General Information: Whitney is an average sized (110-acre) warm water pond located in Winchendon north of Route 12. The water is a brown color with a transparency of 3.5 feet. The shoreline is undeveloped. Aquatic weeds are dense around the entire perimeter of the pond.

Access: Boat access is available for car top boats on a gravel ramp off of Central Street. Shore access is available along most of the pond's perimeter.

Management History: Managed as a warmwater fishery.

Fish Populations: The fish population was most recently surveyed during the summer of 2000 with nine species of fish found. Gamefish present included largemouth bass, chain pickerel, Yellow perch, black crappie, white sucker, bluegill, pumpkinseed, golden shiner and creek chubsuckers.

Fishing: Largemouth bass and chain pickerel provide fishing for warm water game fish with some good-sized individuals of both species. Yellow perch and black crappies provide good pan fishing.
