

Important Information about Your Drinking Water

Availability of Monitoring Data for Unregulated Contaminants for [System]

As required by US Environmental Protection Agency (EPA), our water system has sampled for a series of unregulated contaminants. Unregulated contaminants are those that don't yet have a drinking water standard set by EPA. The purpose of monitoring for these contaminants is to help EPA decide whether the contaminants should have a public health protection standard.

2015 Unregulated Contaminant Test Results:

Unregulated Contaminant	Date Collected	Result or Range of Detected	Average Detected
Strontium (ppb)	xx/xx/xxxx		
Vanadium (ppb)	xx/xx/xxxx		

What should I do?

You do not have to do anything but as our customers you have a right to know that these data are available.

You may share this information with other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, food establishments, medical facilities and businesses).

For more information

For additional information on your water see your water department's Consumer Confidence Report (CCR), delivered by your water department by July 1 of each year. If you have any questions about your CCR, see the contact information below for your water department.

For information on the Unregulated Contaminant Monitoring Program, visit the MassDEP website (<http://www.mass.gov/eea/agencies/massdep/water/drinking/water-systems-ops.html>) and navigate to Unregulated Contaminant Monitoring Program.

If you want to speak with someone at the water department about the results, please contact [name of contact] at [phone number] or [mailing address].

This notice is being sent to you by [system].
