INTRODUCTION

This report is a statistical description of the characteristics of individuals released to the street from facilities of the Massachusetts Department of Correction during 1984. The tables which follow contain information on the nature of the present offense, personal background characteristics, criminal history, furlough program participation and release characteristics for all individuals released to the street from Massachusetts correctional facilities. These tables were derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and were produced by the Research Unit on the Massachusetts State College Computer Network (MSCCN).

Only those individuals who were released to the street by the authority of the Parole Board, by expiration of sentence, or by discharge are included in the report. Individuals who were released to another correctional authority or to another sentence are not included. Individuals who are released by means other than parole, discharge or expiration are not included in the report. This includes releases by court order, death and escape. Individuals transferred to other correctional authorities to serve their sentences who are subsequently released are not included in the report; individuals transferred from other authorities who were subsequently released from a DOC facility are included in the report. Individuals who were released more than once during 1984 are counted as multiple cases in the report.

In reading the tables in this report, the reader should note the following: (1) the release population is divided according to the institutions of release; (2) the top number in each cell represents the number of individuals who fall in the corresponding category in the table; (3) the bottom number in each cell represents the percentage of the number of individuals in a particular category to the total number of releases from that institution (column percents). This report is divided into two sections. The first section separates the specific non-pre-release institutions and combines the facilities with a pre-release component into one category. The second section lists the specific facilities with pre-release components and combines the non-pre-release facilities into one category.

For example, upon referring to the table on page 14, committing institution is presented and the following types of information can be obtained:

- (1) the number of releases from each facility in 1984
- (2) the number and percent of releases from each institution who were originally committed to each of the committing institutions.
- (3) the same information is presented for each pre-release facility on page 68.

The reader should note that the rate of unknowns is relatively high for certain variables, especially certain social history / background variables. Caution should be used in interpreting these variables.

Summary of Statistics

During 1984 there were 2,125 individuals released to the street from facilities in the Massachusetts Department of Correction. This represents an increase of 8 percent from 1983 and an increase of 48 percent from 1982.

Nature of Present Offense

Sentencing Courts. Originally 67 percent of the releasees were sentenced in Superior Courts including 18 percent from Suffolk Superior Court, 10 percent from Middlesex Superior Court and 10 percent from Worcester Superior Court. Another 30 percent of the releasees were sentenced in District or Boston Municipal Courts.

Jail Credits. Fifty-four percent of the releasees spent time in jail prior to their commitment; 46 percent had spent no time in jail prior to their commitment.

Commitment Institution. Walpole commitments represented 28 percent of all releases; Concord commitments represented 39 percent of all releases and Framingham commitments represented 31 percent of all releases. There were 43 (2%) individuals released who were originally committed to another jurisdiction.

Sentence. Thirteen individuals who originally received life sentences were released during 1984. Most releasees (70 percent) were serving indeterminate sentences (including county sentences).

Present Offense. Half of the releasees were serving sentences for violent offenses (43 percent for person offenses and 8 percent for sex offenses). Another 27 percent were serving sentences for property offenses.

Age at Incarceration. The median age at incarceration for the releasees during 1984 was 24.5 years old.

Personal Background Characteristics

Sex. Over two-thirds of the releasees were male and almost one-third were female. The number of females released in 1984 increased by 15 percent over 1983 while the number of males released increased by only 4 percent.

Race. Thirty-two percent of the releasees were black and 66 percent were white. There were 4 native Americans and 3 Asians in the releasee group. Eight percent of the releasees were Hispanic.

Marital Status. The majority of releasees (66 percent) was single.

Military Discharge. Of the 1865 releases for whom information was known, 86 percent had never served in the military.

Prior Address. The largest group of releasees (47 percent) came from the Boston SMSA.

Occupation. Most releasees whose occupations were known had worked in the areas of manual labor (50 percent) or services (27 percent).

Education. The median educational level for the 1984 releasees was eleventh grade; 42 percent had achieved at least a high school level of education.

Criminal History

Since the rate of unknowns for the Criminal History variables is 12 percent, the percentages below are based on those cases known.

Prior Court Appearances. The median age at first court appearance was 17 years. Most of the releasees (96 percent) had at least one court appearance prior to their present offense. A majority of the releasees had previously appeared in court for person offenses (77 percent) and property offenses (83 percent). A minority had appeared in court for sex offenses (15 percent), alcohol offenses (23 percent) and escapes (9 percent), and almost half of the releasees had court appearances for drug offenses (45 percent).

Prior Incarcerations. Thirty-nine percent of the releasees during 1984 had prior incarcerations in a house of correction and 23 percent had prior incarcerations in a state or federal correctional institution. Overall 52 percent of the releasees had served some time as an adult for another offense.

Prior Paroles. Seven percent had been paroled while a juvenile and 3 percent had received a parole violation while a juvenile. Sixteen percent of the releasees during 1984 had been paroled as an adult and 10 percent had previous parole violations. Overall, 19 percent had been paroled at least once prior to their current release and 12 percent had previous parole violations.

Furlough Program Participation

Thirty percent of the releasees had one or more furloughs during their present incarceration; seventy percent had no participation in the furlough program. Only five individuals had one or more furlough escapes. Six percent of the 1984 female releasees and 42 percent of the male releasees had one or more furloughs during their present incarceration. This difference is due, in large measure, to the fact that such a large number of women received relatively short county sentences.

Release Characteristics

Because males and females differ on most release characteristics, Tables 1 and 2 present information on release characteristics by sex of releasee. These differences may largely be attributed to the type of sentences served. Eighty-seven percent of the female releasees were serving county sentences and 13 percent were serving state sentences. In contrast almost all male releasees were serving state sentences. Table 1 (page 8) shows type of sentences for all releases.

Institution Released From. For male releasees, 54 percent were released from lower security institutions (minimum security and pre-release centers) and 46 percent were released from secure institutions (maximum or medium security). For female releasees, 12 percent were released from lower security institutions and 88 percent were released from secure

institutions. Table 1 shows the institution released from for all 1984 releases.

Type of Release. Individuals could be released by the authority of the Parole Board, by expiration of sentence or by a good conduct discharge. For male releasees, 82 percent were paroled and 18 percent were released by expiration of sentence or good conduct discharge. For female releasees, 45 percent were paroled and 55 percent were released by expiration of sentence or good conduct discharge. Table 1 shows type of release for all 1984 releases.

Parole Violator Status. Individuals could be released for the first time on their current sentence or could be released following a return on a parole violation. Twenty-one percent of all male releasees and 4 percent of all female releasees were released after a parole violation. Thirty-three percent of all male releasees from secure institutions were parole violators. Table 1 shows this information.

Time Served. In thirty-eight percent of the cases, time served cannot readily be calculated because the individual was received as a transfer from another correctional authority, was a parole violator or had a complex sentence (from and after, forthwith or split sentence). Of the remaining cases, 63 percent served two years or less before release. Summary statistics on time served until first release by committing institution, general offense category and selected specific offenses are shown in Table 2.

| Class B | 12 | 25.7 Months | 12 | 13.6 Months | 7 | 6.8 Months |

¹ Individuals who were parole violators, were originally committed to another authority or were serving complex sentences (forthwith, split or from and after sentences) were excluded from the analysis.

² Offenses were selected based on the frequency with which they appear among the releasee group.

³ Includes Armed Assault in a Dwelling, Assault and Battery with a dangerous weapon and Assault by means of a dangerous weapon.
