

PREVENT BURNS!

Lock up dangerous items. Keep out of children's reach. **Fire kills. Fire can hurt for life.**

Stay away from burner or flame. Don't wear loose clothing near fire.

Keep children away from stoves, outdoor grills, campfires, and fireplaces.

Keep hot liquids out of reach of children.

Don't let appliance cords dangle where children can reach them.

Turn **down** water heater to less than 130°. Higher temperatures can cause third degree burns (the worst) in two seconds!

Always turn off an iron when it's unattended.

Turn pot handles toward the back of the stove.

Never use gasoline to start a fire. Use starter fluid with care.

Never smoke in bed.

Protect your skin from the sun. Use tanning products with a high SPF rating.

KINDS OF BURNS

FIRST DEGREE: Epidermis (top layer of skin) is damaged. Skin is red and may swell. Victim feels pressure and pain.

SECOND DEGREE: Epidermis and dermis (second layer of skin) damaged. Blistering may occur.

THIRD DEGREE: Epidermis, dermis, and nerve endings destroyed. Victim may or may not feel pain. Skin is discolored (white, brown, black or red) and leathery in texture. Muscle, fat, and bone may also be destroyed.
