

## Massachusetts Childcare/Preschool Immunization Survey Results 2014-2015

The Massachusetts Department of Public Health Immunization Program is pleased to make available the 2014-2015 Massachusetts childcare/preschool immunization survey results by program. Please be aware that the data are limited in a number of ways, including those listed below.

- Data release standards do not allow for data to be shared for programs with fewer than 30 reported children. Programs that reported fewer than 30 children are indicated (†).
- Not all programs return their survey. Programs without data due to non-response are indicated (\*).
- Some programs returned surveys, however those surveys contained discrepancies leading to mathematically impossible rates. Programs where rates were withheld due to these discrepancies are indicated (¶).
- Data were primarily collected in the fall, but immunization data are often updated throughout the year and rates (during the same school year) may be higher than reported due to additional children receiving immunizations or bringing records to school. Also, the childcare/preschool population is dynamic and as children arrive and leave programs, the immunization rates are impacted.
- Children are allowed a medical or religious exemption to one or more vaccines.
- Children without the required number of doses of vaccine do not necessarily have an exemption on file.
- Children without a record of vaccination, but with serologic proof of immunity to certain diseases (measles, mumps, rubella, hepatitis b and varicella), meet childcare/preschool entry requirements, but may not be counted as vaccinated.
- All data are self-reported by the childcare/preschools and discrepancies may exist. The Immunization Program continues to work with programs to resolve discrepancies and update immunization data, when possible.

### Data definitions:

*	Program did not respond to survey
†	Program reported fewer than 30 total students, so data cannot be released
¶	Program returned survey however, due to data discrepancies, rates are not available at this time
4 DTaP	4 doses of DTaP (diphtheria, tetanus and pertussis) vaccine
3 Polio	3 doses of polio vaccine
1 MMR	1 doses of MMR (measles, mumps and rubella) vaccine
3 Hib	3 doses of <i>Haemophilus influenzae</i> type b vaccine
3 Hep B	3 doses of hepatitis B vaccine
Immunity to Cpox	2 doses of varicella vaccine or a reliable history of chickenpox disease
Series	4 DTaP + 3 Polio + 1 MMR
Exemption	Medical and religious exemptions combined

\*Indicates program did not respond to the survey

†Indicates program reported fewer than 30 total children so data cannot be released

¶Indicates program returned survey however, due to data discrepancies, immunization and exemption rates are not available at this time

Rates for vaccines are rounded to the nearest percentage and may slightly under- or overestimate true immunization rates

Series: 4 DTaP + 3 Polio + 1 MMR

Exemption data represents medical and religious exemptions combined

¶ Indicates program returned survey however, due to data discrepancies, immunization and exemption rates are not available at this time

Rates for vaccines are rounded to the nearest percentage point and may slightly under- or overestimate true immunization rates.

**4 DTaP** 4 or more doses of DTaP (diphtheria, tetanus and pertussis) vaccine

**3 Polio** 3 or more doses of polio vaccine

**1 MMR** 1 doses of MMR (measles, mumps and rubella) vaccine

**3 Hib** 3 or more doses of *Haemophilus influenzae* type b vaccine

**3 Hep B** 3 doses of hepatitis B vaccine

**Immunity to Chickenpox** 1 doses of varicella vaccine or a reliable history of chickenpox disease

**4-3-1 Series** 4 DTaP + 3 Polio + 1 MMR

**Exemption** Medical and religious exemptions combined

•Data were primarily collected in the fall, but immunization data are often updated throughout the year and rates (during the same school year) may be higher than reported due to additional children receiving immunizations or bringing records to childcare. Also, the childcare population is dynamic and as children arrive and leave the childcare program, the immunization rates are impacted.

•Children are allowed a medical or religious exemption to one or more vaccines.

•Children without the required number of doses of vaccine do not necessarily have an exemption on file.

•Children without a record of vaccination, but with serologic proof of immunity to certain diseases (measles, mumps, rubella, hepatitis b and varicella), meet childcare/preschool entry requirements, but may not be counted as vaccinated.

•All data are self-reported by the programs and discrepancies may exist. Rates for vaccines are rounded to the nearest percentage point and may slightly under- or overestimate true immunization rates. The Immunization Program continues to work with childcare programs to resolve discrepancies and update immunization data, when possible.
