| About this Resource Guide                                     | 43   |
Welcome to the Healthy Relationships, Sexuality and Disability Resource Guide! We are happy to share these helpful sexuality education resources with you. Young people living with disabilities (and their families and health care providers) helped create this guide. It lists their favorite sources of information about growing up healthy and safe.

Learning to access sex education and talk openly and honestly about sexual health is an important part of growing up. Young people who understand their own bodies, rights, and experiences may find it easier to communicate their needs and have them respected. All youth deserve information and support to get the knowledge, attitudes, behaviors and skills they need to stay healthy in relationships and protected from abuse.

If you have been looking for more information about how to grow up healthy and safe, this is the Guide for you! It includes books, CDs, websites, and other resources about:

- Changing bodies and feelings
- Getting and giving respect
- Dating and relationships
- Developing sexual identity and orientation
- Finding medical information and social support
- Protecting yourself from pregnancy, disease and abuse
- Developing sexual health and well-being

If you need more help, you can ask a trusted adult for help to find the information you need. Or you can contact the Division for Children & Youth with Special Health Needs Community Support Line at (800) 882-1435 (calling within MA), (617) 624-6060 or (617) 624-5992 (TTY) to speak to someone whose job is to help youth with disabilities and their families find information and resources. Many types of helpful community resources, public benefits, and state programs may be available to you.

We hope you enjoy and continue to share these important resources and look forward to adding your new favorites in the future.
The Healthy Relationships, Sexuality and Disability Resource Guide was created to benefit people with disabilities, a priority population identified in the 2009-2016 Massachusetts Sexual Violence Prevention Plan. Our state plan helps to promote health access and prevent abuse in populations who have historically experienced a higher risk of sexual violence, such as people with disabilities.1 In 2009, state health and social service agencies jointly surveyed youth with intellectual and developmental disabilities (and the parents and providers who support them) to learn about their experiences and opinions accessing health education and resources. Together they helped identify many strengths and gaps in healthy sexuality education and abuse prevention education in Massachusetts.

Learning how to access accurate and appropriate health information and support is an important developmental task for all youth. Yet according to the 2009 needs and resources assessment survey, many youth with disabilities in Massachusetts lacked sufficient health education or support that addressed their unique needs. Parents and providers surveyed echoed youth requests for relevant sexuality education resources necessary to facilitate youth access to healthy, respectful, equitable relationships and lives free from abuse. Many of the resources in the Healthy Relationships, Sexuality and Disability Resource Guide were first suggested by the youth and adults who took part in the survey. Others were suggested by the staff of related state agencies and program partners.

Youth and adults with a wide range of intellectual, developmental and physical abilities and disabilities benefit from the multiple resource types (such as books, CD/DVDs, curricula, trainings, websites, helplines and support groups) listed in the Guide. International Standard Book Numbers (ISBN numbers) are listed for resources available in libraries or online bookstores. While many of the resources are free, costs do vary. Most resources are affordable for individuals and families, although a few may be more affordable to agencies or schools. We hope this Guide will help people living with disabilities and those who care about them find a wealth of resources designed to make sexuality education relevant and accessible to all.

State agencies that helped with the survey:
Massachusetts Department of Public Health (MDPH); Massachusetts Department of Developmental Services (MDDS), the Massachusetts Disabled Persons Protection Commission (DPPC)

1Armour B, Wolf L, Mitra M, Brieding M. Differences in intimate partner violence among women with and without a disability, presentation at American Public Health Association, 10/27/2008
Sexuality Educators in Massachusetts shared these talking tips for parents of youth who have disabilities:

• **Start early and talk often:** remember, the more you do it, the easier it gets.

• **Keep it simple:** provide simple, direct explanations, using words they can understand. Long explanations can be unnecessary, or more confusing.

• **Be “askable”**: make it clear that they can ask you anything, as well as seek help to find the answer together.

• **Use correct terms that prepare children to talk about their body and experiences:** knowing the real names for their body parts makes it easier to communicate about them. Share the changes that will happen to their body and moods before puberty starts.

• **Try multiple teaching techniques:** present information through pictures, books, videos, or social learning models, including role play or asking “What would you do if...” This helps you reinforce your message and find out how your they prefer to learn.

• **Use “teachable moments”**: You can start a conversation naturally while you’re watching television or people interacting, reading a book or listening to music together.

• **Don’t feel like you have to have all the answers**: it’s okay to say, “That’s a good question! I’m not sure about the answer but let’s find out together,” or “Let me think about that one,” if you need more time or information to confidently answer.

• **Discuss your values and expectations, and consider theirs:** Be willing to hear their entire question or story before responding. If you disagree, explain your concerns (safety, school rules, family expectations, laws, etc.) and come to a solution together.

• **Model and teach helpful social skills, including self-esteem:** Feeling good about yourself and worthy of being treated well helps prevent high risk behavior and abuse.

• **See your son/daughter as a whole person capable of experiencing romantic love and affection:** Remember that learning to navigate dating, relationships and healthy sexuality are normal developmental tasks best accomplished with your guidance and support.

• **Encourage independent thinking and action, decision-making skills and boundary setting:** give them support to make choices and decisions that are right for them. Show them how to set boundaries and respect the boundaries of others.

• **Expose them to a variety of social situations and experiences:** Create opportunities for them to build a peer support system. Provide both appropriate supervision and opportunities for privacy.

• **Teach them about consent and how to powerfully say no (or, yes):** When children are little, you can teach them “no, go, tell.” As they get older, reinforce the need to both clearly ask for, and give or refuse consent to dating, relationships and sexuality.

