

Edwin Analytics is a powerful reporting and data analysis tool that gives authorized users access to a variety of reports on educational data in Massachusetts. Edwin Analytics is unique because it:

- Integrates longitudinal data from pre-kindergarten through public post-secondary education.
- Offers detailed data reports at the district, school, classroom, and student levels.
- Hosts the Commonwealth’s Early Warning Indicator System (EWIS) data, as well as reports related to student enrollment, assessment performance, and post-secondary outcomes.
- Includes information on district expenditures and educator preparation programs.

District ELA Achievement and Growth by Grade

	Median SGP	% Proficient or Higher
All Grades	52	57
Grade 04	67	46
Grade 05	38	47
Grade 06	49	61
Grade 07	55	60
Grade 08	62	67
Grade 10	48	78

Instructional Resources

Look for the “Learn More” icon to access tutorials providing additional support on using the data.

Access

Edwin Analytics is available to all school districts in Massachusetts. District administrators have the option of granting access to all teachers and administrators in the district. Access to student-level data is only granted to educators with direct educational responsibility for the students. For questions about Edwin Analytics, you can contact the Department of Elementary and Secondary Education at edwin@doe.mass.edu.
