PUBLICATION: # 15,457-54pp-250cps-05/11/88
APPROVED BY: Ric Murphy State Purchasing Agent

Abstract

This report summarizes the movement of offenders in the custody of the DOC during 1987. While the focus of the analysis is on calendar year 1987, trends in population movement over the period 1982 to 1987 are also discussed, particularly in relation to population growth during the period.

Some of the highlights of the information presented in this report include:

- There were 16,742 admissions and 16,133 releases of all types to DOC facilities during 1987.
- The continued pattern of admissions surpassing releases was related to population growth in the agency.
- The major sources of new offenders entering the DOC include: commitments (N=2,852), parole/probation violators (N=1,001), and county transfers (N=443).
- The major sources of offenders leaving the DOC include: paroles to street (N=1,729), discharges to street (N=1,106), and expirations of sentence to street (N=269).

Introduction

The population movement report is one of the annual statistical reports prepared by the Research Division of the Massachusetts Department of Correction. Each correctional facility of the Department of Correction submits weekly admission and release reports describing each offender's move into or out of that facility. This annual movement report is a compilation of these admissions and releases during 1987. It presents information by type of admission and release including: new court commitments, paroles, returns on parole violation, discharges, escapes, deaths, transfers to other correctional facilities both within the state and outside of the state, and trips to hospitals and courts. The report presents information on some of the recent changes in the patterns of admissions and releases in the Department as well as a detailed description of inmate movement occurring in 1987.

Offenders can be received into the Department in a number of ways. Offenders can be committed by the courts to Cedar Junction, Concord or Framingham. Offenders can also arrive from another institution to begin serving a new sentence, having finished a first sentence and started a second or third sentence. These are "from and after," "B", and "forthwith" sentences. Generally, an offender would be paroled or discharged from the initial sentence and then committed on a second sentence.

The author would like to acknowledge the assistance of Ramon Raagas in the preparation of this report.

Offenders can be admitted in ways that are not directly related to beginning a sentence. Offenders who have violated some condition of their parole can be returned as parole violators to continue serving the sentence on which they were released. Offenders can also be returned from outside releases of short duration such as trips to courts or hospitals, or be returned from escape. Additionally, offenders can be transferred from other correctional authorities including houses of correction, federal prison authorities, or prison authorities of other states.

Offenders can be released by the authority of the Parole Board, by receiving a good conduct discharge, by serving the maximum term of their sentence, or by obtaining a court-revised sentence. Such parolees and releasees can be sent to the community, to another prison authority, or to another sentence. Offenders also can be released on a short term basis to hospitals or courts. Moreover, the death of an offender or an escape from confinement is classified as a release.

The most common type of movement is a transfer from one facility within the Department to another. Because the Department maintains facilities of different security levels, an offender is initially placed in one of three commitment institutions (Cedar Junction, Concord or Framingham) or is transferred from a county facility to the Longwood Treatment Center and then moved to lower security facilities in the process of serving his/her sentence. Such inter-institutional transfers are generally from a higher security setting to a lower security setting, but occasionally transfers are made from lower to higher security. Each time a movement of this type occurs, the institution of destination records an admission and the institution of origin records a release.

When considering numbers of admissions and releases, this report does more than tabulate the number of offenders admitted from the courts and released by parole or the termination of their sentence. This report includes information on all types of admissions to and releases from each of the institutions in the Department

and, as such, is a valuable statistical description of the flow of offenders through the Massachusetts Department of Correction during a given year.

Methodology

In this section some of the technical aspects of the preparation of this report are discussed, including the sample, institutions, and table interpretation.

Sample. This report includes the movement of criminally sentenced individuals in the custody of the Department of Correction. Excluded from the analysis are any individuals civilly committed or on a detention status admitted to or released from the Department. Thus, the movements of women admitted to the Awaiting Trial Unit at Framingham, men admitted from the Charles Street Jail, and individuals admitted on 15-day Parole Board detainers are not included in this report.

Generally the admissions and releases included in this report are associated with the physical movement of inmates from one institution to another or from the community to a correctional facility. In some cases, however, the admissions and releases represent "paper" transactions. For example, an inmate may be discharged from one facility to a "from & after" sentence at a second facility, committed on the "from & after" sentence, and transferred back to the first institution without any accompanying physical movement. Such paper transactions appear as admissions and releases in this report.

