## **EXECUTIVE SUMMARY**

This report continues to provide an analysis of the data on all admissions, releases and the resulting cumulative difference per quarter – as well as quarterly snapshots of the population. The first quarter (January – March) of 2011 reflected the highest population counts compared to the previous three quarters. The increase in total population grew 2.2% from the fourth quarter of 2010 to the first quarter in 2011. This increase can be attributed to admissions outnumbering releases resulting in a cumulative increase of 163 inmates by the end of March.

By the end of CY2010 admissions, in general, were relatively low; during the first quarter of 2011 admissions increased among all commitment types, detainees (awaiting trial), civil commitments and those criminally sentenced. By March 2011, the monthly admissions count was the highest in at least twelve months at n=951 inmates. Simultaneously, there was a steady drop of inmates being released, particularly among detainees and criminally sentenced releases December 2010 to February 2011. March 2010 showed an increase in all types of releases, including those civilly committed.

Having a tremendous impact on admissions outpacing releases during the first quarter of 2011 was a trend within the criminally sentenced population, an increase among male parole violators as well as a sharp decline among male inmates paroled. This shift in the flow of parolees returned to and released from the Department also significantly impacted the proportion of inmates being released with criminal justice supervision. Almost half of criminally sentenced inmates released in the first quarter of 2011 had no post-release prison supervision, which far surpasses the proportion of inmates with no supervision in previous years ranging from 37-39%. This was another direct impact of the decrease among inmates being paroled.

## Section 1. Overview of MA DOC Populations' Admissions and Releases

### 1.1 Total MA DOC Custody and Jurisdiction Population

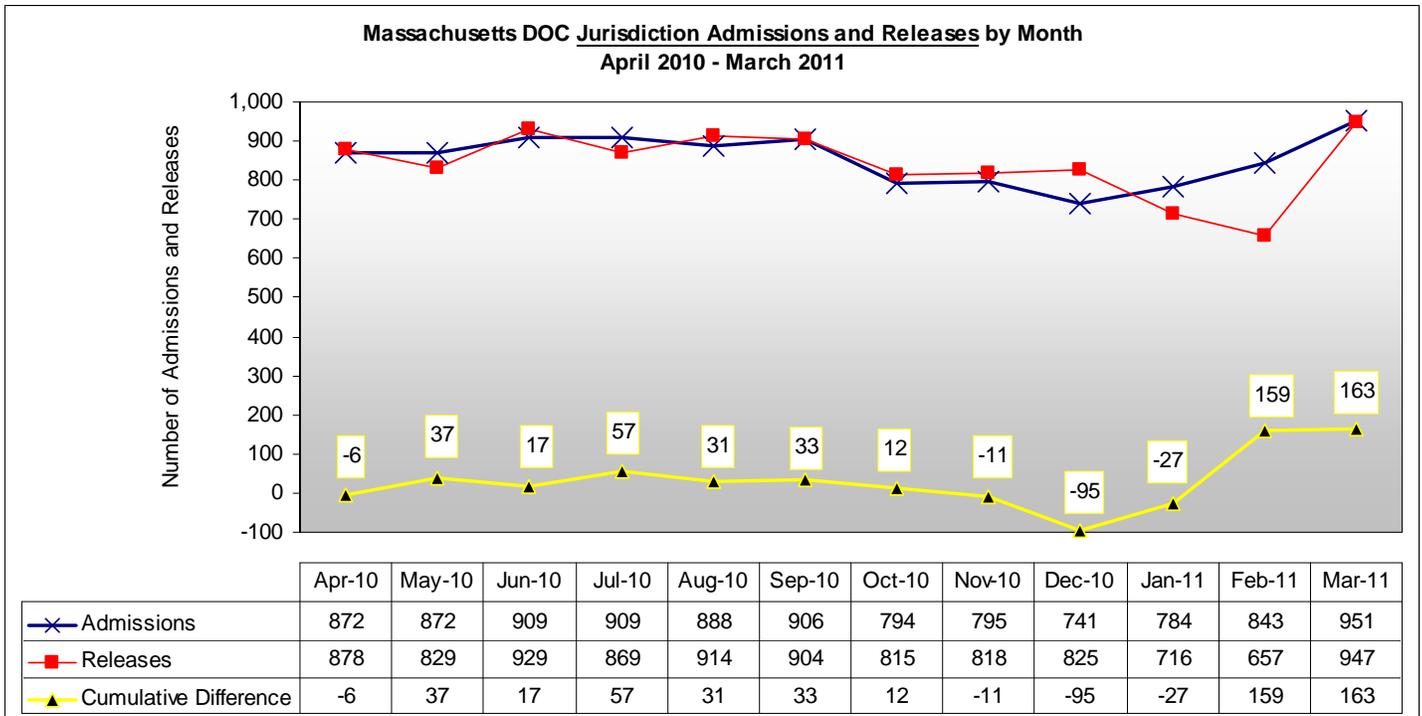

The average quarterly jurisdiction and custody populations in the Massachusetts Department of Correction increased slightly in the first quarter of 2011 compared with the last three quarters of 2010. The current jurisdiction and custody populations increased by less than one percent from the previous quarter.

### 1.2 Snapshot Totals for MA DOC Jurisdiction Population by Commitment Type

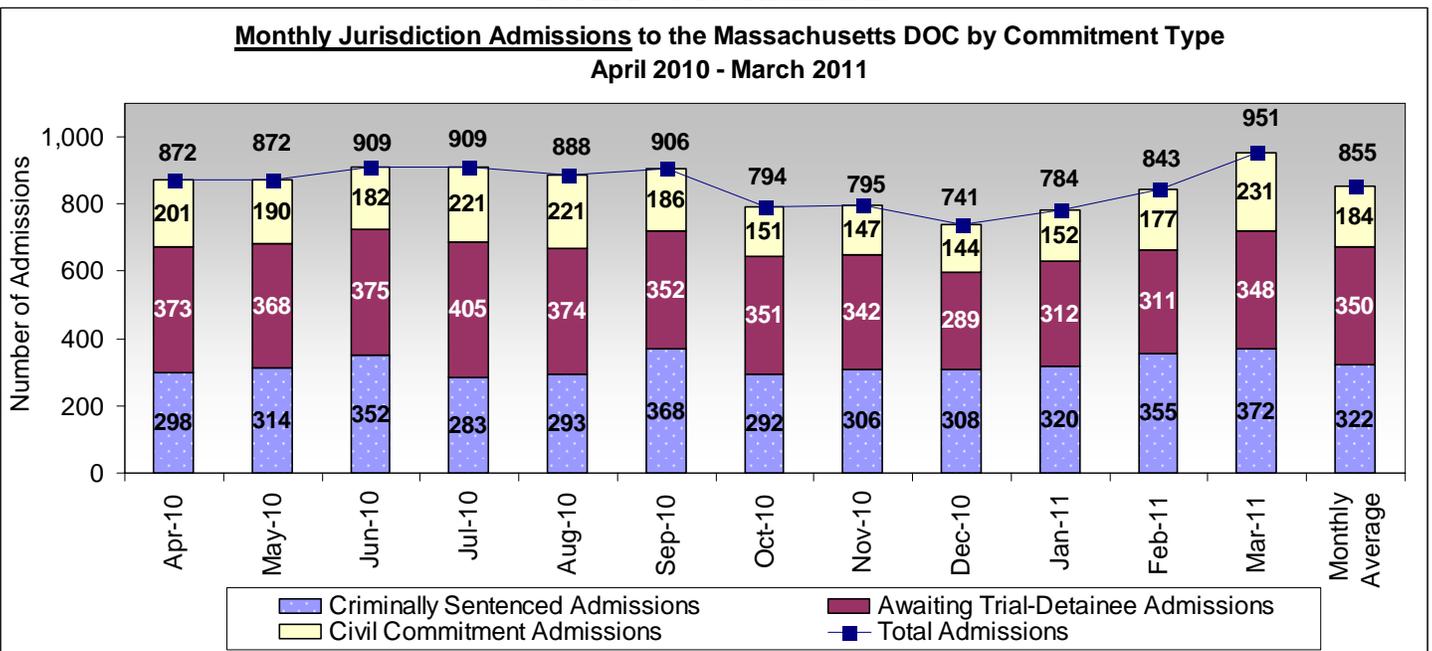

Quarterly snapshot data over the trend period showed fluctuation amongst civil commitments and awaiting trial detainees; however, the most notable change is that the criminally sentenced population has increased two percent over the last three quarters, from 10,194 to 10,430. The first quarter of 2011 reflected the highest total snapshot jurisdiction population over the trend period; between the last two quarters there was an increase in number from 11,381 to 11,633 representing 252 inmates or a 2.2 percent increase.

