Map Location

WEST BOYLSTON FALLS WITHIN THE MassDEP CENTRAL REGION

This map is for illustrative purposes only. It represents the best statewide data available at the date of printing. There are other important natural resources that are not shown on this map because the digital spatial data do not exist.

DATA SOURCES

HYDROGRAPHY: USGS/MassGIS, 1:25,000 or less. Hydrography from the USGS National Hydrography Database (NHD) is used to derive water supply watersheds where the resolution is approximately 1:100,000.
TOPOGRAPHIC CONTOURS: MassGIS, 1:5,000. 3 Meter contour elevations generated from digital ortho (DO) data.
GEOGRAPHIC FEATURES: USGS/MassDEP, USGS Geographic Names Information System (GNIS). Features are projected to geographic coordinates using the US National Geographic datum.
POLITICAL BOUNDARIES: MassGIS. This political boundary dataset has been created from latitude and longitude coordinates found in the US Volume Harbor and Lands Commission Town Boundary Atlas.
ROADS: Mass Department of Transportation 1:50,000. Road centerlines signed with 1:50,000 Orthophotos. Attributes from DOT roads database.
TRANSITS AND TRANSLINES: Mass Department of Transportation Trans @ 1:50,000, Pipelines and Powerlines @ 1:25,000.
WETLANDS: USGS National Wetlands Inventory (NWI) data. Wetlands are shown on this map as a general indicator of expected water quality. The only way to be sure of the quality of water in any given well is to have that water tested.
