

Western Massachusetts Tornado Rebuild Program

Certified HERS Rater List

Ready to Apply?

The first step is to contact a HERS rater who will guide you through the application process. Once you select a HERS rater they will assist you through the construction process.

What's a HERS rater?

A Home Energy Rater (HERS) performs an analysis of a home's construction plans and onsite inspections. The HERS rater uses an energy efficiency software package to perform an energy analysis of the home's design based on the plans. The analysis yields projected, pre-construction energy savings, and helps identify the necessary energy efficiency improvements needed to ensure the home will help reduce your energy costs.

Building Alternatives Inc.

Bob Tortorice

PO Box 7, Franconia, NH 03580