The report includes the movement of population to and from courts and community hospitals when such moves result in the inmate being out of the custody of a DOC facility for at least one night. The movement of inmates for court

appearances or to receive medical services not requiring over-night change of custody are not included in this report. Similarly, the movement of inmates to temporary release programs in the community such as furloughs, work-release or education release are not included in the statistics on population movement.

Institutions. The admissions and releases included in this report represent the movement of population into and out of the custody of DOC facilities, including Longwood Treatment Center and contract facilities. The report excludes any population movements at Bridgewater State Hospital, Treatment Center and Addiction Center, except as reported by other DOC facilities.

The movement of an inmate in any other non-DOC correctional facility is not included in this report, even if that inmate was originally sentenced to the Department. Thus, if an inmate were transferred to a county facility and subsequently paroled, the transfer from a DOC facility to the county facility is included as a release from a DOC facility but the subsequent parole from the county facility is not included. Conversely, the movement of inmates not originally sentenced to the DOC but who are admitted to or released from a DOC facility are included in this report.

The intra-institutional movement of inmates is not included in this report with the exception of Hodder Cottage at Framingham. Women transferred from Framingham to Hodder Cottage are included as inter-institutional transfers in this report. MHHI includes five separate facilities. Transfers from one MHHI facility to another are presented as inter-institutional transfers.

Lemuel Shattuck is a secure medical facility that serves many correctional facilities, including county facilities. Sentenced county inmates transferred to Lemuel Shattuck are not included in this report, unless they were already serving their sentence in a DOC facility such as the Longwood Treatment Center.

Consistent with other institutions, pre-sentenced or civilly committed individuals are also not included in the reports of population movement.

