CHAPTER 3
PROPOSITION 2½
AGENDA AND OBJECTIVES

A. PRESENTATION TOPICS

1. Definition and calculation of the annual levy limit.
2. Definition and calculation of new growth.
3. Definition and calculation of the levy ceiling.

   QUIZ

4. Types of Proposition 2½ referenda questions and how they affect levy limit.
5. Calculation of the maximum allowable levy.

   EXERCISE

B. SESSION OBJECTIVES

1. Participants will understand how a levy limit is determined under Proposition 2½.
2. Participants will understand the differences between an override and exclusion.
3. Participants will be able to compute the amount of property tax revenue their communities will have available for the annual budget.
CHAPTER 3
PROPOSITION 2½

1.0 OVERVIEW AND DEFINITIONS

1.1 Introduction
Proposition 2½ is a voter initiative law that limits the property tax levy of cities and towns enacted in the 1980 state election.\(^1\) It took effect in fiscal year 1982.

1.2 Definitions
1.2.1 Levy
The property tax levy is the revenue a community raises through real and personal property taxes each fiscal year when it sets its tax rate. The property tax levy is usually the largest source of revenue cities and towns have to fund their annual budgets.

1.2.2 Levy Limit
The levy limit is the maximum dollar amount a city or town can levy in a given fiscal year. It defines the maximum amount of property tax revenue a community will ordinarily have to support its annual budget and is the primary limitation established by Proposition 2½.

1.2.3 Levy Ceiling
The levy ceiling is the maximum amount the levy limit may be in a given fiscal year. It is a constraint on the size of the annual levy limit and is a secondary limitation established by Proposition 2½.

1.3 Application of Proposition 2½ Limits
- The property tax levy cannot exceed the levy limit for the fiscal year.
- The levy limit cannot exceed the levy ceiling for the fiscal year.

1.4 Department of Revenue’s Role
The Department of Revenue (DOR) determines the annual levy limit and ceiling for each city or town and ensures the tax levy fixed by the setting of the tax rate complies with Proposition 2½.\(^2\)

2.0 ANNUAL LEVY LIMIT

2.1 Definition
The levy limit is the maximum dollar amount a city or town can ordinarily levy in any given fiscal year.\(^3\)
2.2 Calculation

2.2.1 Levy Limit Base
The levy limit for any given fiscal year is based on the previous year’s levy limit and therefore, is an historic figure. The prior year's limit, not the actual levy, is the base for calculating the levy limit.

2.2.2 Annual Increases
The previous year's levy limit increases annually by two factors:
- Automatic 2.5 percent.
- New growth.

2.2.3 Preliminary Levy Limit
The formula for calculating the preliminary levy limit for any given fiscal year is the prior year's levy limit, plus 2.5 percent of that limit, plus new growth.

<table>
<thead>
<tr>
<th>Annual Levy Limit Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior FY Levy Limit + [0.025 x Prior FY Levy Limit] + New Growth</td>
</tr>
</tbody>
</table>

This subtotal is then compared to the levy ceiling to determine the final levy limit for the fiscal year. See Section 4.3 below.

3.0 NEW GROWTH FACTOR

3.1 Definition
New growth is a dollar increase in the annual levy limit that reflects additions to the community’s tax base since last fiscal year. Proposition 2½ annually increases the levy limit so that cities and towns can raise additional taxes to meet service demands due to new development.

3.2 Calculation
The formula for calculating the new growth factor for any given fiscal year is the previous year’s tax rate multiplied by allowable increases in the current year's assessed valuations of real estate parcels and personal property items over the prior year's assessed valuations.

<table>
<thead>
<tr>
<th>New Growth Factor Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior FY Tax Rate X [Current FY Assessed Valuation – Prior FY Assessed Valuation of Parcel/Item]</td>
</tr>
</tbody>
</table>
3.2.1 **Allowable Valuation Increases**
Valuation increases included in the formula come from three categories of growth in a community's tax base.

3.2.1.1 **Construction Activity**
The first category includes properties that have increased in assessed valuation since last fiscal year because of development and other construction activity on the site. Most of a community’s new growth usually comes from this category.

