(c) Subject to the terms and conditions herein, the Issuing Authority hereby grants to Licensee the right to construct, upgrade, install, operate and maintain a Cable Television System within the Public Way.

SECTION 2.2 - TERM: NON-EXCLUSIVITY

This License shall be in effect for the period of March 11, 2009 through midnight August 13, 2009 as the amended/restated term, which replaces the existing License in its entirety, and then, without interruption, from August 14, 2009 through midnight, August 13, 2019 as the renewal term.

(a) In accordance with the provisions of federal law, M.G.L. c. 166A, § 13 and applicable regulations, this Renewal License shall be subject to additional renewals for periods not to exceed ten (10) years or such other periods as allowed by law.

SECTION 2.4 - RESERVATION OF AUTHORITY

Nothing in this Renewal License shall (a) abrogate the right of the Issuing Authority to perform any public works or public improvements of any description; (b) be construed as a waiver of any codes or bylaws/regulations of general applicability and not specific to the Cable Television System, Licensee, or this License; or (c) be construed as a waiver or release of the rights of the Issuing Authority in and to the Public Ways. Any conflict between the terms of this Renewal License and any present or future exercise of the municipality's police and regulatory powers shall be resolved by a court of appropriate jurisdiction.

SECTION 2.5 - NON-EXCLUSIVITY OF LICENSE

(a) This Renewal License shall not affect the right of the Issuing Authority to grant to any other Person a license or right to occupy or use the Public Ways or streets, or portions thereof, for the construction, upgrade, installation, operation or maintenance of a Cable Television System within the Town of Hingham; or the right of the Issuing Authority to permit the use of the Public Ways and places of the Town for any purpose(s) whatsoever. Along with said written request, the Licensee shall provide the Issuing Authority with written reasons for its belief. At the public hearing, the Issuing Authority shall afford the Licensee an opportunity to demonstrate that any such additional cable television license(s) are on terms more favorable or less burdensome than those contained in this Renewal License. (c) The issuance of additional license(s) shall be subject to applicable federal law(s), and M.G.L. Chapter 166A and applicable regulations promulgated thereunder.

(d) In the event an application for a new cable television license is filed with the Issuing Authority, proposing to serve the Town, in whole or in part, the Issuing Authority shall serve a copy of such application upon the Licensee by certified mail or via nationally recognized overnight courier services within a reasonable time thereafter.

(e) In the event that the Licensee believes that in the future another licensee which has been granted a cable television license in the Town, has been provided relief by the Issuing Authority from a material obligation(s) of its license, which may include amendments to the license, that causes said other cable television license to be more favorable or less burdensome than this Renewal License, the Licensee may request, in writing, that the Issuing Authority convene a public hearing on that issue. Along with said written request, the Licensee shall provide the Issuing Authority with written reasons for its belief. The Licensee shall provide the Issuing Authority with such financial or other relevant information as is requested. At the public hearing, the Issuing

Authority shall afford the Licensee an opportunity to demonstrate that such relief causes said other cable license to be favorable or less burdensome than this Renewal License. Should the Licensee demonstrate that any such relief causes said other cable television license to be more favorable or less burdensome than the Renewal License, the Issuing Authority shall consider and negotiate, in good faith, equitable amendments to this Renewal License.

SECTION 2.6 – POLICE AND REGULATORY POWERS

By executing this Renewal License, the Licensee acknowledges that its rights are subject to the powers of the Town and its right to adopt and enforce generally applicable by-laws in the lawful exercise of its police powers to the extent permitted by applicable law, with respect to the safety and welfare of the public. Any conflict between the terms of this Renewal License and any present or future lawful exercise of the Town's police and regulatory powers shall be resolved in a court of competent jurisdiction. Nothing in this Section 2.6 shall be deemed to prohibit the right of the Licensee to challenge the legality of a Town by-law or regulation.

