RE: **PROPOSED OPERATING PERMIT**
Application for: BWP AQ 12 Operating Permit Renewal
310 CMR 7.00: Appendix C
Application No. SE-13-041
Transmittal No. X257785
Source No. 1200018

AT: Duro Textiles, LLC
110 Chace Street
Fall River, Massachusetts 02724

Dear Mr. Tarantino:

In accordance with 310 CMR 7.00 – Appendix C(6) of the Air Pollution Control Regulations (“the Regulations”), the Department of Environmental Protection (“Department” or “MassDEP”), is forwarding to the United States Environmental Protection Agency (“EPA”) the attached Proposed Operating Permit for Duro Textiles, LLC, 110 Chace Street, Fall River, Massachusetts.

Public notice of the Draft Operating Permit was published by the MassDEP in The Herald News and in the Environmental Monitor on April 6, 2016 in accordance with the requirements of 310 CMR 7.00: Appendix C. As such, the public comment period ended on May 6, 2016. During that period, no public hearing was requested pursuant to 310 CMR 7.00: Appendix C(6)(f).

There are some minor changes made since the issuance of the Draft Operating Permit. Specifically, the removal of provisions relating to emergency demand response operation of 40 CFR 63.4243(d)(2)(ii) through (iii) as contained in Monitoring and Testing Requirement #33 in Table 4.

Attached for your review is the Proposed Operating Permit. It lists the applicable Federal and State Air Pollution Control Requirements and what is required of the facility in order for it to be considered in compliance with such applicable requirements.

The MassDEP will not issue a Final permit prior to the expiration of the 45-day period for EPA objection unless EPA notifies MassDEP of its intention not to object. If EPA does not object to the Proposed Operating Permit, any person may petition the EPA during the 60 days after the expiration of the EPA's 45-day review period, and may request that EPA object. Should there be any issues raised during this period by EPA, the MassDEP will notify you of any actions necessary. This time period in no way alters your facility's "application shield" nor the requirement for the facility to be operated in accordance with this Proposed Operating Permit.

Should you have any questions concerning this Proposed Operating Permit, please contact Elza Bystrom, your permitting point of contact, at (508) 946-2856.

Sincerely,

This final document copy is being provided to you electronically by the Department of Environmental Protection. A signed copy of this document is on file at the DEP office listed on the letterhead.

Thomas Cushing, Chief
Permit Section
Bureau of Air and Waste