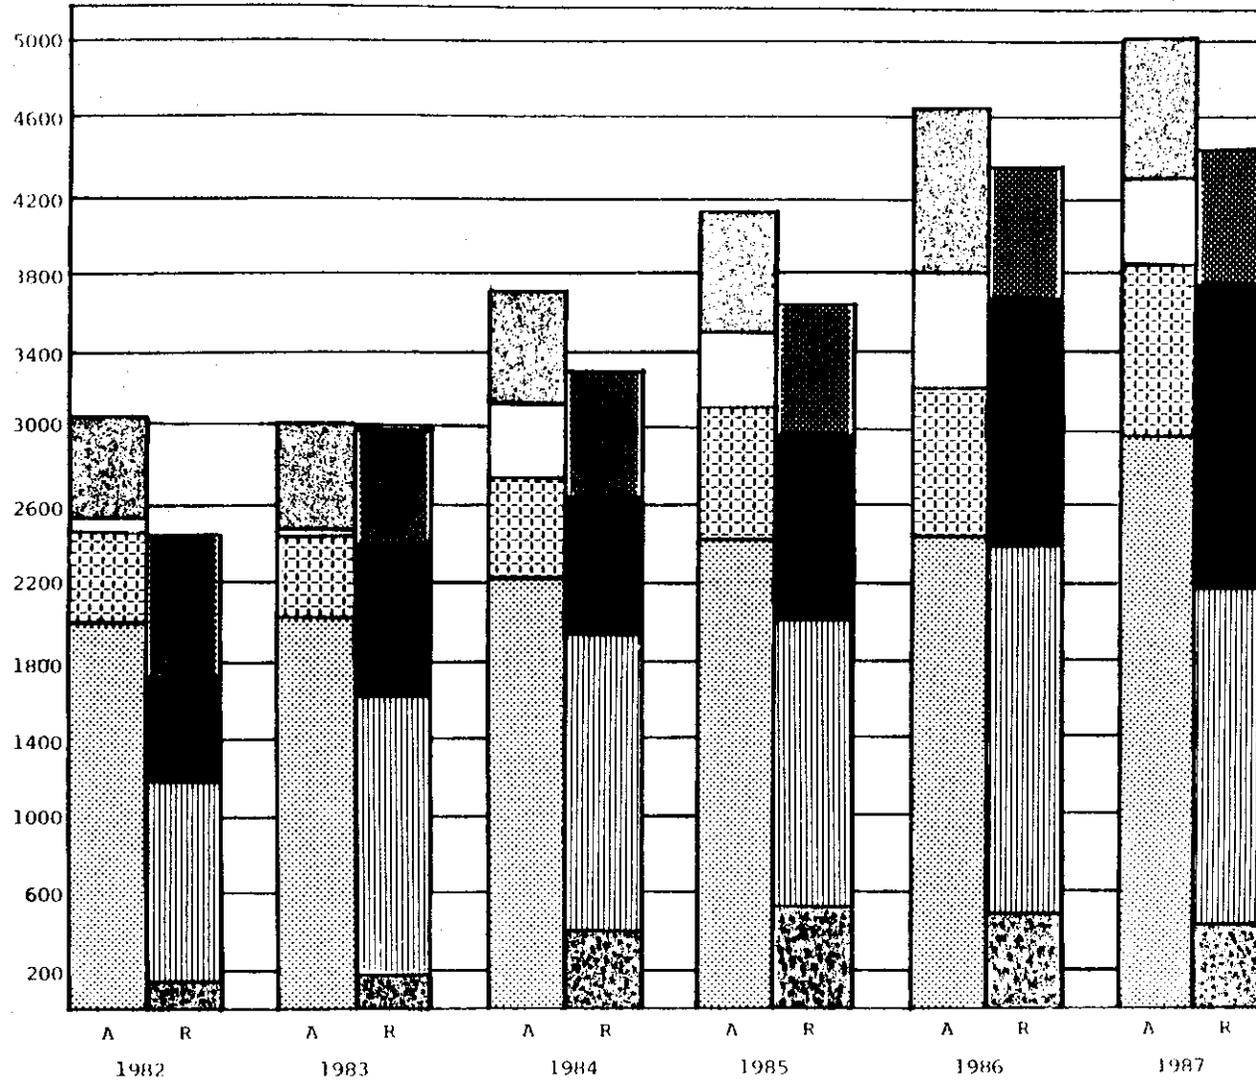

Table Interpretation. In reading the tables in this report, the reader should note that: (1) the top number in each cell in the body of a table represents the number of moves which are characterized by the corresponding row and column categories of that table; and (2) the bottom number in parentheses in each cell represents the percentage of total moves in that column (column percent) corresponding to the row category. The percentages sum down the column to total 100 percent. For example, Table 3 indicates that court commitments comprise 1,232 admissions or 56 percent of the total admissions to Cedar Junction during 1987. All tables in the text should be read as reporting the admissions, releases, transfers and returns to or from the institutions identified across the top of the tables. Reading the numbers and percentages in this way is consistent with the document's discussion of the movement information.

Population Movements 1982 to 1987: **Trends and Population Growth**

The period 1982 to 1987 was one of large increases in the correctional population, from 3,690 at the beginning of 1982 to 6,267 at the beginning of 1988. This represents an increase of 2,577 inmates or 70 percent over this period. As shown in Figure 1, in each year during this period the number of admissions to the Department was greater than the number of releases, resulting in continued population increases.

Fig. 1

Admissions and Releases to the Department of Correction
1982 to 1987

Legend:

Admissions (A)

-  = Court Commitments/From & After/"B" Sentence
-  = Parole/Probation Violators

-  = Returns from Temporary Release

Releases (R)

-  = Transfers to Other Jurisdictions
-  = Paroles
-  = Discharges/Expirations
-  = Other Releases

*Note:

Inter-Institutional Transfers are not included in

As shown in Table 1, there are three categories of admissions that increased substantially over the period: court commitments, parole/probation violators, and county inmates transferring to the DOC. Court commitments increased from 1,968 in 1982 to 2,810 in 1987, an increase of 43 percent (N=842) over the period. Parole/probation violators increased from 425 in 1982 to 1,001 in 1987, an increase of 136 percent (N=576) over the period. The number of county inmates transferring to DOC facilities was relatively low in 1982 (N=36) and 1983 (N=15), and increased substantially during the next four years to a level of 443 in 1987. In 1984 most of these cases were men transferred to Concord to serve their county sentences at a DOC facility. Since 1985, most of these cases represent county inmates transferring to Longwood Treatment Center to receive specialized alcohol treatment services. While the number of inmates transferring to other DOC facilities increased, these admissions do not impact the growth of population; rather they reflect increases in the number of offenders served by the Department annually.