1.3 MA DOC Total Admissions and Releases by Month

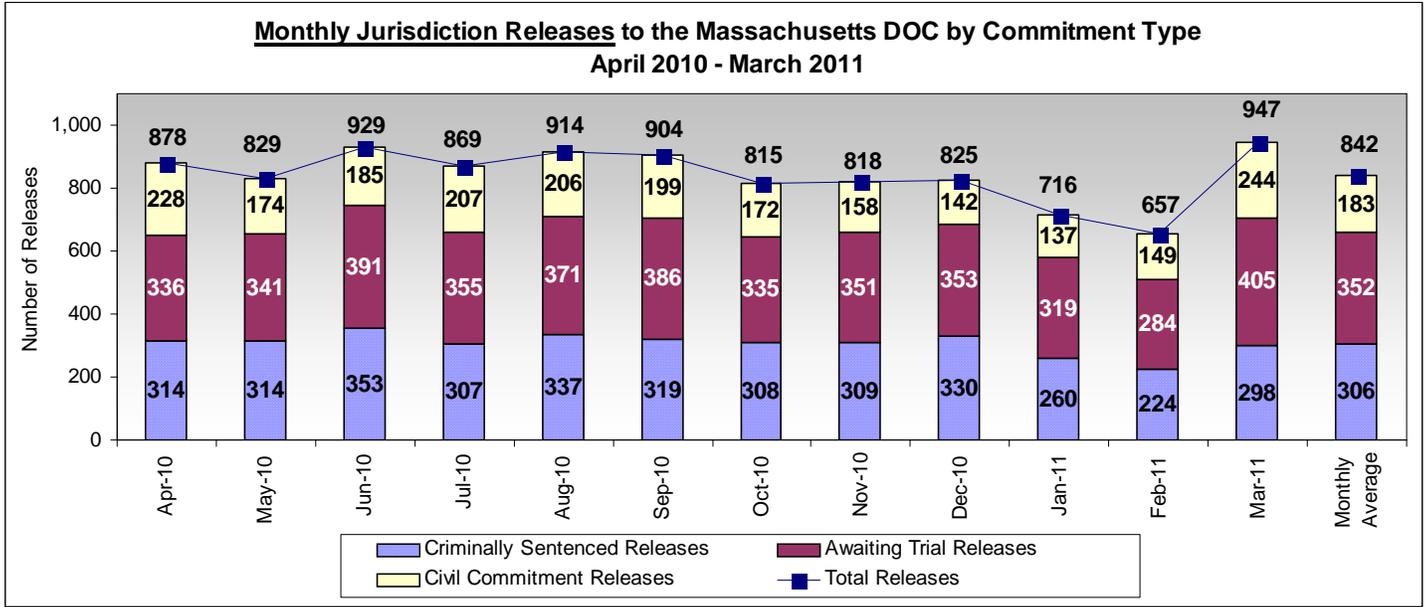

From April 2010 through November 2010, total admissions kept pace with total releases from the MA DOC resulting in a cumulative difference of 11 inmates by the end of November 2010. In December, releases outpaced admissions by 84 inmates and brought the difference to 95 inmates. In January 2011 and February 2011, the trend reversed with admissions outpacing releases, resulting in a cumulative increase of 159 inmates. In March 2011, admissions still slightly outpaced releases, raising the cumulative increase to 163 inmates at the end of the first quarter 2011.

1.4 MA DOC Total Admissions

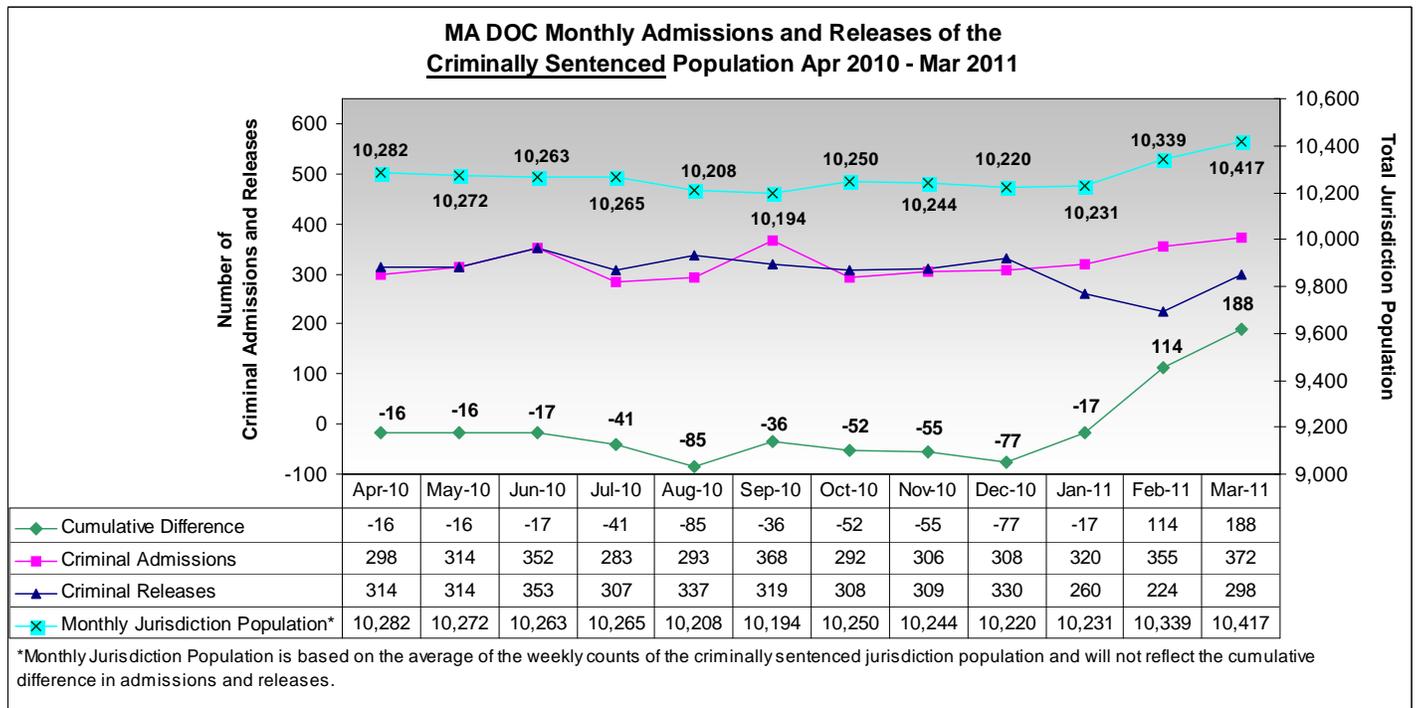

Over the trend period, December 2010 total admissions to MA DOC was driven by lows in awaiting trial and civil commitment admissions to hit a twelve month low of 741 before rising consistently in the first quarter of 2011. In March 2011, admissions hit a twelve month high of 951 to bring the admissions' monthly average up to 855.

1.5 MA DOC Total Releases

Total MA DOC releases for April through December of 2010 averaged 865 before plummeting in January 2011 to 716 and just 657 in February 2011. Total releases rose to a twelve month high of 947 in March, bringing the average monthly releases up to 842 over the trend period. The increase in releases between February and March is attributed to a 64% increase in civil commitment releases, a 43% increase in awaiting trial releases and a 33% increase in criminally sentenced releases.

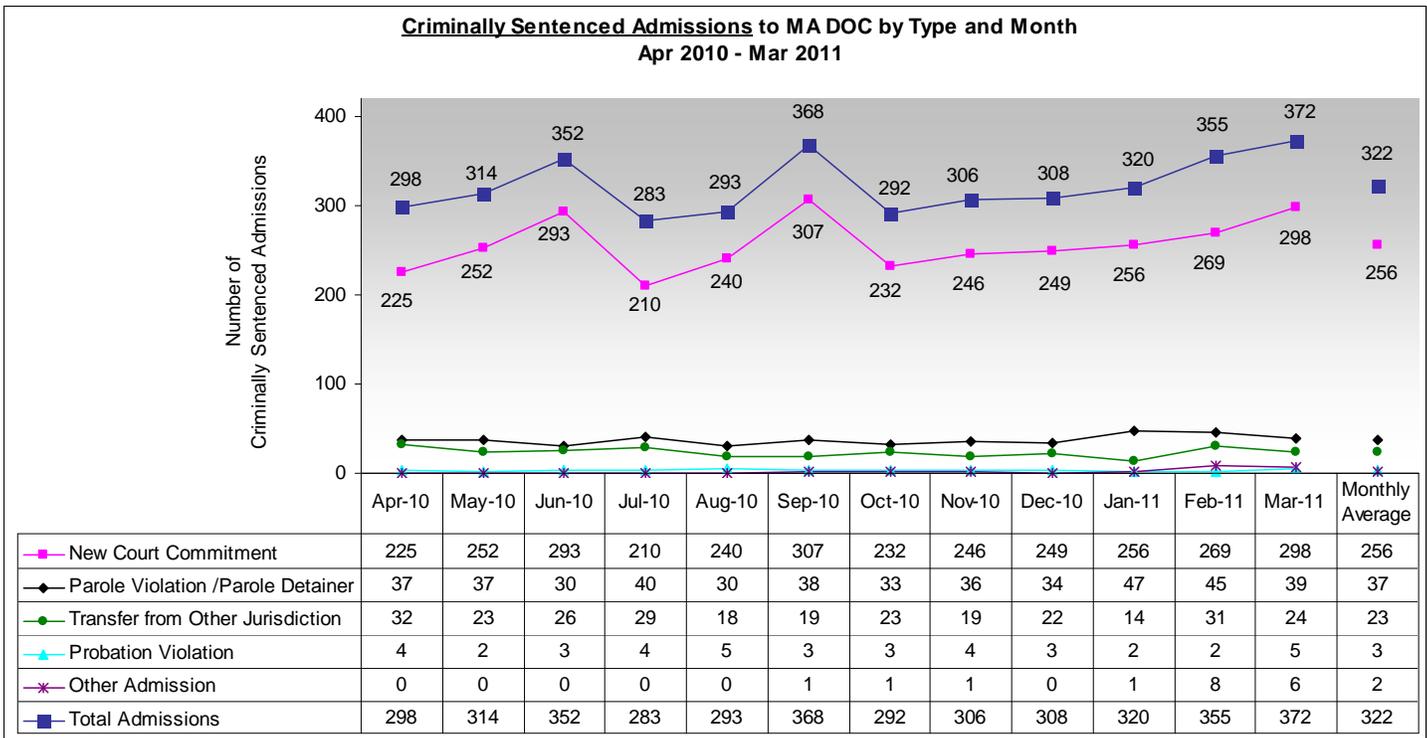

1.6 MA DOC Criminally Sentenced Admissions and Releases by Month

Criminally sentenced releases generally outpaced admissions from April through December of 2010 before the trend reversed in the first quarter of 2011 resulting in a twelve month cumulative increase of 188 inmates. This increase is reflected in the one percent growth in the jurisdiction population over the trend period.