SECTION 2.7 – REMOVAL OR ABANDONMENT

Upon termination of this Renewal License by passage of time or otherwise, unless (1) the Licensee has its license renewed for another term or (2) the ownership of the Cable Television System is transferred to another Person with written approval by the Issuing Authority in accordance with applicable law and pursuant to Section 2.8 below or (3) unless otherwise operating under the terms of this Renewal License as allowed by applicable law, the Licensee shall remove all of its supporting structures, poles, transmission and distribution systems, and other appurtenances from the Public Ways and shall restore the areas to their original condition as is reasonably possible and as soon as reasonably possible. If such removal is not complete

within six (6) months of such termination, the Issuing Authority may deem any property not removed as having been abandoned. Upon written request of the Licensee, the Issuing Authority may waive this requirement for good cause shown.

SECTION 2.8 – TRANSFER OF THE RENEWAL LICENSE

(a) Pursuant to M.G.L. c. 166A, Section 7, as may be amended from time to time, neither the Renewal License, nor control thereof, shall be transferred, assigned or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any Person, company and/or other entity holding such Renewal License to any other Person, company and/or other entity, without the prior written consent of the Issuing Authority, which consent shall not be arbitrarily or unreasonably withheld. The consent of the Issuing Authority shall be given only after a public hearing upon a written application therefore on forms as may be prescribed by the FCC and/or the Cable Division. Pursuant to 207 CMR 4.01(2), a transfer or assignment of a license or control thereof between commonly controlled entities, between affiliated companies, or between parent and subsidiary corporations, shall not constitute a transfer or assignment of a license or control thereof under M.G.L. c. 166A, Section 7. As required by federal and/or state law or regulations, the Licensee shall within thirty (30) days of receiving a request for consent, notify the Licensee in writing of the additional information, if any, it requires to determine the legal, financial, technical and managerial qualifications of the transferee or new controlling party. If the Issuing Authority has not taken action on Licensee’s request for consent within one hundred twenty (120) days after receiving such request, consent shall be deemed given.

(b) Any proposed controlling or owning Person or transferee approved by the Issuing Authority shall be subject to all of the terms and conditions contained in the Renewal License.

SECTION 2.9 – EFFECT OF UNAUTHORIZED TRANSFER ACTION

(a) Any transfer of the Cable System without the Licensee and the transferee complying with Section 2.8 above shall be null and void, and shall be deemed a material breach of this Renewal License.

(b) If the Issuing Authority denies its consent to any such action and a transfer has nevertheless been effected, the Issuing Authority may revoke and terminate this Renewal License, unless such transfer is otherwise allowable by applicable law.

(c) The grant or waiver of any one or more of such consents shall not render unnecessary any subsequent consent or consents, nor shall the grant of any such consent constitute a waiver of any other rights of the Town.

The Cable System shall conform to the FCC technical specifications, including 47 CFR 76.05 which are incorporated herein by reference. At all times throughout the Renewal License, the Licensee shall meet all applicable FCC technical standards.

SECTION 3.9 – INSTITUTIONAL NETWORK

(a) The Licensee shall own, operate, maintain and repair the broadband fiber institutional network (“I-Net”) existing on the Effective Date. The I-Net will consist of six (6) strands of fiber optic cable from the I-Net hub-site at the Hingham Town Hall (210 Central Street) to each building identified in Exhibit 3.9 for the Town’s (including its Public School’s) and the Town’s designated Access Provider’s exclusive non-commercial use for the term of this Renewal License, at no charge to the Town or the Access Provider. The six (6) fiber optic strands are designated for the following use: one pair (strands 1 and 2) of fiber strands will be terminated and activated for all I-Net PEG Access video and accompanying audio. The second pair (strands 3 and 4) will be terminated and available for the exclusive use of the Issuing Authority. The remaining pair (strands 5 and 6) will not be terminated and will be reserved for back-up use and maintenance, in the event of a problem or break in the other four (4) fibers.

(b) The I-Net shall be capable of transmitting any and all signals that are being transmitted from and among those buildings with an activated I-Net drop listed in **Exhibit 3.9** (“I-Net Buildings”), attached hereto and made a part hereof.

(c) The Licensee shall provide and maintain one I-Net drop, without charge to the Town and/or any designated institutions, to each of the I-Net Buildings.