**Examples**

Parcel A was assessed as a vacant house lot for $50,000 last year. A new house was built on Parcel A and this year it is assessed for $250,000, an increase of $200,000. The $200,000 in added value to the community’s tax base due to the construction activity is included in the calculation of the new growth factor.

Parcel B is a single-family home that was assessed for $200,000 last year. An addition was built to the house and this year, Parcel B will be assessed for $225,000, an increase of $25,000. The $25,000 in added value to the community's tax base due to the construction activity is included in the calculation of the new growth factor.

3.2.1.2 **Previously Exempt Real/New Personal Property**
The second category includes property not taxable the previous year, such as exempt real property returned to the tax roll and new taxable personal property.

**Examples**

Parcel C was owned by a private college and was exempt from taxation last year. The college sold the parcel to a developer and it is returning to the tax roll this year with an assessed valuation of $100,000. The $100,000 in added value to the community's tax base is included in the calculation of the new growth factor.

Business D relocated to the community since last year. It owns taxable personal property that is assessed for the first time this year with an assessed value of $20,000. The $20,000 in added value to the community's tax base is included in the calculation of the new growth factor.

3.2.1.3 **Subdivisions/Condominium Conversions**
The third category includes real property that is subdivided or converted to condominiums and taxed as separate parcels for the first time.
Example

Parcel E is a 20-acre site of vacant land that was assessed as a single parcel for $1,000,000 last year. Since then, a subdivision plan has been approved for the site. The plan creates 10, 2-acre house lots that will be assessed as 10 separate parcels this year. The total valuation of the 10 lots is $1,100,000, a $100,000 net increase in the assessed valuation of the community. The $100,000 in added value to the community's tax base due to the subdivision and taxation of the land as separate parcels is included in the calculation of the new growth factor.

3.2.2 Excluded Valuation Increases/Decreases

3.2.2.1 Revaluation Increases
The increased assessed valuation of property due to higher market value is not included in the new growth formula. To be included, the increase in assessed valuation has to result from a change in the physical condition, taxable status or taxable unit of a property.

Example

Parcel F is a single-family house that was valued at $300,000 last year. No construction activity took place on the site, but the parcel will be assessed for $350,000 this year due to a revaluation. The additional $50,000 in assessed valuation is not included in the new growth formula, even though it increases the total valuation of the community's tax base.

3.2.2.2 Valuation Losses
The new growth factor is not adjusted by decreases in the tax base due to fire, demolition or other valuation losses.

3.3 Annual Reporting
The new growth factor is calculated after the assessors have set all assessed values for the year and can compare them to the prior year's assessed values. The assessors report new growth to the DOR on Form LA-13, “Tax Base Levy Growth,” as part of the tax rate setting process.

4.0 ANNUAL LEVY CEILING

4.1 Definition
The levy ceiling is the maximum dollar amount the levy limit may be in any given fiscal year.
4.2 **Calculation**
The formula for calculating the levy ceiling in any given fiscal year is the total assessed valuation of the community’s taxable real and personal property for the fiscal year multiplied by 2.5 percent.\(^5\)

<table>
<thead>
<tr>
<th>Annual Levy Ceiling Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Assessed Valuation (\times) 0.025</td>
</tr>
</tbody>
</table>

4.3 **Final Levy Limit Determination**
The final step in determining the new levy limit is to compare the subtotal that results from increasing the prior year’s levy limit by the annual 2.5 percent and new growth factors to the year's levy ceiling. The new levy limit is the lesser of the subtotal or ceiling.

4.3.1 **Subtotal Below Levy Ceiling**
The subtotal is the new levy limit if it is below, or at most equal to, the levy ceiling. The subtotal ordinarily is less than the levy ceiling and therefore, is the levy limit in almost all cases.

**Example**

Last year’s levy limit was $100 million. That $100 million base is first increased by 2.5%, which equals $2.5 million. The new growth factor is then added, which for illustration purposes is $2.5 million. Adding the $100 million prior year levy limit base + $2.5 million automatic 2.5% increase + $2.5 million new growth factor arrives at a subtotal of $105 million.