• **Guide them to access ongoing sources of information and support:** help them find medically-accurate, developmentally appropriate resources they can access independent of you, whether it is another trusted adult, health care provider or website.

**Trans Bodies, Trans Selves: A Resource for the Transgender Community**

Edited by: Laura Erickson-Schroth, MD, MA
Published by: Oxford University Press, 2014
ISBN: 0199325359

Inspired by the classic sexuality resource guide “Our Bodies, Ourselves,” this comprehensive, reader-friendly resource guide was written by transgender and genderqueer authors. It has an inclusive perspective throughout, and contains a chapter about dis/abilities and deafness. Race, religion, employment, medical and surgical transition, mental health, relationships, sexuality, and parenthood are also discussed. It is a welcoming place for transgender and gender-questioning people, their partners and families, and others to find information on transgender life.

### Intended Audience

- LGBTQ advocates and educators
- LGBTQ adults with disabilities
- Trans youth and adults with disabilities
- Trans youth and adults who are deaf
- Disability advocates and allies

| **Everyone’s Responsibility: Preventing Abuse Against People with Disabilities** | AbleVision  
www.triangle-inc.org/index.php/about_ablevision/  
Video available at:  
http://youtu.be/Ps0Rt9TU3ao | Triangle's IMPACT: Ability Program empowers people with disabilities and communities to prevent abuse. Ablevision is a show produced by people with disabilities. This Ablevision online video provides scenarios where both persons with disabilities and direct support professionals report sexual abuse. | • Adolescent to adult persons with disabilities  
• Educators and direct support professionals |
| **IMPACT: Ability** | Contact:  
Meagan Anderson, IMPACT: Ability Program Coordinator  
(781) 321-3900  
manderson@impactboston.org | Triangle's IMPACT: Ability program empowers people with disabilities and the organizations that serve them to prevent abuse. Triangle develops model policies and provides consultation on how to best provide self-defense training and respond to and report abuse including:  
• Hands-on self-defense and assertive communication training to people with disabilities, including learning appropriate behavior in the workplace and other social settings.  
• Training for Providers and Special Education teachers on how to respond to and prevent abuse.  
• Consultation for developing Abuse Prevention Leadership Teams.  
• Train-the-Trainer programs to teach staff and self-advocates how to deliver provider training sessions. | • Persons with Disabilities  
• Family members  
• Social service agencies that work people with disabilities  
• Educators and direct support professionals |
| **Just Say Know! Understanding and Reducing the Risk of Sexual Victimization of People with Developmental Disabilities** | [Image of book cover]  
Dave Hingsburger  
Published by:  
Diverse City Press (1995)  
ISBN: 1896230008 | This book offers inspiration and practical guidance for families and clinicians on the subject of sexual abuse and the vulnerability of people with developmental disabilities. | • Parents  
• Health care professionals  
• Educators and direct support professionals |

Rainbow Support Group of Massachusetts. Statewide Coordinators: Pauline Bosma, Project Consultant rainbows_58@yahoo.com; Ed Bielecki, Coordinator ed@mass-advocates.org; or Pat Carney, Trainer patricia.carney@state.ma.us

Whole Children, Inc. Information available at: www.wholechildren.org
A key goal of the 2009-2016 Massachusetts Sexual Violence Prevention Plan is to improve our statewide capacity to promote healthy relationships, healthy sexuality, and abuse prevention among people with intellectual and developmental disabilities. Therefore in 2009, the Massachusetts Department of Public Health (MDPH) and Department of Developmental Services (MDDS) jointly surveyed youth living with disabilities (as well as the parents and providers who support them) about their experiences accessing related education in Massachusetts.

This needs and resources assessment was conducted by MDPH Bureau of Community Health and Prevention staff Marci Diamond, Jeanne Ward, and Pialee Roy, and MDDS Office of Quality Management staff including Janice O’Keefe. Substantial input was provided by Susan Love of the Disabled Persons Protection Commission, members of the DPH Division for Children & Youth with Special Health Needs Young Adult Advisory Council and other key program partners.

As a result, the Healthy Relationships, Sexuality and Disability Resource Guide was first developed in 2011 to address the identified strengths and gaps regarding abuse prevention and healthy sexuality education. Lenore Tsikitas, Health Access and Promotion Coordinator of the MDPH Family Planning Program oversaw creation and production of the Guide with the input and expertise of Patricia Carney, Training Coordinator of the MDDS Office of Learning and Development, and assistance of MDPH interns: Adeolu Odewale, Hannah Zangwill, Jayne Greenberg, Courtney Kaczmarsky and Siobhan Gruschow.

The Guide includes a wide range of resources with content descriptions and toll-free program support designed to help the reader decide which are most applicable to their own needs, situation, and organizational, familial, or personal values.

Please note:
• Some of the older resources may use outdated terms (such as ‘mental retardation’) that are no longer used to describe people with intellectual and developmental disabilities. These resources were only listed if they contained valuable information that was not available elsewhere.

• The presence of resources in this guide does not constitute an official endorsement of any particular state agency or organization named here

The Massachusetts Department of Public Health (MDPH) and Massachusetts Department of Developmental Services (MDDS) partnership was made possible by CDC Cooperative Agreement 05037CONT07, CFDA 93.13: Building Evaluation Capacity for Rape Prevention and Education Funded Programs. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of CDC.

Cover images are courtesy of IMPACT: Ability, the North Carolina Disabled Young People’s Collective, Barry Bland/Bancroft USA, National Collaborative on Workforce & Disability for Youth, Sheila Wray Gregoire, and others.