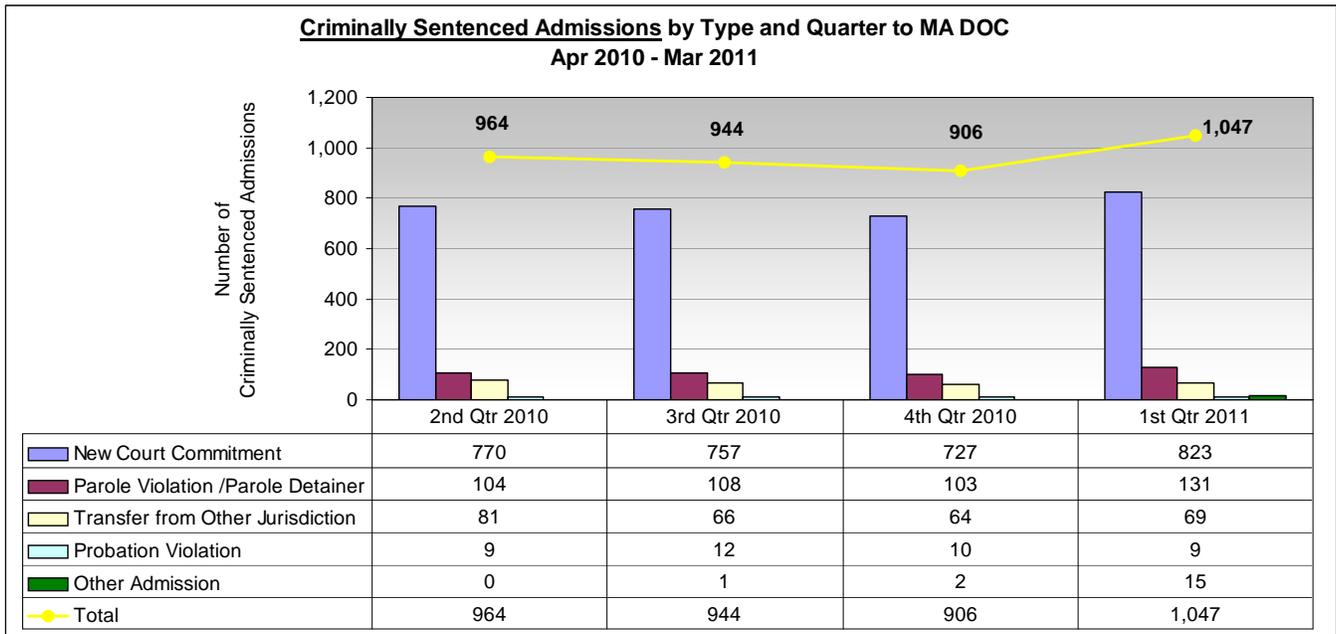

## Section 2. MA DOC Criminally Sentenced Admissions

### 2.1 MA DOC Criminally Sentenced Admissions by Type and Month

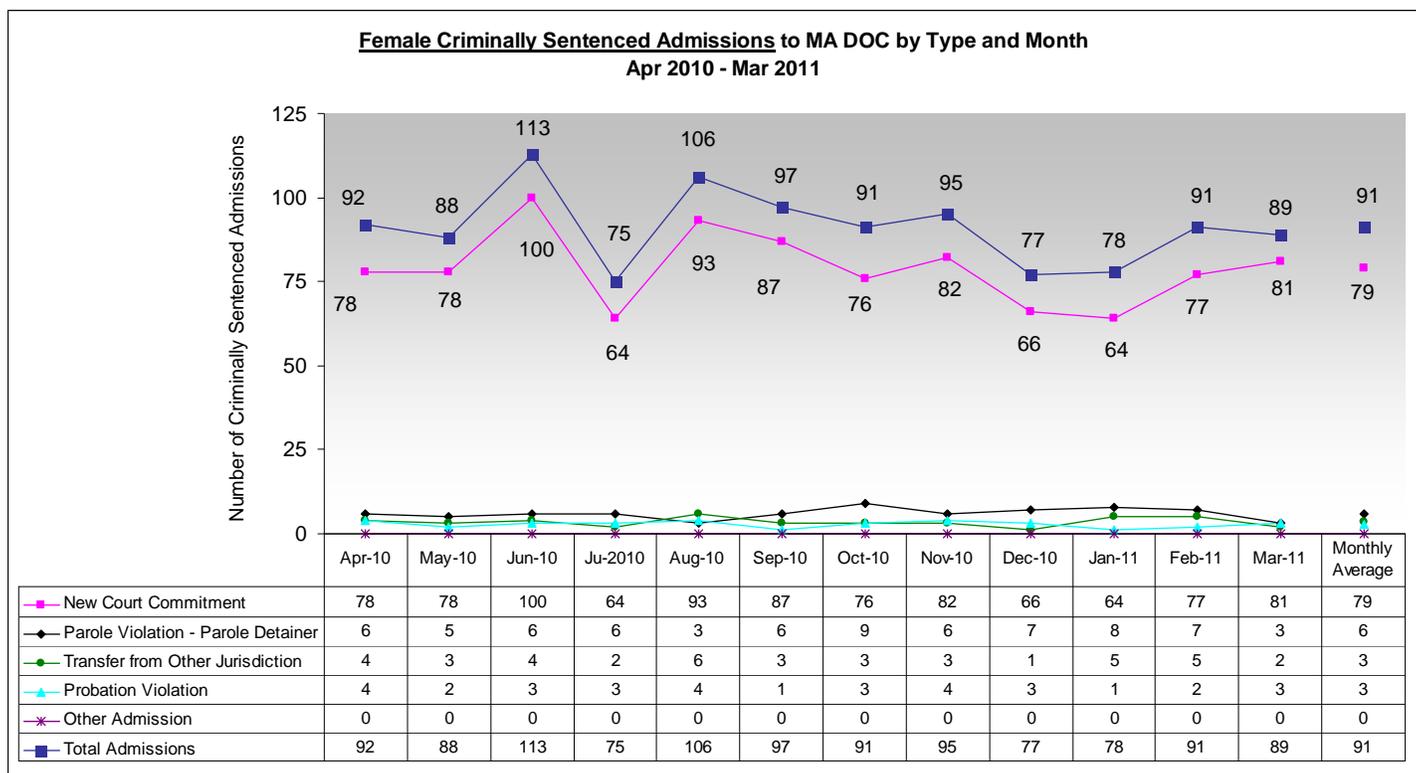

Over the trend period, new court commitments accounted for 80 percent and parole violators/detainees accounted for over 11 percent of the criminally sentenced admissions; criminally sentenced admissions hit a low of 283 in July and a high of 372 in March.

### 2.2 MA DOC Criminally Sentenced Admissions by Type and Quarter

Criminally sentenced admissions had been decreasing for three quarters until the first quarter of 2011 when there was an increase of 16 percent compared to the previous quarter. The total increase between the fourth quarter of 2010 and the first quarter of 2011 was driven by a 13 percent increase in new court commitments and a 27 percent jump in parole violators/detainees.