The assessed valuation of the community this year is $10 billion. Multiplying that amount by 2.5% equals a levy ceiling of $250 million. The subtotal of $105 million is below the levy ceiling and therefore, the community’s levy limit is $105 million for this year.

4.3.1 **Subtotal Above Levy Ceiling**
The levy ceiling is the new levy limit if the subtotal exceeds the levy ceiling. The total assessed valuation of a community’s tax base and therefore, the levy ceiling generally increases over time at a higher rate than the annual levy limit as properties are added to or removed from the tax roll and revalued to reflect current market at least once every three years. This is almost always more than sufficient to accommodate the annual 2.5 percent and new growth increases.

**Example**

Again, the assessed valuation of the community this year is $10 billion. Multiplying that amount by 2.5% equals a levy ceiling of $250 million. If the subtotal is $265 million, the community’s levy limit is $250 million for this year.
5.0 REFERENDA TYPES

5.1 Overview
A city or town may levy above its annual levy limit or levy ceiling with the approval of voters in a referendum election.

5.2 Types
5.2.1 Higher Levy
There are two types of Proposition 2½ referenda that allow a community to levy above the levy limit or ceiling. They are used for different purposes and have different impacts on the amount a community can levy in the year voted and future years. They are:
- Levy limit override.
- Exclusion.

5.2.2 Lower Levy
The Proposition 2½ referendum question that requires a community to reduce its annual levy limit is the underride.

6.0 LEVY LIMIT OVERRIDE

6.1 Definition
A levy limit override is a dollar increase in the levy limit approved by the voters.6

6.2 Features
6.2.1 Municipal Purposes
A levy limit override can be used to generate additional monies for any municipal expenditure. It is generally intended and usually used to raise extra funds for annual operating and other recurring costs.

6.2.2 Permanent Increase
A levy limit override creates a permanent increase in the levy limit base. The impact is to increase the amount a community can levy for the fiscal year voted, and in future years.7

<table>
<thead>
<tr>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>The levy limit for this year is $100 million. Voters approve an override of $1 million. The community can now levy $101 million dollars this year. In addition, the base for calculating next year’s levy limit becomes $101 million, rather than $100 million.</td>
</tr>
</tbody>
</table>
6.2.3 **Override Limit**
A levy limit override cannot increase the levy limit beyond the levy ceiling. The annual levy limit as increased by an override must still fit within the levy ceiling.

7.0 **LEVVY LIMIT UNDERRIDE**

7.1 **Definition**
A levy limit underride is a dollar decrease in the levy limit approved by the voters.

7.2 **Permanent Decrease**
A levy limit underride creates a permanent decrease in the levy limit base. The impact is to decrease the amount a community can levy for the fiscal year voted, and in future years.

<table>
<thead>
<tr>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>The levy limit for this year is $100 million. Voters approve an underride of $1 million. The community can now only levy $99 million dollars this year. In addition, the base for calculating next year’s levy limit becomes $99 million, rather than $100 million.</td>
</tr>
</tbody>
</table>

8.0 **EXCLUSION**

8.1 **Definition**
An exclusion is an amount the community can levy in addition to its levy limit approved by the voters to finance a capital expenditure.

8.2 **Features**
8.2.1 **Capital Purposes**
An exclusion can be used to generate additional monies for capital purposes only. Capital purposes are those for which a community can legally borrow money under Massachusetts law. A community may generally borrow only to construct or acquire its public infrastructure or other physical assets. For example, it may borrow to:
- Construct or renovate public buildings, such as schools.
- Construct public works, such as a new sewer treatment plant.
- Purchase land for public buildings, open space, conservation or other public purposes.
- Purchase equipment used to provide municipal services, such as police cruisers, fire trucks and computers.
8.2.2 **Temporary Increase**
An exclusion increases the maximum amount the community can levy for a temporary period of time. It does not become part of the levy limit and therefore, does not increase the base for calculating future years' limits.

