

ELEVATOR RESCUE – CLASSROOM

Elevator rescue is a 6-hour program packed full of the information that will be needed to successfully conduct operations at an incident involving an elevator. The class contains elevator history, various systems found in the field, safety procedures, and the proper removal and treatment of trapped/and or injured passengers in stalled elevators. The program will strongly emphasize the use of mandatory Lock out/Tag out (LOTO) procedures, the DFS SOG's for elevator operations and the use of the new DPS/DFS online form for reporting elevator problems via email to the proper member of the DPS Elevator Division.
