Property Managers & the Waste Bans: What You Need to Know

What are waste bans?

“Waste bans” are restrictions on the disposal, transfer for disposal and contracting for disposal of certain hazardous items and recyclable materials at solid waste facilities in Massachusetts (310 CMR 19.017).

The waste bans are designed to:

- Conserve capacity at existing disposal facilities.
- Minimize the need for new facility construction.
- Provide recycling markets with large volumes of material on a consistent basis.
- Keep certain toxic substances or materials from adversely affecting our environment when landfilled or incinerated.
- Promote business and residential recycling efforts.

Since the first waste bans were introduced in 1990, Massachusetts municipalities and businesses - often supported by state grants and technical assistance - have developed new infrastructure to collect banned items and other discarded materials, and to divert them from disposal to reuse and recycling.

What Do Property Managers Need to Know?

- **As service providers to tenants**, property managers must responsibly contract for solid waste collection services, adhere to municipal by-laws, and comply with the waste bans.
- **As entities contracting for solid waste services**, property managers need to ensure that banned materials collected at their properties are **not** sent for disposal. Property managers can comply with the waste bans by implementing recycling collection programs with their haulers that ensure all restricted materials are collected and managed in a way that prevents disposal. It is a violation to dispose, contract for the disposal, or transfer for disposal materials restricted by the waste bans.
- **As recycling program managers**, property managers can use waste ban requirements to improve recycling by their tenants and hold haulers responsible for recycling services.

When the Department of Environmental Protection (MassDEP) observes excessive amounts of banned materials being sent for disposal, property managers risk enforcement action by MassDEP and/or financial penalties. MassDEP will work with interested property managers to improve their recycling and composting programs to ensure compliance with the waste bans.

What do I need to do? Remove & Recycle!

Recycling prevents unnecessary disposal of usable raw materials, saves energy and reduces air and water pollution. Recycling also reduces disposal costs and can save money by diverting materials from the trash dumpster to the recycling bin.

Your waste hauler may be able to help you establish a recycling program. Also, MassMaterialTrader.com has an extensive list of companies that collect or process recyclable materials, as well as information on how to start a recycling program.

What is banned?

- **Asphalt Pavement, Brick and Concrete:** asphalt pavement, brick and concrete from construction and demolition of buildings, roads, bridges, and similar sources.
- **Batteries:** Lead-acid batteries used in motor vehicles or stationary applications.
- **Cathode Ray Tubes:** Any intact, broken or processed glass tube used to provide the visual display in televisions, computer monitors and certain scientific instruments.
- **Clean Gypsum Wallboard:** A panel (known as drywall) with a gypsum core and faced with a heavy paper or other material on both sides that is not contaminated with paint, wallpaper, joint compound, adhesives, nails, or other substances after manufacture.
- **Glass Containers:** Glass bottles and jars. The ban does not cover light bulbs, Pyrex cookware, plate glass, drinking glasses, windows, windshields and ceramics.
- **Leaves & Yard Waste:** Leaves, grass clippings, weeds, garden materials, shrub trimmings, and brush one-inch or less in diameter (excluding diseased plants).
- **Metal:** Ferrous and non-ferrous metals derived from used appliances, building materials, industrial equipment, vehicles, and manufacturing processes.
- **Metal Containers:** Aluminum, steel or bi-metal beverage and food containers.
- **Recyclable Paper:** All paper, cardboard, and paperboard products (EXCEPT tissue paper, toweling, paper plates and cups, wax-coated cardboard and other low-grade paper products).

- **Single Resin Narrow-Necked Plastics:** A soda bottle is narrow-necked but a yogurt container is not.
- **White Goods:** Appliances employing electricity, oil, natural gas or liquefied petroleum gas. These include refrigerators, freezers, dishwashers, clothes washers, clothes dryers, gas or electric ovens and ranges, and hot water heaters.
- **Whole Tires:** Motor vehicle tires of all types (Incinerators and transfer stations can accept whole tires. Shredded tires are not restricted).
- **Wood:** Treated and untreated wood, wood waste (trees, stumps, and brush, including but not limited to sawdust, chips, shavings and bark).

Did You Know?

- The waste bans apply to all solid waste destined for a Massachusetts landfill, incinerator or transfer station.
- Waste generators are responsible for ensuring that they do not contract for the disposal of banned items.
- Waste facility operators are responsible for ensuring that unallowable quantities of banned materials are not disposed or transferred for disposal from their facilities. Facilities must check incoming waste in two ways:
 - ✓ First, all loads must be visually monitored for the presence of banned materials.
 - ✓ Second, random inspections of waste load contents must be conducted.
- MassDEP conducts inspections at solid waste facilities to identify haulers and generators (businesses, institutions, municipalities, etc.) that dispose of banned materials.
- Businesses and municipalities that do not divert banned items from their waste run the risk of having solid waste facilities reject their waste and charge additional handling fees, and potential enforcement penalties from MassDEP.