Several types of releases increased over the period: paroles, discharges, and transfers to houses of correction. The increase in paroles and discharges is related to similar growth in admissions to the Department. Paroles increased from 957 in 1982 to 1,729 in 1987, an increase of 81 percent (N=772). Discharges increased from 258 in 1982 to 1,106 in 1987, over a threefold increase in this release category. Transfers to houses of correction increased from 79 in 1982 to 374 in 1987, following a similar pattern as admissions from those facilities.

Table 1

Admissions and Releases to

Population Movements in 1987:
A Statistical Description

This section presents a more detailed analysis of the 32,875 admissions and releases that occurred during 1987. These admissions and releases involved 8,436 individuals. In some cases movement patterns are discussed in terms of the number of individual offenders involved in the particular movement pattern as well as the total number of admissions and releases. More complete information can be found by consulting the statistical tables that follow this section.

Admissions. There were a total of 16,742 admissions of all types into DOC institutions during 1987 involving 7,407 individual inmates. Table 2 shows admission categories and the number of individuals associated with each category.

There were 2,852 admissions of inmates beginning new sentences, including 2,810 new court commitments and 42 from & after sentences. Additionally, in 2 cases inmates were released from an A sentence to a B sentence.

There were 1,001 cases where inmates were re-admitted on a sentence as a result of violating their parole or probation. There were 984 admissions on parole violations and 17 admissions on probation violations during 1987.

There were 443 admissions of county inmates into DOC facilities, 27 admissions of out-of-state inmates into DOC facilities, and 27 admissions from federal facilities during the year. There were 157 admissions of DOC inmates returning from county facilities, and 76 admissions of DOC inmates returning from out-of-state facilities.

A number of admissions resulted from temporary releases from custody including returns from court (N=74), returns from community hospitals (N=128), and

Table 2

Admissions and Releases to the

Death	15	15
Sub-Total Releases	16,133	7,848
Total	32,875	8,436

returns from escape (N=249).

Releases. There were 16,133 releases of all types from DOC facilities during 1987. These releases involved 7,848 individual inmates.

There were 1,793 paroles of all types during 1987 including: 1,729 paroles to the street, 10 paroles to the custody of another state, 5 paroles to federal authorities, 8 paroles to immigration authorities, 19 paroles to from and after sentences at county facilities in Massachusetts, 2 paroles to outstanding warrants, and 20 paroles to from and after sentences in DOC facilities.

There were 1,175 discharges of all types during 1987 including: 1,106 discharges to the street, 3 discharges to the custody of another state, 3 discharges to a federal authority, 3 discharges to immigration authorities, 2 discharges from an A sentence to a B sentence, 22 discharges to a from and after sentence at a county facility, 17 discharges to an outstanding warrant, and 19 discharges to a from and after sentence at a DOC facility.

There were 278 releases due to the expiration of sentence during 1987. Expiration of sentence differs only slightly from a discharge, in that good conduct days are not deducted from the sentence length in determining the length of incarceration. The 278 expirations of sentence included 269 expirations to the community and 9 expirations to from and after sentences in the DOC or other correctional facilities.

There were 118 court ordered releases of inmates due to sentences being revoked or vacated, or inmates released to await a new trial. There were also 9 releases by federal authority. There were 153 cases of releases by court of a more temporary nature including 79 releases due to the offender being remanded to court for an appearance, 72 cases where the offender was removed to the court and received a change in sentence, often to a forthwith sentence, and 2 cases in which

the offender was removed to the custody of a sheriff or the U.S. Marshall.

There were 505 transfers to other correctional authorities. This includes 374 transfers to county facilities in Massachusetts, 108 transfers to correctional facilities in other states (including 92 DOC inmates and 16 non-DOC inmates), and 23 transfers to federal correctional authorities.

There were 15 releases due to the death of an inmate during 1987. There were 12 deaths due to natural causes, one homicide, one suicide, and one accidental death during the year. There were 230 escapes from DOC facilities and 135 releases to community hospitals during 1987.

Court Commitments. There were 2,810 new court commitments during 1987, and 42 admissions due to an individual beginning a term & after sentence, for a total of 2,852 court commitments during the year. Table 5 shows the court of commitment for the 2,810 new court commitments that occurred during 1987.