(d) The Licensee shall be responsible for the underlying I-Net equipment, including any Headend and/or I-Net Hub Site equipment necessary to make the I-Net function, including

responsibility for the underlying I-Net or distribution cables, wires, amplifiers, and switching equipment located at its Headend and/or I-Net Hub, including, but not limited to fiber nodes at all Town buildings. The Town or its designee(s) shall be responsible for any and all user terminal interface equipment, including, but not limited to modems, routers, modulators and associated computer and video production equipment, and for Town or designee owned equipment not directly related to the operation of the I-Net, which may need to be located in the I-Net Hub and/or I-Net Buildings. The Town shall continue providing the Licensee with appropriate space for the I-Net Hub Site, pursuant to this Section 3.9(d). The Licensee shall continue to be responsible for equipment to enable its I-Net to interact with the Licensee's Subscriber Network in order that PEG transmissions over its I-Net may be transmitted upstream to the Licensee-owned headend via an I-Net channel and then transmitted downstream on a Subscriber Network PEG Access Channel.

(e) Within six (6) months of the receipt of a written notice from the Issuing Authority, the Licensee shall construct and provide a fiber optic extension of the existing Licensee provided I-Net from its current I-Net headend/hub site located at the Hingham Town Hall to the new Access Studio location in the Town of Hingham. The Issuing Authority or its designee shall be responsible for the cost of constructing and installing said I-Net extension. The fiber optic I-Net extension shall, unless otherwise provided in writing by the Issuing Authority, consist of no less than forty-eight (48) terminated functioning fibers. The Licensee shall, at the cost of the Issuing Authority or its designee, be responsible for all patching/splicing and/or interconnects, and all necessary equipment to provide for said patching/splicing and interconnects, such that direct links from the I-Net Buildings are established with the new Access Studio. Unless otherwise required for engineering reasons in the judgment of the Licensee, all of the aforementioned patching/splicing shall be fusion type splices to reduce signal insertion loss. The Licensee shall, within a reasonable

period of time, after a written request by the Issuing Authority, provide a written estimate of the projected cost of the requested I-Net extension to the Access studio and shall in good faith discuss the specifics of such estimate(s) and less costly alternatives, if any, with the Issuing Authority and its representative(s). The Licensee shall discuss the location of I-Net drops with the appropriate official(s) for the respective building(s). The Licensee shall be responsible for the transport and delivery of PEG Access Programming from the new Access studio to the Licensee's headend to allow for and provide processing, switching and delivery to the appropriate downstream PEG Access Channel in the Town, at no cost to the Town or its designee. The Town or its designee shall make space available in the new Access studio for the Licensee provided I-Net racks and equipment, as needed. Said space shall be made available to the Licensee at no charge.

(f) The Issuing Authority and/or its designee shall have the right, at its/their own cost and expense, to construct the fiber optic extension referenced in subparagraph (d) above from the Hingham Town Hall to the new Access Studio location in the Town of Hingham. Said fiber optic extension and connection shall be compatible with the Licensee's I-Net and Cable System. The Issuing Authority shall be responsible for all fiber optic terminations and all necessary equipment to provide for terminations, patching and interconnects to the existing Licensee owned Fiber Optic I-Net, such that direct links from the I-Net Buildings are established with the new Access Studio.

Unless otherwise reached by a joint decision of the Licensee and the Issuing Authority for engineering reasons, all of the aforementioned patching shall be SC/APC Style terminations to establish a clear point of demarcation between the Town owned fibers and the Licensee owned fibers. The Licensee shall relocate, re-install and activate any and all video equipment relating to the I-Net, to include, but not be limited to, modulators, demodulators, processors, lasers, receivers, splitters & couplers, from the current I-Net headend located at the Town Hall to new rack space, at the cost of the Issuing Authority or its designee, at the new Access studio location. The Issuing Authority or its designee shall be responsible for maintaining, servicing and repairing said I-Net extension. The Licensee shall continue to be responsible for maintaining, servicing and repairing all other parts of the I-Net, as provided in subparagraph (a) above. The Issuing Authority and/or its designee shall, if requested by the Licensee, temporarily cease using said I-Net extension, and if necessary disconnect said I-Net extension if it is interfering with the Licensee's I-Net.