A community may present one of two types of exclusions to voters depending on how it finances the capital project or item:
- Debt exclusion.
- Capital exclusion.

8.2.2.1 **Debt Exclusion**
A debt exclusion is used to obtain voter approval to increase the levy to pay for capital projects financed by borrowing. Major capital items, such as the construction of a new school or installation of a sewer system, are usually financed by borrowing and repaying that loan over a fixed number of years.

Approval of a single debt exclusion question creates a temporary increase in the amount the community can levy in order to cover its annual debt service costs on the borrowing. Each year while the debt is being repaid, the amount of that year’s debt service payment is added to the levy limit to determine how much the community can levy. Once the debt is retired, the exclusion ends.

**Example**

A community borrows to build a new water treatment facility. The debt will be repaid over 20 years with level debt service payments of $1 million. Voters approve a debt exclusion for the borrowing. The community can levy $1 million above its levy limit in each of the next 20 fiscal years in order to cover its annual debt service appropriation. In the first year the exclusion applies, the levy limit is $100 million. Due to the exclusion, the community can now levy $101 million in that year.

However, the $1 million exclusion is not added to the levy limit base used to calculate the second year’s limit. In the second year, the new levy limit will be calculated using $100 million as a base. Once again, the community can levy $1 million above that new limit. Again, the $1 million exclusion is not added to the levy limit base used to calculate the third year’s limit. This continues each year until the debt is repaid.

8.2.2.2 **Capital Exclusion**
A capital outlay expenditure exclusion (or capital expenditure or capital exclusion) is used to obtain voter approval to increase the levy to pay for capital projects financed by sources other than borrowing.
Purchases of equipment, such as computers and vehicles with a shorter useful life, or other smaller projects are often funded within the budget.

Approval of a capital exclusion creates a temporary increase in the amount the community can levy to fund a budgeted capital project. The amount budgeted for the project or purpose is added to the levy limit to determine how much the community can levy in the fiscal year the item is budgeted. The exclusion lasts only for that one year.

Example

A community appropriates $100,000 from the tax levy to buy a new ambulance. Voters approve a capital exclusion for the purchase. The community can levy $100,000 above its levy limit this year in order to cover that appropriation. If the levy limit is $100 million, for example, the community can levy $100,100,000 this year. However, the $100,000 exclusion is not added to the levy limit base used to calculate the next year’s limit and does not apply to next or any future year.

8.2.3 Exclusion Limit
An exclusion allows a community to levy both above the community’s levy limit and its levy ceiling. An exclusion is the only way a community’s levy can exceed the levy ceiling. Exclusions do not become part of the levy limit and therefore, are not constrained by the levy ceiling.  

8.3 Exclusion Calculation
A debt or capital exclusion is reduced by any state or federal reimbursement given to the community for the capital project.

A debt exclusion is computed using the true interest cost with any premiums received at time of sale of notes or bonds offset against the stated interest cost.  

9.0 OVERRIDE AND EXCLUSION COMPARISON

9.1 Purposes
- An override may be used to raise the levy to cover spending for any purpose.
- An exclusion may be used to raise the levy to cover capital spending only.

9.2 Duration
- An override permanently increases the levy limit and permits an increase in the levy of the year voted and the levies of future years.
• An exclusion temporarily increases the amount the community may levy.
• A debt exclusion lasts for the life of the related borrowing.
• A capital exclusion lasts one year.

9.3 Limits
• An override cannot increase the levy limit above the levy ceiling.
• An exclusion can result in a levy above the levy ceiling. There are no limits on the number or dollar amount of exclusions that may apply in any year.