Inter-Institutional Transfers. Tables 6 through 9 display information on inter-institutional transfers. Tables 6 and 7 display each move by the origination/destination facility and the specific institution to or from which the inmate transferred. Tables 8 and 9 display each inter-institutional transfer by the security level of the origination/destination facility and the specific facility to or from which the inmate transferred.

Transfers From. Tables 6 and 8 show inter-institutional transfers by the institution from which the inmate was released. Concord, which acts as the departmental reception and diagnostic center, had the largest number of releases to other DOC facilities and accounted for 33 percent of all such moves (N=3,836). Other DOC facilities that transferred large numbers of inmates to other facilities

include Cedar Junction (N=1,967), Norfolk (N=1,326), NCCI (N=875), SECC (N=781), and Shirley (N=540).

Seventeen percent of all inter-institutional transfers were from the maximum security facility, Cedar Junction. Of these, 94 percent were transferred to medium security facilities and 6 percent were transferred to secure hospitals. There were no transfers from Cedar Junction directly to a lower security facility.

Sixty-two percent of all inter-institutional transfers were from medium security facilities. Ten percent of these were to higher security (Cedar Junction), 48 percent were lateral transfers to other medium security facilities, 36 percent were transfers to lower security facilities, and 6 percent were transfers to secure hospitals.

Seventeen percent of all inter-institutional transfers were from lower security facilities. There were two transfers from a lower security facility to a maximum security facility, fifty-four percent of these transfers were to medium security facilities, 41 percent were transfers to other lower security facilities, and 5 percent were transfers to secure hospitals.

Four percent of all transfers were from the secure hospital, Lemuel Shattuck. Ten percent of the transfers from Lemuel Shattuck were to maximum security, 68 percent were to medium security, 21 percent were from lower security facilities and 1 percent were to other secure hospitals.

Transfers To. Tables 7 and 9 show inter-institutional transfers by the institution to which the inmate was admitted. Concord had the highest number of admissions from other DOC facilities (N=2,309) and accounted for 20 percent of all such admissions. Other facilities with large numbers of admissions from other DOC facilities include: Norfolk (N=1,804), NCCI (N=1,191), SECC (N=1,158), Cedar Junction (N=849), Shirley (N=827), and MHHI (N=501).

Seven percent of all inter-institutional transfers were to the maximum security facility, Cedar Junction. Of these transfers, 89 percent were from medium security facilities, 11 percent were from secure hospitals, and two admissions (less than one percent) were from lower security facilities.

Fifty-nine percent of all inter-institutional transfers were to medium security facilities. Of these transfers, 27 percent were from maximum security, 51 percent were lateral transfers from other medium security facilities, 16 percent were returns from lower security facilities, and 6 percent were transfers from secure hospitals.

Thirty percent of all inter-institutional transfers were to lower security facilities. Of these transfers, none were from maximum security, 73 percent were from medium security facilities, 24 percent were from other lower security facilities, and 3 percent were from secure hospitals.

Four percent of all inter-institutional transfers were to Lemuel Shattuck hospital. Of these transfers, 11 percent were from maximum security, 68 percent were from medium security, 21 percent were from lower security facilities, and less than one percent were from other secure hospitals.

Hospital Transfers. Offenders needing hospital care can be treated at various community hospitals or Lemuel Shattuck Hospital, a hospital at which the Department of Correction maintains a secure ward for offenders in custody. During 1987 there were 468 transfers to Lemuel Shattuck Hospital from Department of Correction facilities and 470 transfers from Lemuel Shattuck to state correctional institutions (including transfers to Bridgewater State Hospital). See Tables 6 and 7.

There were 135 releases to and 128 returns from community hospitals (Tables 10 and 11) during 1987. New England Medical Center had the greatest number of

admissions and releases, followed by Framingham Union, Beth Israel, Mass Eye and Ear and Boston City Hospital. Together, they received almost half of the admissions and releases to community hospitals. Framingham had the largest number of moves to and admissions from community hospitals.

