Notes: data are current as of 12:00pm on the date at the top of the page.

Note: Due to the recent change in federal reporting requirements and definitions which was went live July 22, data accuracy and integrity issues were experienced with today's report. Given the importance of this particular metric, the state proactively validated the reporting of COVID-19 hospitalizations with nearly all acute care hospitals. Hospitals indicated that the decrease was partially driven by a more accurate accounting of which patients should be reported as "suspected" COVID patients. DPH and the reporting hospitals are making every effort to mitigate these reporting challenges.

Confirmed COVID-19 Hospital Admissions Suspected COVID-19 Hospital Admissions

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health. For purposes of this reporting, "confirmed" are cases with a PCR test. "Suspected" are those with symptoms who have not had a test result yet.

Note: Due to the recent change in federal hospital reporting requirements and definitions which went live July 22, data accuracy and integrity issues were experienced with today's report. DPH and the reporting hospitals are making every effort to mitigate these reporting challenges and publish corrected data in the near future. The chart on this page has not been updated with July 22 data due to these challenges.

Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, July 23, 2020

Cases, Hospitalizations, & Deaths by Race/Ethnicity

The following caveats apply to these data:

1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case's race or ethnicity, DPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

Note: COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Department of Public Health is working with these organizations and to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19 patients.

Data collected as of 7/21/2020 5:00pm

Occupancy/ availability as reported by hospitals to DPH.
Regions shown represent EOHHS Regions. Note that total bed estimates may change day-to-day due to hospitals updating surge planning. As of June 16th, data reflects updated data collection methodology and the removal of unstaffed beds from this analysis. Analysis here reflects total beds that hospitals could staff within 12-24 hours.

Note: Due to the recent change in federal hospital reporting requirements and definitions which went live July 22, data accuracy and integrity issues were experienced with today's report. DPH and the reporting hospitals are making every effort to mitigate these reporting challenges and publish corrected data in the near future.
