*Helping Massachusetts
 Cities and Towns Create
 a Clean, Affordable and
 Resilient Energy Future*

Benefits of Being a Green Community

- CUT MUNICIPAL ENERGY COSTS
- ACCESS GRANTS FOR CLEAN, AFFORDABLE AND RESILIENT ENERGY PROJECTS
- REDUCE GREENHOUSE GAS EMISSIONS
- PROMOTE ENERGY-EFFICIENT BUILDING CONSTRUCTION
- FOSTER RENEWABLE ENERGY AND CLEAN ENERGY TECHNOLOGIES
- BECOME A CLEAN ENERGY LEADER AND A BETTER PLACE TO LIVE, WORK AND PLAY

The Green Communities Division provides...

- Local support from Regional Coordinators
- Education on benefits of energy efficiency and renewable energy
- Guidance and technical assistance for all of your energy questions and projects
- Collaboration through shared best practices among municipalities
- Funding opportunities for clean energy projects

DOER's Green Communities Division

The Green Communities Division offers a full range of energy initiatives and services to cities and towns. Contact your Regional Coordinator for more information.

Regional Coordinators — Four Green Community Regional Coordinators throughout the state offer technical assistance and support to public officials and local energy committees.

Green Communities Designation and Grant Program — In accordance with the Green Communities Act, up to \$10 million per year is available for qualifying communities to implement energy-efficiency measures, construct renewable energy projects, or pursue other avenues for reducing their fossil fuel energy consumption. The Division has awarded over \$51 million to designated Green Communities since 2010.

Municipal Energy Efficiency — DOER collaborates with electric and gas utilities to administer energy efficiency services to local and regional government entities. We also provide educational materials to help plan and implement all types of municipal energy efficiency projects, including streetlights, vehicles, water/sewer facilities, and buildings.

MassEnergyInsight — Offered at no cost to all cities and towns, MassEnergyInsight is an easy-to-use, web-based tool that benchmarks the energy performance of all municipally owned and operated buildings, as well as streetlights and vehicles.

Mass Municipal Energy Group (MMEG) — MMEG is a web service that facilitates knowledge sharing, collaboration, and networking among individuals involved in municipal energy and sustainability activities across Massachusetts. MMEG can save time and effort, enabling a more direct path to clean energy success for your city or town. To ensure that MMEG benefits municipalities exclusively, membership is “by invitation only” based on users’ affiliations.

If you would like to join the MMEG community, please complete a short form at: <http://bit.ly/QjJ5X5>.

Energy Management Services Technical Assistance — Energy management services (EMS) can be an effective tool for cities and towns looking to implement significant energy savings measures without upfront capital. EMS is a type of performance contracting through which guaranteed energy savings pay for the cost of installing the energy efficiency measures. DOER can assist communities in all aspects of EMS program development, including reviewing procurement documents.