### 2.3 MA DOC Female Criminally Sentenced Admissions by Type and Month

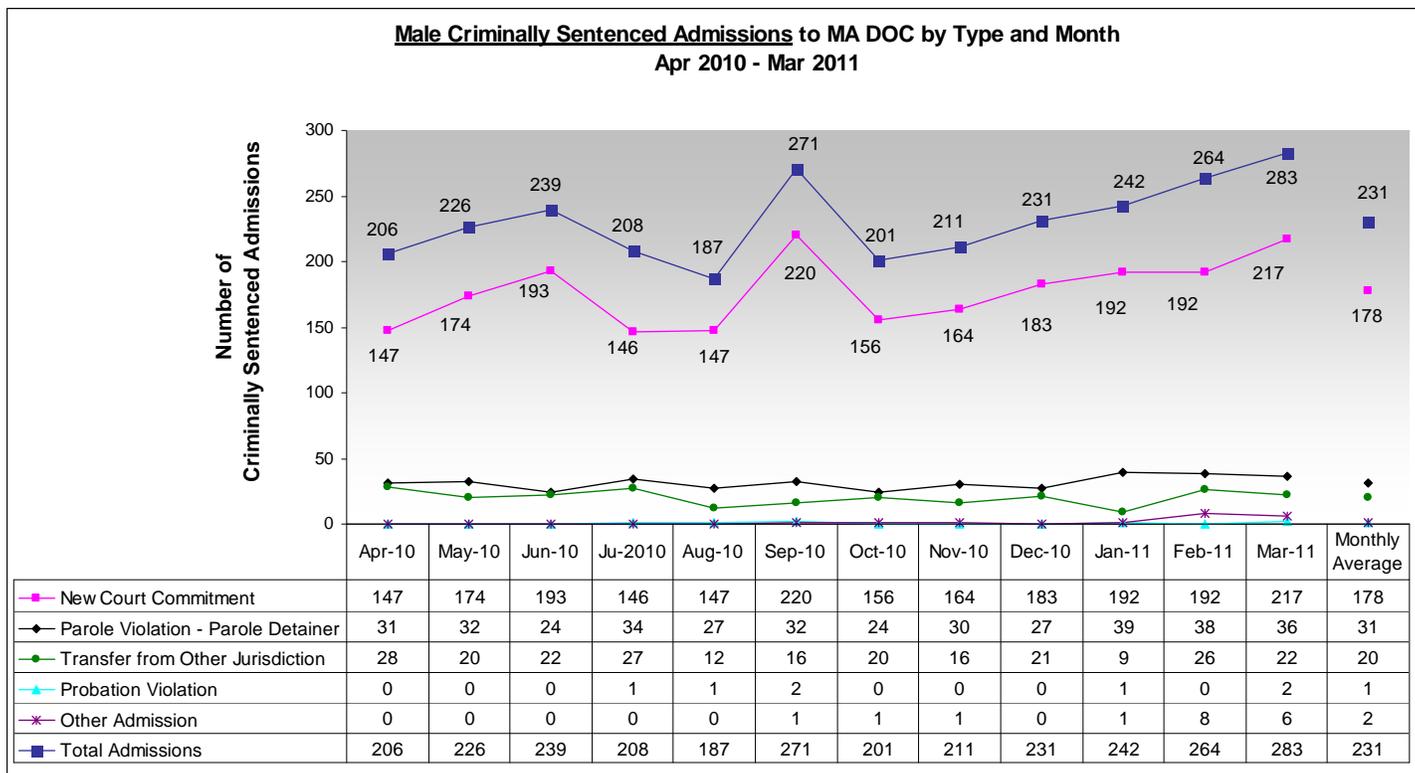

Female criminally sentenced admissions averaged 91 over the trend period with a spike in June of 113 and a low in July of just 75 admissions. New court commitments comprise 87 percent of female admissions over this trend period compared with only 77 percent of male admissions (shown on the following page).

### 2.4 MA DOC Female Criminally Sentenced Admissions by Type and Quarter

2.5 MA DOC Male Criminally Sentenced Admissions by Type and Month

Over the trend period, male criminally sentenced admissions hit a low in August with 187 and hit a high of 283 in March after rising consistently throughout the last quarter of 2010 and the first quarter of 2011. Parole violations made up 14 percent of male admissions over this trend period compared to just 7 percent of female admissions.

### Section 3. MA DOC Criminally Sentenced Releases

#### 3.1 MA DOC Criminally Sentenced Releases by Type and Month

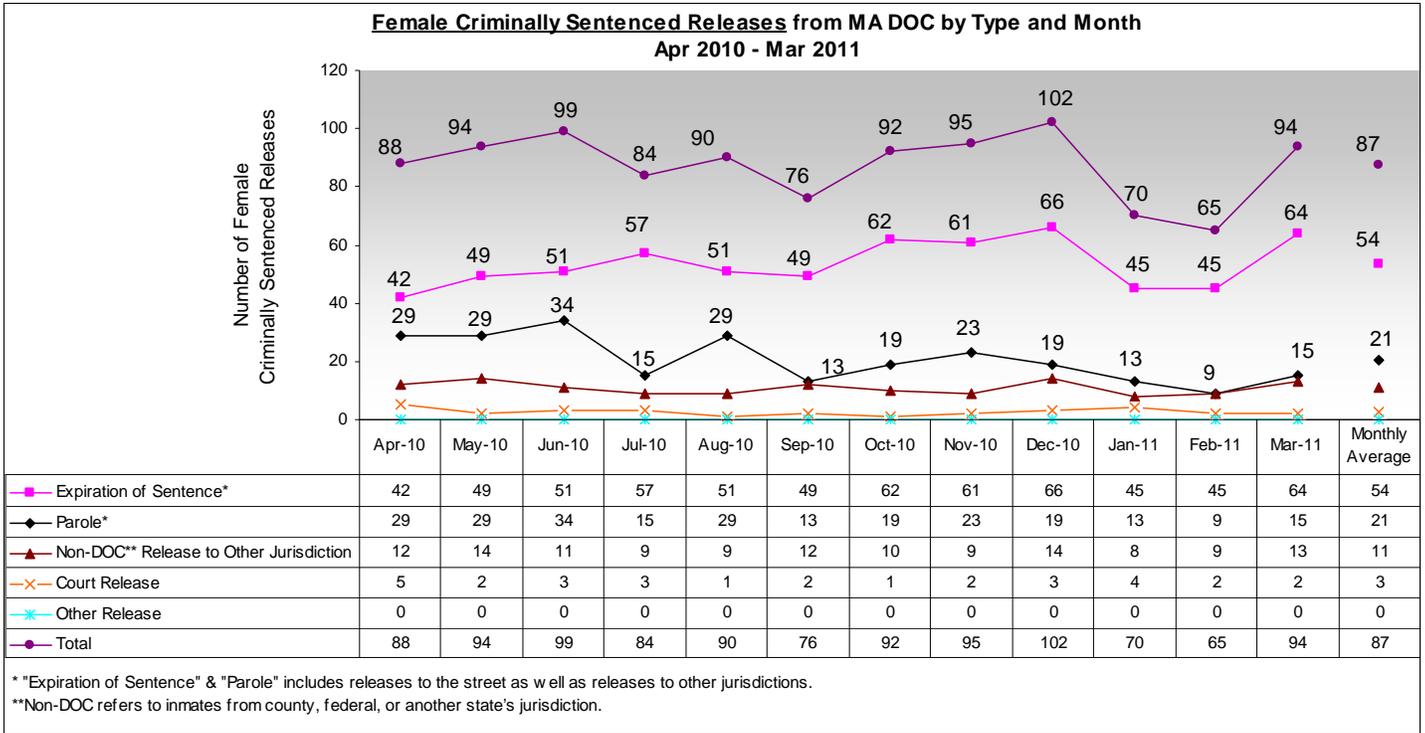

The number of criminally sentenced inmates released to parole has declined over the past four quarters and driven the total number of releases downwards from 981 to 782, a 20 percent decline. Releases to parole experienced a 59 percent decline over the trend period, steadily decreasing in the last three quarters of 2010 from 298 to 234 inmates before plummeting in the first quarter to 123 inmates in the first quarter of 2011.

#### 3.2 MA DOC Criminally Sentenced Releases by Type and Quarter

3.3 MA DOC Female Criminally Sentenced Releases by Type and Month

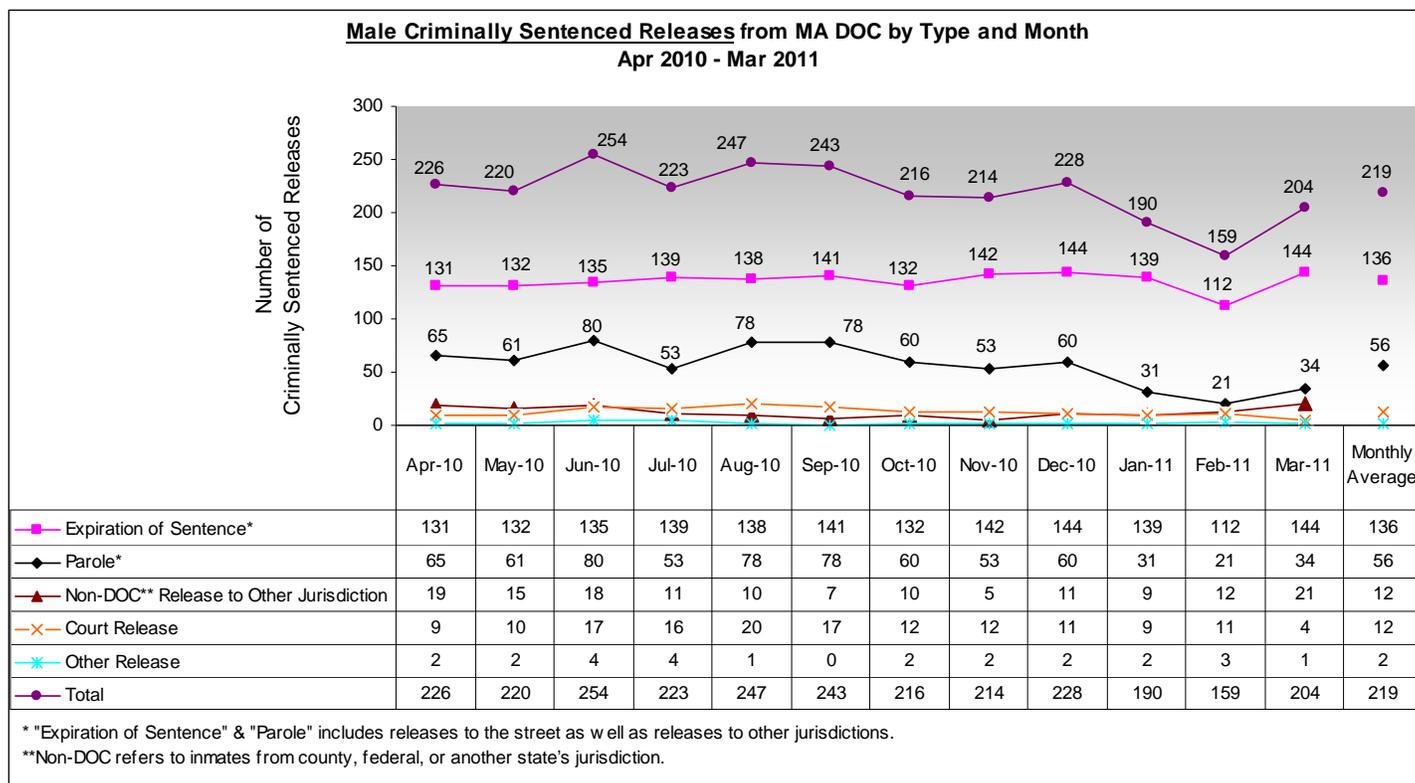

Female criminally sentenced releases averaged 87 per month over the trend period with a spike of 102 releases in the month of December and a low of just 65 releases in February. Sixty-one percent of female criminally sentenced releases were due to an expiration of sentence, 24 percent were released to parole, 12 percent were released to another jurisdiction and about three percent were released by the court.

