Introduction

The population movement report is one of seven annual statistical reports regularly produced by the Research Unit of the Massachusetts Department of Correction. Each correctional facility of the Department of Correction submits weekly admission and release reports describing in detail each offender move into or out of that facility. This annual movement report is a compilation of all admissions and releases during 1982. It presents information by type of admission and release including; new court commitments, paroles, returns on parole violation, discharges, escapes, deaths, transfers to other correctional facilities both within the state and outside of the state, and trips to hospitals and courts.

This report consists primarily of seventeen tables that describe the various types of movement. The first table summarizes changes in population from December 31, 1981 to December 31, 1982. The next two tables summarize all types of admissions and releases. The remaining fourteen tables consider specific types of moves in detail. Each table is broken down by specific institution or institutional group.

Offenders can be received into an institution in any number of ways. Offenders can be committed by the courts to Walpole, Concord, or Framingham. Only at the time that the offender arrives at that

institution is the commitment registered. During 1982 and for several years previous to that it was often the case that, after sentencing, an offender would be placed at a house of correction while awaiting space at a DOC facility. These offenders are not counted as commitments until they actually arrive at the institution of commitment. Offenders can also arrive from another institution to begin serving a new sentence, having finished a first sentence and started a second or third sentence. These are "from and after", "B" and "C" sentences. Generally an offender would be paroled or discharged from the initial sentence and then committed on a second sentence.

Offenders can be admitted in ways that are not directly related to beginning of a new sentence. Offenders who have violated some condition of their parole can be returned as a parole violator to continue serving the sentence on which they were released. Offenders can also be returned from outside releases of short duration such as, trips to courts or hospitals or be returned from escape. Additionally, offenders can be transferred from other correctional authorities including houses of correction (which are county facilities), federal prison authorities, out-of-state prison authorities, or sheriffs.

Offenders can be released by the authority of the Parole Board, by receiving a good conduct discharge, by serving the maximum term of their sentence, or by the courts changing their sentence. Such paroles and releases can be sent to the community, to another prison authority, or to another sentence. Offenders also can be released on a short term basis to hospitals or courts. Moreover, offenders are classified as released if they die during their incarceration or escape from confinement.

The most numerous type of movement is a transfer from one facility within the department to another. Because the department maintains facilities of different security levels, it is quite common for an offender initially to be placed in one facility--the commitment institution--and then to be placed into a number of lower security facilities in the process of serving his/her prison sentence. Such inter-institutional transfers are generally from a higher security setting to a lower security setting, but occasionally transfers are made from lower to higher security. One institution records an admission and another institution records a release each time a movement of this type occurs.

When considering numbers of admissions and releases, this report does more than tabulate the number of offenders admitted from the courts and released by parole or the termination of their sentences. This report includes information on all types of admissions to and releases from all of the institutions in the department and, as such, is a valuable statistical description of the flow of offenders through the correctional system of Massachusetts.

Highlights of 1982 Movements

In this section some of the more important characteristics of population movements during 1982 will be discussed. More complete information can be found by consulting the individual tables. In reading the tables in this report, the reader should note that: (1) the top number in each cell in the body of a table represents the number of moves which are characterized by the corresponding row and column cate-

gories of that table; and (2) the bottom number in parenthesis in each cell represents the percentage of total moves in that column (column percent) corresponding to the row category. The percents sum down the column to total 100 percent. For example, in Table 2 of the text, 721 of the admissions to Walpole are court commitments which comprise 42 percent of the total admissions to Walpole during 1982. All tables in the text should be read as reporting the admissions, releases, transfers, and returns to or from the institutions identified across the top of the tables. Reading the numbers and percentages in this way is consistent with the document's interpretation of the movement information.

Population Changes. At the beginning of 1982 the population of all Massachusetts Department of Correction facilities was 3777; at the end of 1982 the population was 4431.¹ This represents an increase of 654 individuals or 17 percent during a single year and represents an increase of 37 percent over the population at the beginning of 1981. Table 1 summarizes all movements of offenders adjusted for Bridgewater State Hospital moves. This table indicates that the population increase during 1982 is due in large part to the disproportionate increase in admissions over releases.

Admissions. There was a total of 11,356 admission movements of all types into institutions during 1982, excluding 7 admissions to Bridgewater

¹The figures 3777 and 4431 do not include individuals sentenced to the Department and awaiting placement at the time the count was made, women awaiting trial at MCI-Framingham, or any transfers into or out of Bridgewater State Hospital.