(g) The I-Net shall be operated and maintained in compliance with applicable FCC Rules, including as prescribed by 47 CFR Part 76 for video with accompanying audio signals provided by a Cable System. In the event that there are technical problems with the I-Net, excluding: (1) any devices, hardware or software not under the control or ownership of the Licensee, and/or (2) equipment installed by the Town or other User, the Licensee shall use best efforts to resolve the technical problem within twenty-four (24) hours.

(h) Pursuant to this Section 3.9, the I-Net shall be owned, operated, maintained and/or repaired, as necessary, by the Licensee at no charge to the Town (except, to the extent applicable, as provided in Section 3.9(f) above).

(i) The Issuing Authority shall not require or authorize a competing cable licensee to connect its cable system to the I-Net for any reasons, including for purposes of obtaining PEG

Access Programming from the Licensee's PEG Access channels, without the prior written consent of Licensee. Nothing in this Renewal License authorizes the Licensee to connect its I-Net or Cable System to the cable system of another cable licensee.

(j) This Renewal License incorporates the March 30, 1999 Final License Amendment Re: I-Net, as **Exhibit 3.9**, as further amended by this Renewal License.

SECTION 7.4 – OTHER PAYMENT OBLIGATIONS AND EXCLUSIONS

The Licensee herein agrees that no such taxes, fees or charges of general applicability shall be used as offsets or credits against the License Fee or Franchise Fee payments.

(b) In accordance with Section 622(h) of the Cable Act, nothing in the Cable Act or this Renewal License shall be construed to limit the authority of the Issuing Authority to impose a tax, fee or other assessment of any kind on any Person (other than the Licensee) with respect to Cable Service provided by such Person over the Cable System for which charges are assessed to Subscribers but not received by the Licensee. For any twelve (12) month period, the fees paid by such Person with respect to any such Cable Service or any other communications service shall not exceed five percent (5%) of such Person's gross revenues derived in such period from the provision of such Services over the Cable System.

SECTION 7.6 – RECOMPUTATION

(a) Tender or acceptance of any payment, including any payment of a License Fee or any payment required in Article 6 of this Renewal License shall not be construed as an accord that the amount paid is correct, nor shall such acceptance of payment be construed as a release of any claim that the Issuing Authority may have for additional sums including interest payable under Article 6 or Article 7. All amounts paid shall be subject to audit and recomputation by the Issuing Authority, and shall occur in no event later than two (2) years after the subject payment has been tendered.

(b) If the Issuing Authority has reason to believe that any such payments are incorrect, the Licensee shall have thirty (30) business days after a written request from the Issuing Authority to provide the Town with additional information documenting and verifying the accuracy of any such payment(s). In the event that the Issuing Authority does not believe that such documentation supports the accuracy of such payment(s), the Issuing Authority may conduct an audit of such payment(s) at its expense.

(c) If, after such audit and recomputation, an additional fee is owed to the Town and/or its designee, such fee shall be paid within thirty (30) days after such audit and recomputation. Indemnified expenses shall include reasonable attorneys' fees and costs incurred from the time the Licensee receives written notice of its obligation to indemnify and defend the Town for a specific claim up to such time that the Licensee assumes defense of any action hereunder. The Issuing Authority shall give the Licensee timely written notice of its obligation to indemnify and defend the Town after receipt of a claim for which indemnification is sought. The Licensee is not required to indemnify the Town for attorney fees and costs incurred prior to the above referenced written notice being provided to the Licensee. (a) No failure on the part of the Issuing Authority, the Town or the Licensee to exercise, and no delay in exercising, any right in this Renewal License shall operate as a waiver thereof, nor shall any single or partial exercise of any such right preclude any other right, all subject to the conditions and limitations contained in this Renewal License.

In order for any waiver of the Issuing Authority, Town or the Licensee to be effective, it shall be in writing.

