

Chapter 3C: Core Components - Research-Based Interventions and Assessment Practices

Interventions and assessments are research-based and are valid and reliable predictors of future performance. Intervention and assessment procedures are sensitive to English language acquisition issues and used to distinguish these from other learning challenges. Interventions and assessments are time-efficient and administered by adequately trained staff. The assessment documentation of the student's progress collected through the flexible tiers is provided to the student's parents. The interventions supplement, enhance, support, and provide access to the core curriculum and are provided in addition to the core instruction/universal behavior supports.