### 3.5 MA DOC Male Criminally Sentenced Releases by Type and Month

Criminally sentenced male releases averaged 219 per month over the trend period with a high of 254 in June and a low of 159 in February. Sixty-two percent of these releases were due to an expiration of sentence, 26 percent were released to parole, six percent were released to another jurisdiction, six percent were released by court, and about one percent by “other release”.

## Section 4. MA DOC Criminally Sentenced Admission and Release Trends by Gender

### 4.1 MA DOC Female Criminally Sentenced Admissions and Releases

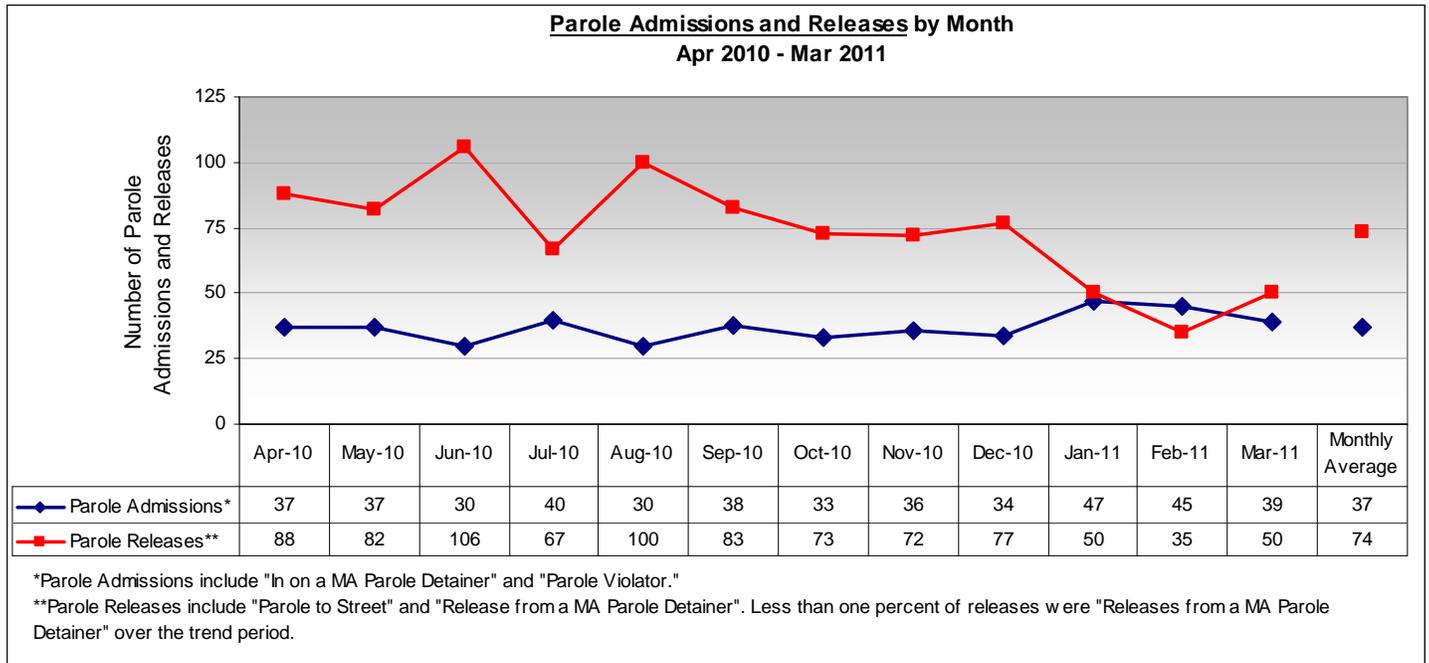

It is interesting to note that criminally sentenced admissions ultimately outpaced releases for both genders over the trend period; females increased by 43 inmates while males increased by 145. The male cumulative increase was driven by the first quarter of 2011 with admissions clearly outpacing releases in January, February and March.

### 4.2 MA DOC Male Criminally Sentenced Admissions and Releases

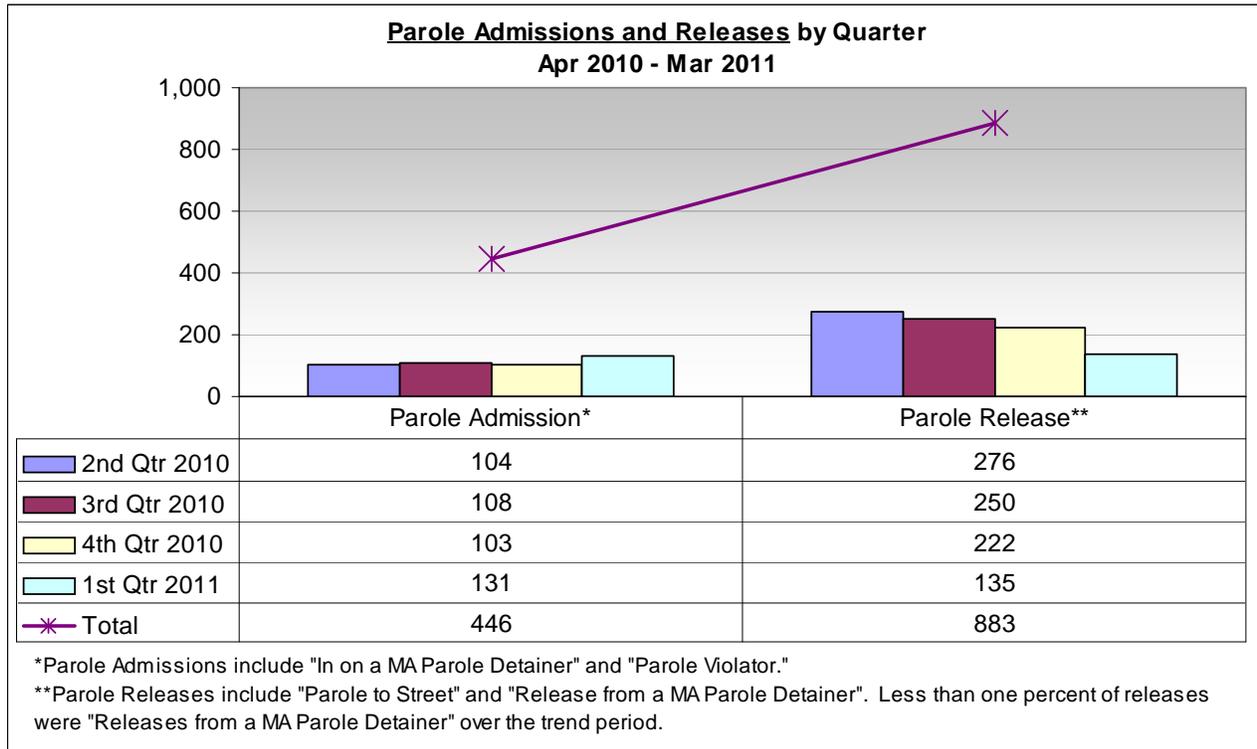

**Section 5. MA DOC Comparison of Parole Admissions and Parole Releases to the Street**

**5.1 MA DOC Parole Admissions and Parole Releases to the Street by Month**

Parole releases consistently and significantly outpaced parole admissions throughout the trend period until January, 2011 when the trend slowed and even reversed for the month of February with parole admissions outnumbering parole releases. Over the trend period, the first quarter of 2011 reflected a spike for parole admissions at 131 and (simultaneously) a low in parole releases at just 135.

Over the trend period, the majority of criminally sentenced inmates in MA DOC (66 percent) were released to the street due to an expiration of sentence; 32 percent of females and 35 percent of males were paroled to the street. Between the fourth quarter of 2010 and the first quarter of 2011, total criminally sentenced releases to the street dropped by 22 percent or by 153 releases; this pattern is evident for both the male and female releases to the street. The overall decrease between the two quarters was driven by a decline in paroles to the street which decreased by 39 percent for females and by 52 percent for males.

