

To Whom It May Concern:

As a resident of the town of Montague, I'd like to express our need for viable internet - currently our only option is 1.5 MB DSL from Verizon - and our fear that if Comcast is chosen we will never be served. As I said at the meeting, they already think we have cable until they get here with a truck and see that we don't. Their plans for serving the unserved parts of town do not include us because they think we're already served.

Our teenage kids need internet more and more. It's basically expected that students be able to download large files and look up information quickly. We need the internet for our businesses. It's no longer a luxury, it's a necessity.

Sincerely,  
Patrick Pezzati
