

Massachusetts Department of Conservation and Recreation
Division of Water Supply Protection, Office of Watershed Management
Forest Management Project Summary

Project Title: 148 & 122

DWSP Harvest Permit Number: WR 4390
DCR Forest Cutting Plan File Number: 222-8241-16

Site Information

Watershed: Ware River	Town(s): Oakham and Rutland
Acres: 35	Nearest Road: Rt 148 and 122
Natural Heritage Atlas overlap?: No	Public Drinking Water Supply Watershed?: Yes
Forest Types: White pine -hardwood, Red Pine	ACEC?: No
Soils: Most of the lot is on 253 Hinckley loamy sand, excessively drained.	
Wetland Resources: The lot is located south of Rt 122 and east of Rt 148 where they intersect.	
Vernal Pools: None Known	

Harvest Information

Harvest Start Date: 2016	Harvest End Date:
Number of Wetland Crossings: None	Number of Stream Crossings: None

Best Management Practices Applied

Stream Crossings	There are no stream crossings.
Filter Strips	There are no filter strips.
Wetland Crossings	There are no wetland crossings.
Harvesting in Wetlands	There is no harvesting in wetlands.

DWSP Forester supervising this harvest	
Name:	Kenneth W. Canfield
Forester License #:	431
Phone #:	508-882-3636 ext.1603

NARRATIVE

General Description/Forest Composition/History:

The harvest area lies south of Rt 122 and east of Rt 148 where they intersect in Oakham. The lot extends east to the Rutland town line. A small portion of one group selection patch crosses into Rutland.

This area was harvested several times in the recent past. Shelterwood harvests were completed in 1991 and 2000. Two patch cuts of 4 and 7 acres were also created in 2000 on the eastern edge of the lot. The patch cuts regenerated well with a mix of oak, white pine, aspen, red maple, and birch.

There is 6.5 acres of previously thinned red pine plantation in the northwest corner of the lot. That area was thinned in 1991 and 1998 and has regenerated well under a sparse canopy of residual red pine stems.

There is some heath type habitat with large pitch pines present in the western portion of the lot.

The soil is excessively drained.

Site Selection:

The primary goal of the watershed forest management program is to create and maintain a forest that provides high quality drinking water to current users and future generations. DWSP recognizes that wildlife habitat management and restoration of rare habitats are important secondary goals, where they are compatible with maintaining high quality drinking water.

This area was chosen partially because the residual red pine is likely to succumb to pests within the next ten years. The two patch cuts are ready to have their edges released and expanded. The pitch pine that is present will be released.

Silvicultural Objectives:

The harvest in the red pine will be a shelterwood removal cut to remove the residual overstory red pine before it succumbs to pests and release the advanced regeneration that is abundantly present. The two patch cuts on the eastern edge of the lot will be expanded by placing new groups adjacent to them. The new groups will be located to the south of the patch cuts, resulting in increased light for the regeneration on the southern edge. New groups, ¼ to 1.9 acres in size, will be established throughout the lot, removing low quality overstory white pine and hardwood, while retaining some stems, mostly white and red oak, for aesthetic purposes.

Cultural Resources:

This land has been determined to not be culturally or archeologically sensitive based on a review by the DCR Archaeologist. Standard practice dictates that every effort is made to avoid disturbing stone walls and other cultural resources.

Wildlife/Rare or Endangered Species:

No known vernal pools are present within the lot. One group in particular was located within an area that had mature pitch pine present. All pitch pine was retained and released.

Notes:
 Applicant must provide DCR with all relevant information before plan may be approved and cutting may begin.
 Some forestry activities, such as prescribed burning and pesticide or fertilizer application may require additional permits.
 Consult MA Forestry BMP Manual for further information.

If Other (OT) is used in any category an explanation must be given on an attached narrative page

Forest Products

Products to be Harvested*

Species	Mbf/Cds		Mbf/Cds
White Pine	32.5 M	Red Maple	
Red Pine	12.9 M	Sugar Maple	
Pitch Pine		Red Oak	1.4 M
Hemlock		Black Oak	0.2 M
Spruce		White Oak	0.5 M
Other Sftwd.		Other Hdw.

Landowner

Landowner Signature

The most important information on a cutting plan is the Landowner's objective, as this will determine which trees will be harvested and which will remain; this decision will also determine the future condition of the forest for decades to come. After having read the Massachusetts Forest Cutting Plan Information Sheet on page one, indicate your objective by checking the appropriate box below.

LT - Long-term Forest Management

Planned management of the forest to achieve one or more of the following objectives: produce immediate and maximize long-term income, enhance wildlife habitat, improve recreational opportunities, protect soil and water quality, or produce forest specialty products.

ST - Short-term Harvest

Harvest of trees with the main intention of producing short-term income with minimal consideration given to improving the future forest condition, which often results in a forest dominated by poor quality and low value species.

I (we) have read the Massachusetts Cutting Plan Information Sheet, and am aware of my (our) management options.

I (we) hereby certify that I (we) have the legal authority to carry out the operation described above.

I (we) certify that I (we) have notified the Conservation Commission in the town in which the operation is to take place and the abutters of record within two hundred feet of the area to be harvested.

I (we) understand that the volumes and values (Ch61 only) in this plan have not been independently verified by the service forester upon approval and will report final values and volumes to the Director or his/her agent if the final figures differ from those reported.

FOREST CUTTING PLAN CERTIFICATE

Post this in a conspicuous place within the area in which the harvesting operation is to take place.

This certifies that DCR-DWSP 485 Ware Rd
(Name of Owner) (Address) Belshertown, MA 01007 in accordance with the

provision of M.G.L. Chapter 132, Section 40-46, filed in Clinton with the Dept. of Conservation
and Recreation, Division of State Parks and Recreation, a Notice of Intent to cut forest products upon the

Rt 122 lot.
