program that charges users on a per-unit basis for solid waste disposal and provides recycling for no separate fee; **OR**
- C.** The municipality **enforces** a mandatory recycling by-law, ordinance, or regulation, or has a current municipal solid waste / recycling contract requirement stating that recyclables generated by residents are collected separately and not disposed of with solid waste.
 - Check here to indicate you are enclosing a photocopy of your municipality's by-law, ordinance or solid waste contract language and enforcement protocol or procedures.**