(d) The failure of the Issuing Authority or the Town to take any action in the event of any breach by the Licensee shall not be deemed or construed to constitute a waiver of or otherwise affect the right of the Issuing Authority or the Town to take any action permitted by this Renewal License at any other time in the event that such breach has not been cured, or with respect to any other breach by the Licensee.

MEDIAONE OF MASSACHUSETTS, INC.
LICENSEE

By: John R. Maher 4/20/99
Title: Director of Legal & Government Affairs

Description

A fiber based Institutional Network ("I-Net") will be built by Media One ("Licensee") for the Town of Hingham ("Issuing Authority"). It will consist of 6 strands of single mode fiber optic cable originating in Hingham's new Civic Center/Town Hall, connecting the list of sites specified in the I-Net Integration Estimate Quotation dated July 13, 1998 ("Specified Sites"), with the hub site designated at the new Civic Center/Town Hall ("Issuing Authority Hub").

The I-Net will be constructed differently from traditional coaxial cable I-Nets and will not contain coaxial cable. In the past, all coax networks were designed with a "tree and branch" architecture. These networks required amplifiers to "boost" the signal level over a long distance, and were much more susceptible to outside environmental conditions.

The I-Net will be constructed with a "star" architecture and connect from a hub site out to each of the Specified Sites individually. The fiber optic lines will be much more reliable than traditional coaxial cable networks, as the fiber optic lines do not require electronics (amplifiers, which can be failure points) to boost or carry the signal level between locations, and are not affected by the environment, including temperature fluctuations.

The fiber cable bundle at to each of the Specified Sites will contain 6 strands of single mode fibers. One pair (strands 1 and 2) of fiber strands will be terminated and activated for all Broadband Fiber Network ("BFN") services. The second pair (strands 3 and 4) will be terminated and available for the exclusive use of the Issuing Authority. The remaining pair (strands 5 and 6) will not be terminated and will be reserved for back-up use and maintenance, in the event of a problem or break in the other 4 fibers.

The I-Net will be connected to Licensee's **headend** by single mode fiber.

A fiber based connection consisting of single mode fiber between the Issuing Authorities' Hub and Licensee's **headend** will provide all applicable video and data services specified in the License and this Amendment.

Capabilities

Strands 1 and 2 of the I-Net will have a forward capacity of 78 channels (6 MHz each) from a span of 110, and 10 channels on the return, from a span of 19. The I-Net shall be interconnected with the subscriber network at the Licensee's

and as described below shall be sent on an upstream channel to the Licensee's headend facility, where such signals shall be reprocessed, switched and designated on the appropriate downstream channel on the subscriber network. The Licensee shall be responsible for the automatic switching of all I-Net upstream signals to the appropriate subscriber network downstream channels.

The I-Net will have many possible uses, including teleconferencing, carriage of audio and video for PEG (Public, Educational, Government) channels, security surveillance, e-mail, and telephony. A SONET ring for data transfer will be compatible with this architecture.

Maintenance

Licensee shall maintain the I-Net as prescribed by all applicable FCC specifications, including without limitation FCC Rules and Regulations Part 76, or such other rules as may supplant, replace or modify the FCC Rules and Regulations. Link loss measurements and locating breaks in the fiber are handled with an "OTDR," which is an optical time domain reflectometer. Except for the equipment specified on the **Headend/Hub** Equipment List, and for other equipment provided by the Licensee (if any) the Issuing Authority and its designated I-Net users shall maintain any and all interface equipment including, but not limited to, video production equipment. Licensee shall maintain all equipment necessary to make interaction possible with the subscriber network.

Since the I-Net is not susceptible to temperature fluctuations and it does not require amplifiers or other electronics other than lasers on either end, maintenance costs are very low.

Technical support

Any problems with the I-Net will be handled through Licensee's Network Operations Center. The emergency phone number has been given to the Issuing Authority, and the Police and Fire Chief. Local broadband and/or fiber technicians will respond to all I-Net outages within 24 hours.