### 6.4 MA DOC Total Criminally Sentenced Releases to the Street by Supervision Status and Quarter

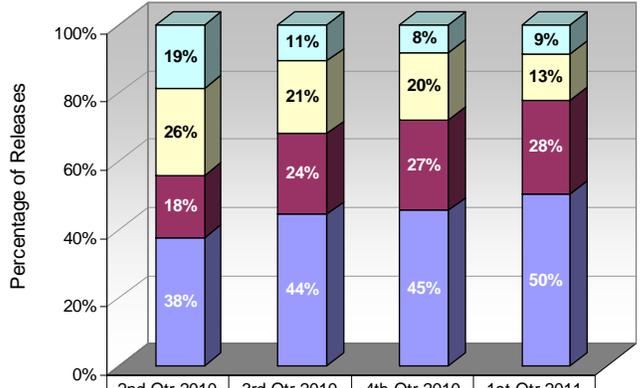

Type of Supervision	Total Criminally Sentenced Releases to the Street by Supervision Apr 2010 - Mar 2011									
	2nd Qtr 2010	% of Releases to Street	3rd Qtr 2010	% of Releases to Street	4th Qtr 2010	% of Releases to Street	1st Qtr 2011	% of Releases to Street	Trend Total	% of Releases to Street

Between fourth quarter 2010 and first quarter 2011, the number of criminally sentenced releases to the street with “No Supervision” actually dropped from 269 to 259 but due to the overall decline in releases and the decline in paroles to the street, releases with “No Supervision” represented half of the releases in first quarter 2011.

**6.5 MA DOC Female Criminally Sentenced Releases to the Street by Supervision Status and Quarter**

Throughout the last three quarters of 2010, releases to parole (only) comprised between 20 and 27 percent of criminally sentenced releases to the street for both genders; notably, in the first quarter of 2011, releases to parole (only) comprised only 13 percent of female releases and just ten percent of male releases.

**Female Criminally Sentenced Releases to the Street from MA DOC by Supervision Status and Quarter Apr 2010 - Mar 2011**

\*All Percentages might not add to 100% due to rounding.

Over the trend period, 60 percent of criminally sentenced releases to the street from MA DOC were released with supervision (56 percent of females and 62 percent of males).