10.0 MAXIMUM ALLOWABLE LEVY CALCULATION

<table>
<thead>
<tr>
<th>Step 1 Determine Current Year Levy Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Use prior year's levy limit as base.</td>
</tr>
<tr>
<td>• Increase prior year's limit by 2.5%.</td>
</tr>
<tr>
<td>• Add new growth.</td>
</tr>
<tr>
<td>• Compare subtotal to levy ceiling.</td>
</tr>
<tr>
<td>• If less, subtotal is current year's levy limit.</td>
</tr>
<tr>
<td>• If more, ceiling is current year's levy limit.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Step 2 Adjust Levy Limit by Permanent Referendum</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Subtract underride from levy limit determined by Step 1.</td>
</tr>
<tr>
<td>• Add override to levy limit determined by Step 1.</td>
</tr>
<tr>
<td>• Compare subtotal to levy ceiling.</td>
</tr>
<tr>
<td>• If less, subtotal is current year's levy limit.</td>
</tr>
<tr>
<td>• If more, ceiling is current year's levy limit.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Step 3 Add Temporary Referendum</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Add excluded debt service for each debt exclusion to levy limit.</td>
</tr>
<tr>
<td>• Add excluded appropriation for each capital exclusion to levy limit.</td>
</tr>
<tr>
<td>• Total may exceed levy ceiling.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Step 4 Maximum Allowable Levy</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Total is maximum amount of property tax revenue available to support current year's budget.</td>
</tr>
<tr>
<td>• Tax rate must be set within that amount.</td>
</tr>
</tbody>
</table>
11.0 EXCESS LEVY CAPACITY

11.1 Definition
Excess levy capacity is the difference between the community’s actual levy and its levy limit. In years where an exclusion applies, it is the difference between the actual levy and the maximum allowable levy.

Example
A community has a levy limit of $100 million. The community chooses through its budget decisions to actually levy only $98 million for the year. It has $2 million of excess levy capacity. That tax revenue is gone forever. The community can never levy an additional amount on taxpayers to recover that $2 million of revenue.

11.2 Future Year Impact
A community can have excess levy capacity in one year and in the following year, levy up to the full amount of its new levy limit, or maximum allowable levy if exclusions apply. It can levy up to that amount no matter how much the levy increases over last year’s levy.

Example
A community had a levy limit of $100 million last year and actually levied $98 million. This year’s limit is $105 million based on a $2.5 million automatic increase and another $2.5 million increase due to new growth. The community can increase its levy all the way from $98 million to $105 million, thereby using the $2 million in excess capacity it saved the previous year.

12.0 REFERENDUM PROCEDURE

12.1 Referendum Decision
The decision to place a Proposition 2½ referendum question before the voters is made in a town by the selectboard and in a city, by the city council, with the mayor’s approval if the charter or other law requires it.13

12.1.1 Voting Quantum
- A majority vote of the selectboard or council is required to place an override or underride question on the ballot.
- A 2/3 vote is needed to place an exclusion question before the voters.

12.1.2 Alternative Procedure
A local initiative procedure may be used only to place an underride question on the ballot. A community must have a local initiative procedure in its charter for this alternative to apply.
12.2 **Question Form**
The form of each type of question is set out in the law and must be used to be properly presented. Override and exclusion questions state the purpose for which the additional dollars are being sought. Overrides, underrides and capital expenditure exclusions specify a dollar amount.

12.3 **Election Scheduling**

12.3.1 **Municipal Elections**
Questions may be placed on any municipal election ballot.\(^{14}\) This includes regular elections held annually in towns and biennially in cities, as well as special elections called specifically to consider the questions.

12.3.1 **State Elections**
Questions may be placed on the November state biennial ballot.\(^{15}\) These questions must be certified by the municipal clerk to the Secretary of State by the first Wednesday in the August before the election.

12.4 **Referendum Approval**
A question is approved if a majority of the persons who vote on that question vote “Yes.”

PROPOSITION 2½
ADDITIONAL RESOURCES

The following are additional resources on Assessment Administration produced by DLS that are available on our website: www.mass.gov/dls.

- **Levy Limits: A Primer on Proposition 2½** - Explains the fundamental features of Proposition 2½: how the levy limit and ceiling are determined, new growth works and overrides, underrides and exclusions differ. Supplements the course handbook.

- **Proposition 2½ Ballot Questions: Requirements and Procedures** – Explains Proposition 2½ referendum procedures, such as question form and presentation, sequencing of the referendum and related appropriations and contingent appropriations.