Transfers to Houses of Correction. Four types of movements between county houses of correction and state facilities are presented in Tables 12 through 15 of this report. The first type of move involves a state or county inmate transferred from a DOC facility to a county house of correction to serve or finish a sentence. There were 374 such transfers in 1987. The Middlesex County facility at Billerica received the largest number of transfers (N=53) and Concord transferred the most inmates (N=124) during 1987. The second type of move is the return of a Department of Correction inmate from a county facility. There were 157 such returns in 1987. Thirty-four percent of the returns were to Concord. The largest number of returns were from Deer Island (N=27). The third type of move is the transfer of a county inmate to a Department of Correction facility. There were 443 such transfers in 1987. Thirty-five percent of these admissions came from the Billerica House of Correction, 11 percent from Plymouth, 10 percent from the Dedham House of Correction, and 10 percent from the New Bedford House of Correction (see Table 14). All of the admissions were to the Longwood Treatment Center (87 percent) or Concord (13 percent). The Longwood Treatment Center is a specialized facility for the treatment of individuals committed for Operating Under the Influence of Alcohol (O.U.I.) and receives individuals originally committed to county facilities for O.U.I. The fourth type of move is the release of a Department of Correction inmate to a county facility on a "from and after" sentence. There were 41 such releases in 1987. Thirty-nine percent of these releases were from NCCI.

Movements to Other States. Table 16 shows that there were 108 transfers from Department of Correction facilities to prisons in other states. This included 92 Department of Correction inmates and 16 interstate transfers under the jurisdiction of other states. Of the total number of offenders transferred, 26 percent were released from NCCI, and 17 percent from Norfolk. Eighty-one percent of the offenders were transferred to prisons in other New England states, including 36 percent to New Hampshire. There were 103 admissions from other states during 1987 (Table 16). Inmates admitted from out-of-state prisons included the return of 76 Department of Correction offenders and transfer of 27 offenders under the jurisdiction of other states. Eighty-six percent of the offenders were sent from prisons in other New England states, including 39 percent from New Hampshire, and admitted most often to Concord (34 percent) or NCCI (20 percent).

Glossary

Admission

Court Commitment	Includes individuals entering DOC directly from courts, on forthwith sentences, and on sentences to be served from and after a county sentence.
B sentence	Sentence received for an offense committed on parole. An individual is committed on a B sentence after being discharged or re-paroled from the original A sentence.
Probation Violator	Re-admission of an individual previously released on a "split" sentence. Court orders balance of sentence to go forward.

Institutions

Cedar Junction	Formerly known as Walpole.
Hodder House	A minimum/pre-release facility for female offenders at Framingham.
OCCC	Old Colony Correctional Center at Bridgewater
NCCI	North Central Correctional Institute at Gardner
SECC	Southeastern Correctional Center at Bridgewater. SECC has medium security and minimum security beds, but is considered a medium security facility for purposes of this report.
NCC	Northeastern Correctional Center at Concord.
MHHI	Massachusetts Halfway Houses, Incorporated is a private non-profit organization that provides facilities to the DOC on a contract basis which includes the following facilities: Brooke House, Coolidge House, Coolidge II, McGrath House, and the Temporary Housing Project.

Drug Rehab Drug rehabilitation programs are specialized pre-release facilities for offenders with drug problems. Includes Meridian House and Spectrum House.

Bridgewater Includes the Bridgewater State Hospital, the Sexually Dangerous Treatment Center, and the Addiction Center.

Releases

Transfer to House of Correction Includes DOC and non-DOC inmates transferring or returning to county facilities.

Transfer to another authority Includes DOC and non-DOC inmates transferring or returning to facilities in other states, and federal facilities.

Parole/Discharge to other authority Includes paroles to county facilities, out of state facilities.

Parole/Discharge to Sentence Includes paroles to B sentences, from & after sentences at DOC or non-DOC facilities.

Release to Warrant Includes paroles and discharges to outstanding warrants, such as parole violation warrants.

Release by Court Includes sentences that are vacated.

Security Levels

Maximum Cedar Junction

Medium Concord, Framingham, SECC, OCCC, NCCI, Norfolk

Minimum Medfield, NCC, Bay State

State Pre-Release Boston State, Park Drive, Norfolk PRC, South Middlesex

Contract Pre-Release MHHI, Drug Rehab, Charlotte House, Hillside PRC

Secure Hospital Lemuel Shattuck, Bridgewater.