State Hospital. This represents a 22 percent increase over the number of such movements in 1981. The number of returns on parole violations in 1982 was 425, a 20 percent increase over the previous year. There were 8,264 transfers--adjusted for Bridgewater transfers--among Department of Correction facilities, a 24 percent increase from the previous year. There was a 17 percent increase in the number of new court commitments from 1,678 in 1981 to 1,968 in 1982. The court commitments do not include eight individuals awaiting placement in a DOC facility nor offenders re-admitted on a "from and after" sentence. The number of individuals received on a from and after sentence increased from 18 in 1981 to 39 in 1982. There was an 18 percent increase in the number of returns from escape as compared to the previous year, with 213 returns from escape in 1981 and 251 in 1982.

Releases. There were 10,702 movements out of institutions during 1982, a 23 percent increase from the previous year. Much of the increase in releases can be attributed to inter-institutional transfers, which increased 23 percent in one year. Paroles to the street in 1982 increased by 16 percent over the number of paroles in 1981--an actual increase of 132 releases of this type. The number of transfers to houses of correction remained about the same (60 in 1981 and 79 in 1982). There were 9 deaths in Department of Correction facilities during the year. There were two deaths by homicide, two by suicide, and five by natural causes. There was a 15 percent increase in the number of escapes from the previous year, with 239 during 1981 compared to 275 in 1982.

Court Commitments. There were 1,968 new court commitments during 1982, a 17 percent increase over 1981: Walpole commitments increased by 8 percent, Concord commitments increased by 9 percent, and Framingham commitments increased by 50 percent from 1981. The total court commitments for 1982 equal the sum of the 1,968 "new" court commitments plus the 39 "from and after" sentences of inmates already under the authority of DOC, which amounts to 2,007 total court commitments.

Institutional Transfers. There was a large increase in inter-institutional transfers from 1981 to 1982.² Two institutions, Walpole and Concord, accounted for almost half (48 percent) of the transfers sent out. Concord and Norfolk were the largest receivers of institutional transfers. Most of the transfers released from medium security institutions such as Norfolk, Gardner and SECC were sent to lower security institutions. With the exception of transfers to Bridgewater and Lemuel Shattuck, 62 percent, 74 percent, and 54 percent of the releases from Norfolk, Gardner and SECC, respectively, went to minimum security or pre-release facilities in 1982. Two-thirds (66 percent) of Bay State releases and 59 percent of NECC releases went to pre-release facilities; both Bay State and NECC are minimum security institutions. While a relatively high proportion of releases from pre-release centers were moves to other pre-release facilities (44 percent), more

²Most of the statistics referred to in this section can be found in Tables 5 through 9. Unless otherwise stated, the discussion of the security level of institutional moves excludes releases to and admissions from Lemuel Shattuck Hospital and Bridgewater State Hospital.

than half of the admissions to pre-release centers (52 percent) came from walled institutions, including Walpole, Concord and Framingham.

Hospital Transfers. Offenders needing hospital care can be treated at Lemuel Shattuck, a Department of Correction hospital, or other community hospitals. During 1982 there were 389 transfers to Lemuel Shattuck Hospital from Department of Correction facilities (MCI's) and 395 returns from Lemuel Shattuck to state correctional institutions.

There were 106 releases to non-Department of Correction Hospitals. Framingham Union Hospital received almost a fourth of the releases in 1982. Moreover, there were 103 returns to correctional institutions from outside hospitals. Framingham Union, Massachusetts General and Peter Bent Brigham sent the most returns.

Transfers to Houses of Correction. Four types of movements between county houses of correction and state facilities are presented in the tables of this report. The first is a Department of Correction inmate transferring to a county institution. There were 79 such transfers in 1982. The Lawrence House of Correction received the largest number of transfers (18) during 1982. The second type is a Department of Correction inmate returning from a county facility. There were 33 such returns in 1982. About a third of the returns (11) were sent back to Concord. The third type of move is a county inmate transferring to a Department of Correction facility. There were 36 such admissions in 1982, an increase from 22 in 1981. The fourth type of move is the release of

Department of Correction inmates to a county facility on a from and after sentence. There were 24 such releases in 1982 which showed little change from 1981. Most of the releases went to Suffolk County facilities, either Deer Island or the Charles Street Jail (9 moves altogether).

Movements to Other States. There were 82 transfers from Department of Correction facilities to prisons in other states. This includes 64 Department of Correction inmates and 18 non-Department of Correction inmates transferred. Most of these offenders (79 percent) were transferred from Norfolk, Walpole and Concord. More than three-fourths of these offenders (77 percent) were transferred to other New England States. There were 88 returns from other states during 1982. This included 56 Department of Correction offenders and 32 non-Department of Correction offenders being admitted from an out-of-state prison. Most of these offenders were admitted from other New England states (78 percent) to Norfolk, Walpole or Concord (80 percent).