**6.7 MA DOC Criminally Sentenced Releases to the Street by Supervision Status and Gender**

**Male Criminally Sentenced Releases to the Street from MA DOC by Supervision Status Apr 2010 - Mar 2011**

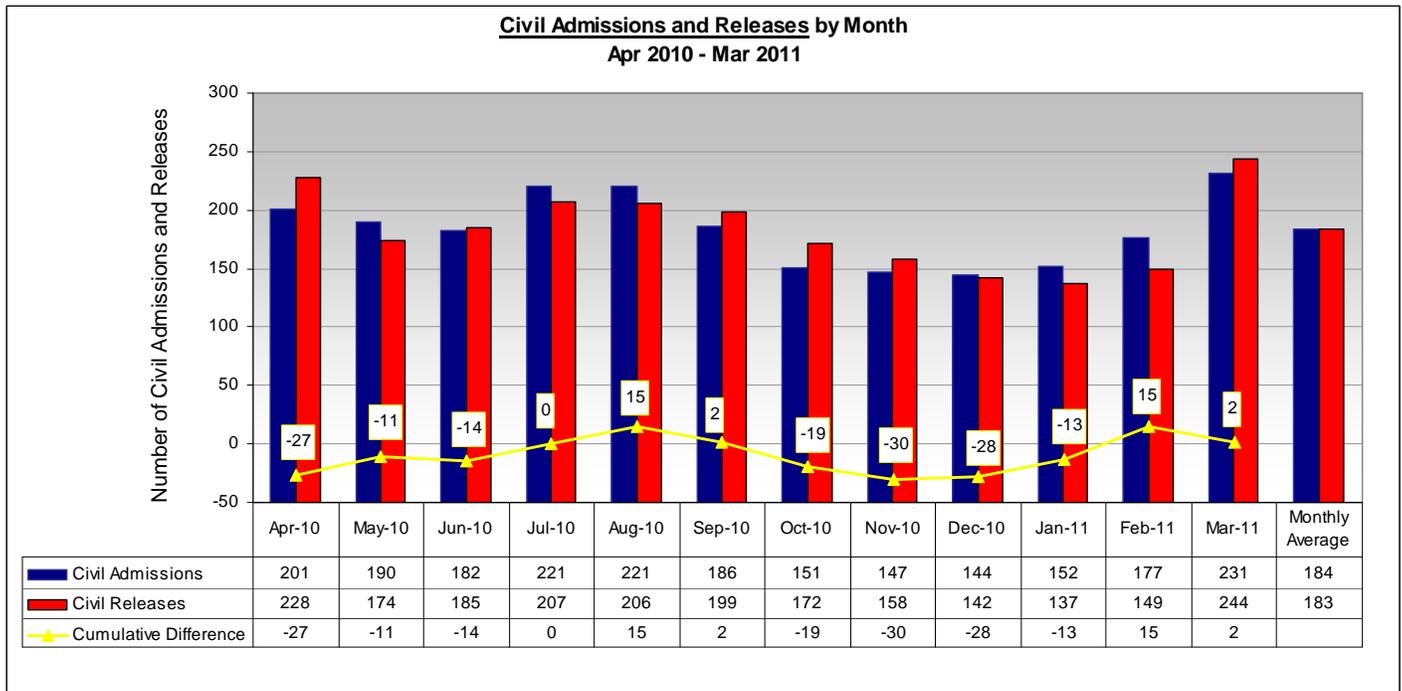

**Female Criminally Sentenced Releases to the Street from MA DOC by Supervision Status Apr 2010 - Mar 2011**

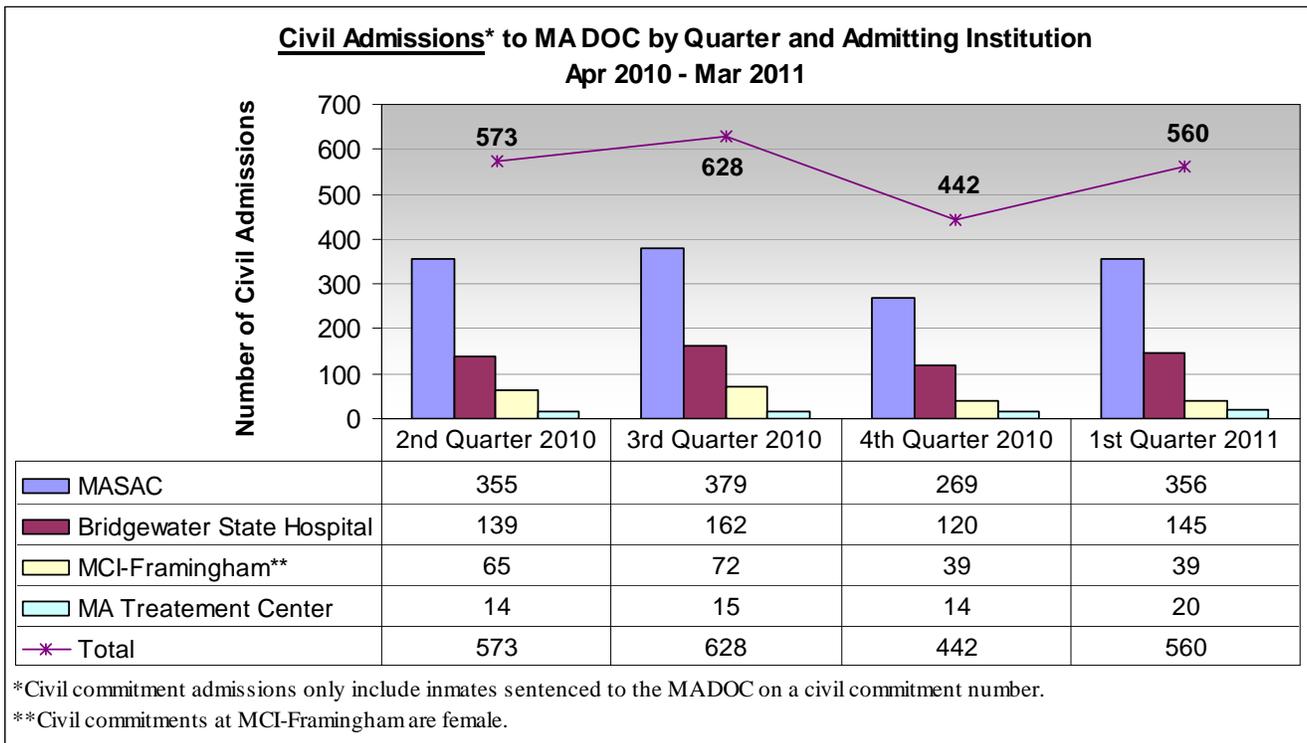

**Section 7. MA DOC Civil Commitment Admissions and Releases**

**7.1 MA DOC Civil Admissions and Releases by Month**

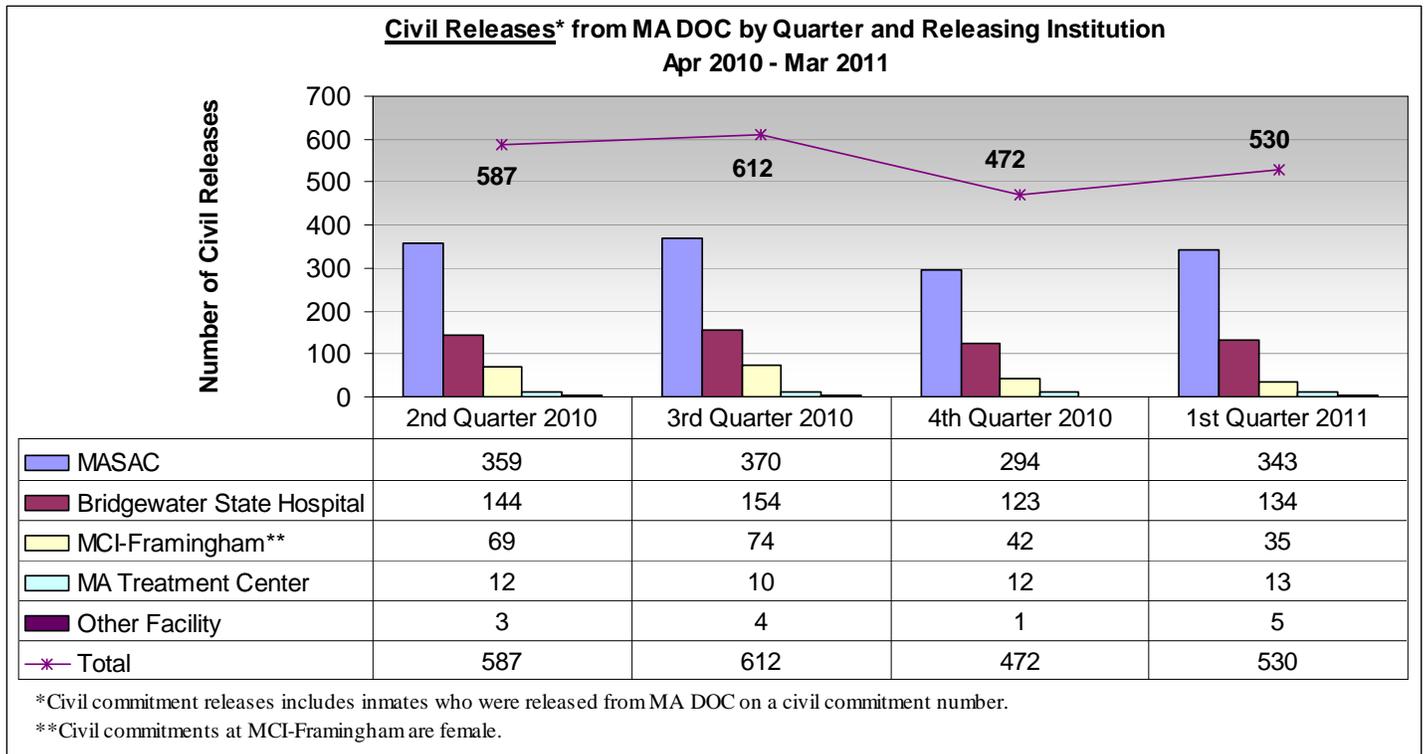

MA DOC civil admissions and releases over the trend period were largely on par with one another and resulted in an overall increase of just two civilly committed inmates. Civil commitment admissions ranged from 144 per month to 231 over the trend period with an average of 184. Civil commitment releases averaged 183 per month and ranged from 137 to 244.

**7.2 MA DOC Civil Admissions by Quarter and Admitting Institution**

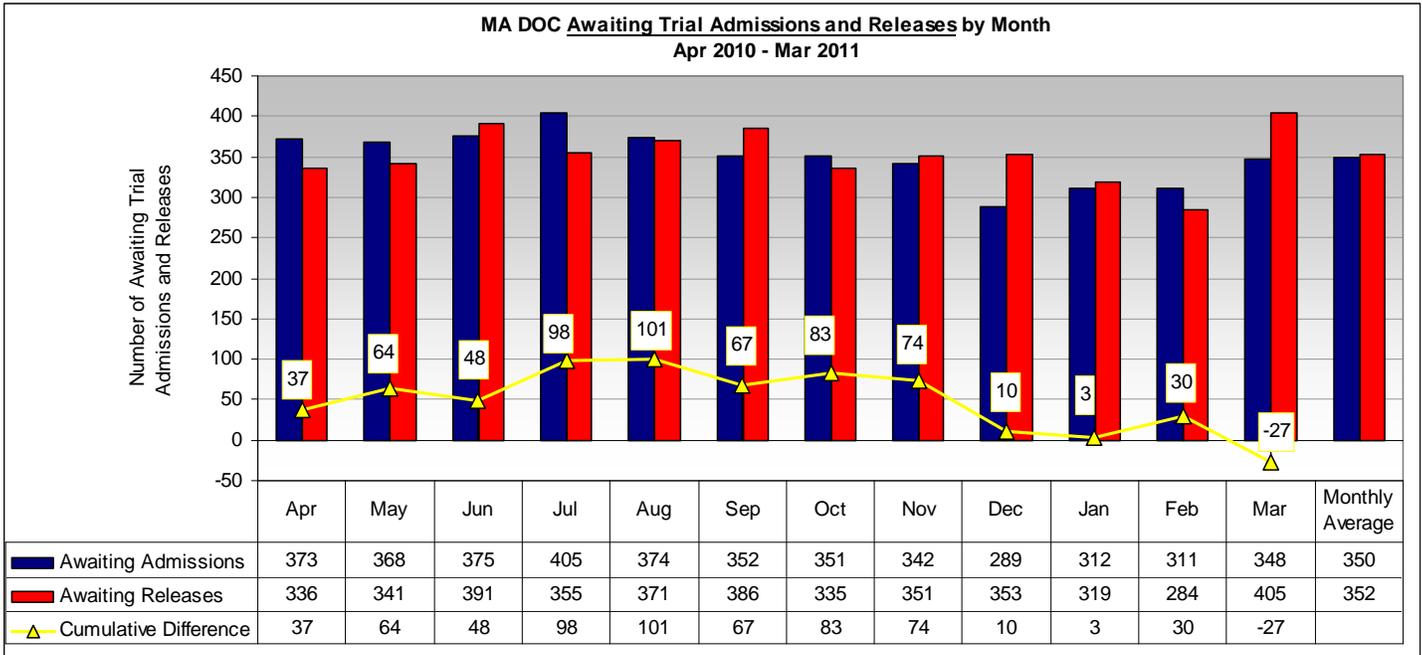

Over the trend period, MASAC (Massachusetts Alcohol and Substance Abuse Center) and Bridgewater State Hospital processed about 87 percent of the civil admissions (1,925 out of 2,203) and civil releases (1,921 out of 2,201); these facilities (as well as MA Treatment Center) exclusively house males. Accordingly, males accounted for 90 percent of civil admissions and releases while females accounted for just ten percent (at MCI-Framingham).

