The law provides for a two year transitional process for those young adults who will lose their entitlement to special education upon graduation or reaching the age of 22. It creates a single point of entry into the adult human services system by developing an Individual Transition Plan (ITP) for every person with a severe disability who is found eligible. For more information about Chapter 688, visit the above website or contact whoever is in charge of your IEP at school.

We are inclusive of both female-to-male (FTM) spectrum and male-to-female (MTF) spectrum individual, of genderqueer persons, of intersexed folks, and of those questioning their gender identity. We are welcoming to people of color and to persons with disabilities. Our meetings are typically a good mix of FTM and MTF members, and of people at varying stages of transition—you really will feel comfortable and included! Come to our group if you are looking for support in understanding your gender identity, help with coming out or transitioning, emotional support, a sense of community, a place where you belong and feel comfortable, or just to meet people you can relate to. The meetings emphasize group participation and mutual respect; a volunteer facilitator and a go-around check-in help to ensure that no one member dictates the flow and everyone has a chance to express themselves. Discussions at the meeting are confidential between members, and members agree not to assume that others go by the same name/pronouns/identity outside the group. We are aware that groups advertising trans “community” can be rife with the same prejudices we are trying to get away from, and our members do strive to be aware and to keep the meetings free of judgments and full of acceptance.

each member of every school community is valued and respected regardless of sexual orientation or gender identity/expression. We believe that such an atmosphere engenders a positive sense of self, which is the basis of educational achievement and personal growth. Since homophobia and heterosexism undermine a healthy school climate, we work to educate teachers, students, and the public at large about the damaging effects these forces have on youth and adults alike.

We recognize that forces such as racism and sexism have similarly adverse impacts on communities, and we support schools in seeking to redress all such inequities. GLSEN seeks to develop school climates where difference is valued for the positive contribution it makes in creating a more vibrant and diverse community. We welcome as members any and all individuals, regardless of sexual orientation, gender identity/expression, or occupation, who are committed to seeing this philosophy realized in K-12 schools.

Young Adult Experiences with Programs and Services

Amy shares her experience with various young adult programs…

“The Transformation Center has different workshops and trainings for young adults. They are also a peer run organization. Their trainings have given me a lot of self worth. They teach you that young adults can advocate for themselves. TRACS is another great program for young adults. They have two young adult peer mentors that run peer support groups. There are also social outings once a month that help you stay connected to other young adults in mental health recovery. The Metro Suburban Recovery Learning Community is run by those in mental health recovery. I started out volunteering there on the phones and am now a Peer Facilitator. They have trainings where they teach you how to run a group. I currently run a group called Raw Arts where anything creative happens. Another program that has been a great help to me is Transitions Young Adult Day Program in Walpole, MA. It is a part of the May Institute which handles all behavioral health, not just autism. I have met other young adults there with similar experiences and we have groups such as Expressive Arts Therapy and DBT (Dialectical Behavioral Therapy) group. It’s great to have a day program for just young adults.”

Jessel shares his experience at community college…

“My experience at RCC (Roxbury Community College) on the whole has been great. The professors are fantastic and the student body for the most part is mature and friendly. Class sizes are relatively small (which is very good). It is also a very diverse student body. By putting in my best effort and showing seriousness I have been able to get mostly A's in my first two semesters.”

- Jessel-Paul Smith

Megan shares her experience with an intensive residential treatment program…

“Chauncy Hall saved my life. The people there cared. They believed in me. They always gave that extra push when I needed it. They made me realize that I have a life worth living, and they will tell you that everyday. They are the people who will never give up on you, who will never back off. They were able to give me the tools for me to better myself.”