- **Annual Levy Limit Instructions** – Annual notice of preliminary levy limit and instructions for completing levy limit worksheet to determine maximum allowable levy for year.

- **Guidelines for Determining Annual Levy Limit Increase for Tax Base Growth** – Annual Informational Guideline Release (IGR) that details calculation and reporting of new growth factor.

- **New Growth Tutorial** – A comprehensive on-line PowerPoint presentation to guide local officials through the completion of the “Tax Base Levy Growth” (Form LA-13) and “Amended Tax Base Levy Growth” (Form LA-13A) reports, including a case study to test comprehension.
**Slide 1**

Proposition 2 1/2

---

**Slide 2**

Agenda Proposition 2 1/2

1. Define the types of property tax limits contained in the law.
2. Explain how those limits are calculated.

---

**Slide 3**

Agenda Proposition 2 1/2

3. Discuss the different types of referenda questions contained in the law that allows those limits to be exceeded.
The Basic Concept of Proposition 2 1/2

**Levy Building Blocks**

- **Levy Ceiling**
- **Levy Limit**
- **Levy**

---

The Levy is the revenue a community raises by assessing real and personal property taxes each fiscal year.

---

Levy Limit is the maximum amount the levy may be in any fiscal year.
The Levy Ceiling is the maximum amount the levy limit can be in any fiscal year.

The Department of Revenue determines the annual Levy Limit and Levy Ceiling for each community.

What is the Levy Limit and How is it Calculated?

To Illustrate Impact of Debt Exclusion

This Year

Levy Limit of $100 million

$1,000,000 Exclusion

Community can Levy $101,000,000

Year 2

Begin with Yr 1 Levy Limit $100 million

Year 3

Begin with Yr 2 Levy Limit

PLUS $1,000,000 Exclusion

Slide 33

To Illustrate Impact of Capital Exclusion

This Year Only

The community can now levy $100,100,000

Levy Limit = $100 Million

Voters approve a Capital Exclusion of $100,000 to purchase a new ambulance

Slide 42

You are now going to apply the concepts discussed by computing how much property tax revenue the Town of Duna has available for its upcoming year's budget.

The exercise is located at page 3-31 in the handbook.
QUIZ
PROPOSITION 2½ LEVY LIMITS

Answer the following true or false questions.

1. The prior year’s levy limit is the base for calculating a community’s annual levy limit.
   T    F

2. A community’s levy limit can exceed 2.5% of the value of all taxable property in the community.
   T    F

3. A community’s levy limit cannot increase by more than 2.5% each year.
   T    F

4. The formula for calculating the new growth increase in the levy limit includes increases in property values due to revaluation.
   T    F

5. The levy ceiling equals 2.5% of the value of all taxable property in the community.

</tr>
</tbody>
</table>

Using these facts and the attached Debt Exclusion Form, DE-1 *(Page 3-35)*, fill in the Levy Limit Worksheet *(Page 3-33)* for the community of Dana. Then answer the following questions.

1. Calculate the FY2018 levy ceiling.

2. Calculate the FY2018 levy limit.

3. Calculate the maximum allowable FY2018 levy.

</tbody>
</table>

**Answers to the Fiscal 2018 Tax Levy Limitation for Dana for budget planning purposes**

FY2018 automatic $2\frac{1}{2}\%$ increase = $1,680,000 \times 0.025 = $42,000

FY2018 Levy Limit = $1,680,000 + $42,000 + $30,000 = $1,752,000

FY2018 Maximum Allowable Levy = $1,752,000 + $215,000 = $1,967,000

1. Calculate the FY2018 levy ceiling.

   $98,000,000 \text{(FY2018 assessed valuation)} \times 0.025 = $2,450,000

2. Calculate the FY2018 levy limit.

   $1,680,000 \text{(FY2017 levy limit)} + $42,000 \text{(automatic $2\frac{1}{2}\%$)} + $30,000 \text{(FY2018 new growth)} = $1,752,000

3. Calculate the maximum allowable FY2018 levy.

   $1,752,000 \text{(FY2018 levy limit)} + $215,000 \text{(FY2018 debt exclusions)} = $1,967,000