Licensee shall determine and assign the transmit and receive frequencies for all BFN I-Net users. Licensee shall determine and design the correct signal strength levels necessary at each of the Specified Sites and the Issuing Authority Hub. The Issuing Authority may install its preferred equipment for BFN services, provided, however, that the data equipment to be used with this portion of the I-Net has been pre-approved by Licensee. Licensee agrees that such pre-approval will not be unreasonably withheld and approval will be deemed granted

if no response from Licensee to Issuing Authority's notification is received within fourteen (14) days of Issuing Authority's notification.

Responsibilities

Licensee will maintain proper signal level for all strands from the drop termination (wall plate) at each of the Specified Sites to the Issuing Authority Hub and from the Issuing Authority Hub to Licensee's headend. The Issuing Authority is responsible for all equipment and wiring connected to the drop termination (wall plate).

All signals and electronic equipment beyond that detailed in the License and this Amendment will be the responsibility of the Issuing Authority and must be directly compatible with the I-Net BFN architecture. Except for the equipment specified on the **Headend/Hub** Equipment List, the Issuing Authority and its designated I-Net users shall be responsible for any and all interface equipment including, but not limited to, video production equipment.

The network and applications developed by the Issuing Authority on strands 3 and 4 will be the responsibility of the Issuing Authority. The Licensee is responsible for the transmission of Issuing Authority-generated signals across strands 3 and 4.

The Licensee may not object, hinder, or deny to the Issuing Authority the right to place on strands 3 and 4 the services or signals of any other telecommunications service provider. However, no other telecommunications service provider shall be permitted in any of Licensee's facilities. Moreover, said telecommunications service provider(s) shall not be permitted to use the I-Net for any purpose other than providing voice, video or data to the municipal buildings in the Town of Hingham.

Ownership

Licensee constructs, maintains and owns the I-Net. Upon termination or expiration of any license entered into after expiration of the License, prior to Licensee removing, selling or dismantling the I-Net, the Issuing Authority shall have the right to purchase the I-Net from the Licensee for the sum of one dollar (\$1.00).

(b) Nothing in this rule should be construed to prevent or prohibit:

(1) A franchising authority and a cable operator from agreeing to customer service requirements that exceed the standards set forth in paragraph (c) of this section;

(2) A franchising authority from enforcing, through the end of the franchise term, pre-existing customer service requirements that exceed the standards set forth in paragraph (c) of this section and are contained in current franchise agreements;

(3) Any State or any franchising authority from enacting or enforcing any consumer protection law, to the extent not specifically preempted herein; or

(4) The establishment or enforcement of any State or municipal law or regulation concerning customer service that imposes customer service requirements that exceed, or address matters not addressed by the standards set forth in paragraph (c) of this section.

(c) Effective July 1, 1993, a cable operator shall be subject to the following customer service standards:

(A) Trained company representatives will be available to respond to customer telephone inquiries during normal business hours.

(B) After normal business hours, the access line may be answered by a service or an automated response system, including an answering machine. Inquiries received after normal business hours must be responded to by a trained company representative on the next business day.

(ii) Under normal operating conditions, telephone answer time by a customer representative, including wait time, shall not exceed thirty (30) seconds when the connection is made. If the call needs to be transferred, transfer time shall not exceed thirty (30) seconds. These standards shall be met no less than ninety (90) percent of the time under normal operating conditions, measured on a quarterly basis.

(iii) The operator will not be required to acquire equipment or perform surveys to measure compliance with the telephone answering standards above unless an historical record of complaints indicates a clear failure to comply.

(iv) Under normal operating conditions, the customer will receive a busy signal less than three (3) percent of the time.

(v) Customer service center and bill payment locations will be open at least during normal business hours and will be conveniently located.

(2) Installations, outages and service calls. Under normal operating conditions, each of the following four standards will be met no less than ninety-five (95) percent of the time measured on a quarterly basis:

(i) Standard installations will be performed within seven (7) business days after an order has been placed. "Standard" installations are those that are located up to 125 feet from the existing distribution system.

(ii) Excluding conditions beyond the control of the operator, the cable operator will begin working on "service interruptions" promptly and in no event later than 24 hours after the interruption becomes known.