**7.3 MA DOC Civil Releases by Quarter and Releasing Institution**

## Section 8. MA DOC Awaiting Trial Admissions and Releases

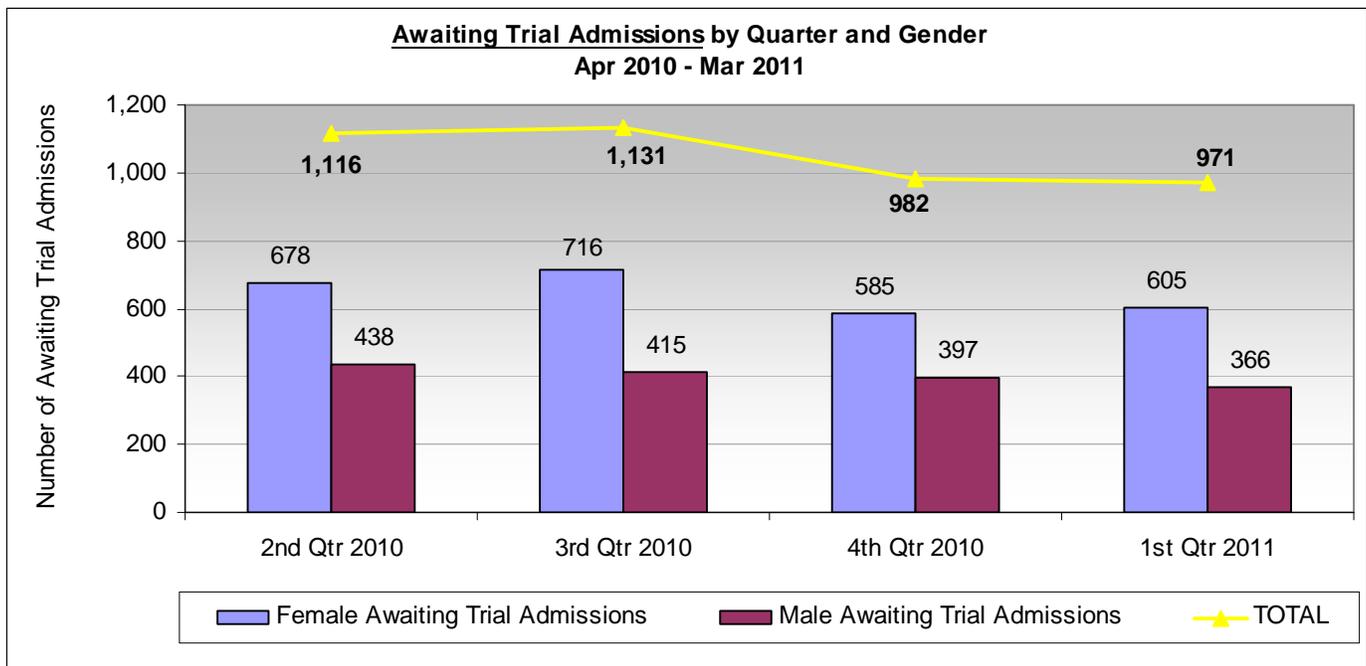

### 8.1 MA DOC Awaiting Trial Admissions and Releases

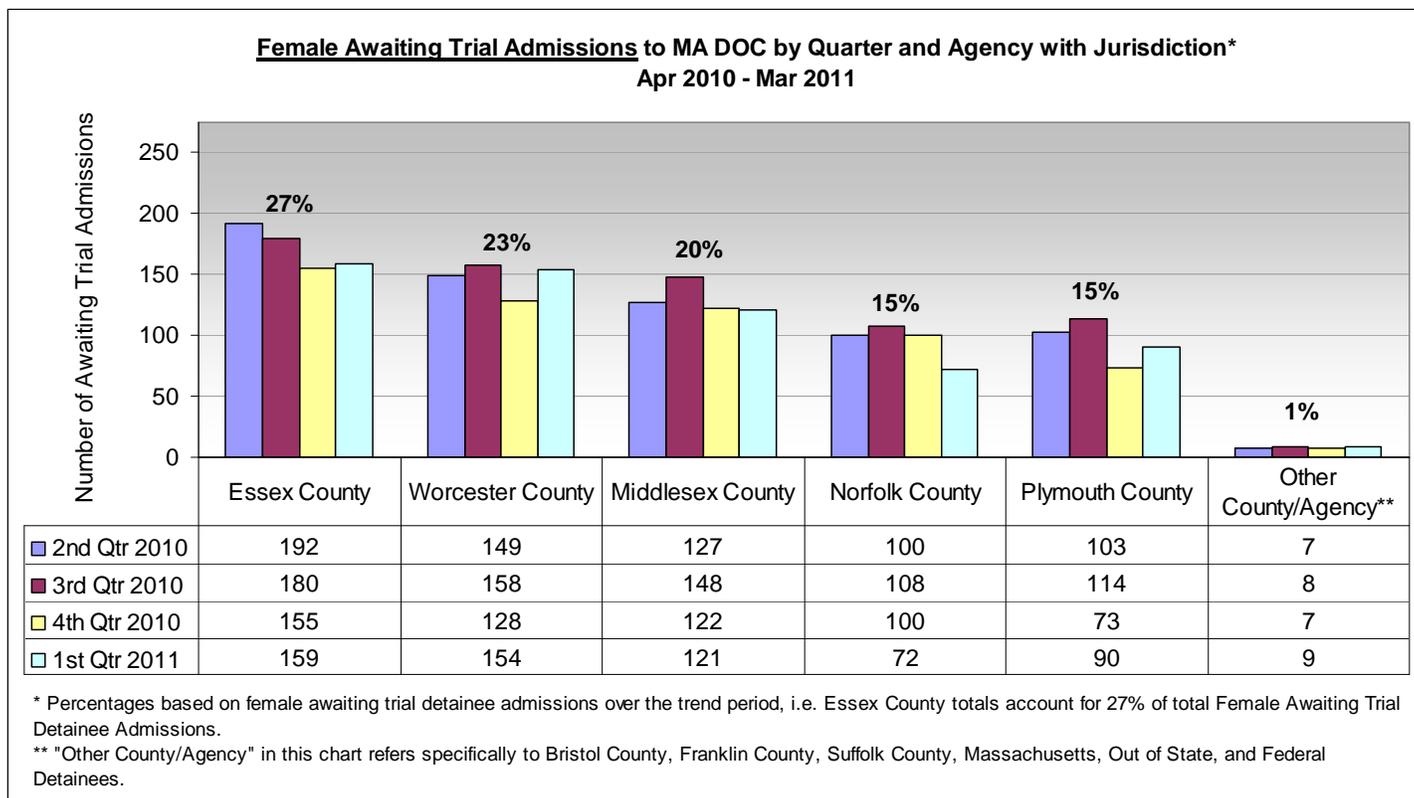

Awaiting trial releases hit a high for the trend period in March of 2011 at 405 releases; this leveled off the cumulative difference and resulted in a difference of 27 detainees over the trend period.

After spiking in the third quarter of 2010, total awaiting trial admissions have declined for the last two quarters by 13 percent and then by one percent. While females comprise the majority of the awaiting trial admissions to MA DOC (about 60 percent), the continued decline was driven by male admissions, dropping from 397 to 366 while female admissions actually rose by 20 detainees between the fourth quarter of 2010 and first quarter of 2011.

### 8.2 MA DOC Awaiting Trial Admissions by Quarter and Gender

## 8.3 MA DOC Female Awaiting Trial Admissions

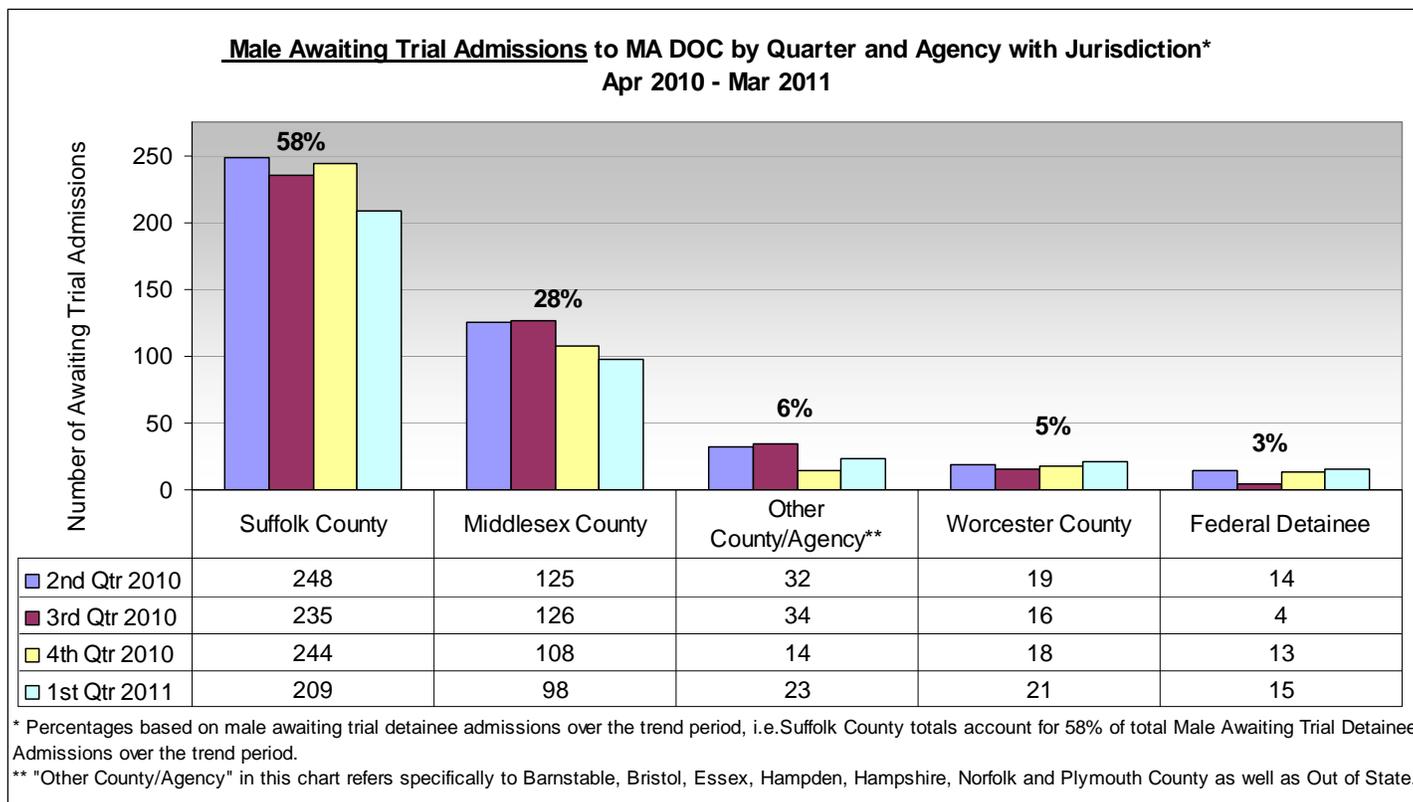

Female awaiting trial detainees come from several counties across Massachusetts, especially those counties with no or limited female beds. Over the trend period, almost 70 percent of MA DOC female awaiting trial admissions consistently came from Essex, Worcester and Middlesex counties. Female awaiting trial admissions spiked in the third quarter of 2010 but have leveled off since then, remaining below the quarterly average of 646 for the trend period at just 605 admissions for the first quarter of 2011.

### 8.8 MA DOC Female Awaiting Trial Admissions and Releases by Quarter

The majority of awaiting trial releases from MA DOC were “Court Releases”, accounting for 98 percent of female and 73 percent of male releases. Twenty- three percent of male detainees were released by a “Transfer to Other Jurisdiction” compared to just two percent of female detainees. The remaining five percent of male awaiting trial releases were a “Release from MA Parole Detainer”.

Female awaiting trial admissions and releases fluctuated amongst the last four quarters but ultimately resulted in a small cumulative difference of just three detainees. Except in rare cases, MCI-Framingham processes female awaiting trial admissions and releases; the institution was charged with processing a high of 1,429 awaiting trial admissions and releases over the third quarter of 2010, an average of 16 per day.

### 8.9 MA DOC Male Awaiting Trial Admissions and Releases by Quarter

MCI-Concord processes the majority of male awaiting trial admissions and releases; males experienced a high of 854 admissions and releases in the second quarter of 2010, an average of nine per day.

Male awaiting trial admissions were higher than the corresponding releases for the second and third quarters of 2010; this trend reversed for the last two quarters and ultimately resulted in a cumulative difference of 24 detainees over the trend period.
