ARTICLE 2
GRANT OF LICENSE

SECTION 2.1 — GRANT OF RENEWAL LICENSE

(a) PURSUANT to the authority of Chapter 166A of the General Laws of the Commonwealth of Massachusetts, (M.G.L.c. 166A) as inserted by Chapter 1103 of the Acts of 1971, as amended, and to federal law, the Board of Selectmen as the Issuing Authority of the Town of Millville, Massachusetts ("Town"), hereby grants a non-exclusive renewal Cable Television License to Charter Communications Entertainment I, L.L.C. ("Licensee") a Delaware limited liability corporation established for such purpose, authorizing and permitting said Licensee to construct and operate a Cable Television System within the corporate limits of the Town of Millville, Massachusetts. This Renewal License is granted pursuant to Chapter 166A of the General Laws of the Commonwealth of Massachusetts, as amended, and with all rules and regulations of the FCC, the rules and regulations of the MDTE or Massachusetts Community Antenna Television Commission ("CATV Commission"), the Cable Act, as amended, and all other rules and regulations in force and effect upon the date hereof.

(b) Subject to the terms and conditions herein, the Issuing Authority hereby grants to Licensee the right to construct, upgrade, install, operate and maintain a Cable System in, under, over, along, across, through or upon the Public Ways, including streets, lanes, avenues, alleys, sidewalks, bridges, highways and other public places under the jurisdiction of the Town of Millville within the municipal boundaries and subsequent additions thereto, including property over which the Town has an easement or right-of-way, Private Ways and also through public and private easements, which are within the Town, that have been dedicated for compatible uses, for the purpose of reception, transmission, collection, amplification, origination, distribution, or redistribution of audio, video, text, data, Internet access or other signals or services in accordance with the laws of the United States of America and the Commonwealth of Massachusetts. In exercising rights pursuant to this Renewal License, Licensee shall not endanger or interfere with the lives of persons or, without prior written permission, unlawfully interfere with any installations of the Town, any public utility serving the Town or any other persons permitted to use public ways and places. Grant of this Renewal License does not establish priority for use over other present or

future permit holders or the Town's own use of public ways and places. Disputes between Licensee and other parties regarding use of public ways and places shall be resolved in accordance with the Department of Public Works regulations or governing applicable law.

SECTION 2.2 — TERM OF RENEWAL LICENSE

The term of this Renewal License shall commence on August 5, 2002 and shall expire on August 4, 2012.

SECTION 2.3 — TRANSFER AND ASSIGNMENT OF RENEWAL LICENSE

This Renewal License or control thereof shall not be transferred, assigned or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any person holding such License to any other person, except as provided by applicable law or the regulations of the MDTE and the FCC.

SECTION 2.4 — NON-EXCLUSIVITY OF LICENSE AND COMPETITION

(a) This Renewal License shall not affect the right of the Issuing Authority to grant to any other person a license or right to occupy or use the streets, or portions thereof, for the construction, installation, operation or maintenance of a Cable Television System within the Town, or the right of the Issuing Authority to permit the use of the public ways and places of the Town for any purpose whatever. Licensee hereby acknowledges the Issuing Authority's right to make such grants and permit such uses. Issuing Authority shall not permit or authorize any person or entity to operate a cable system without a License or franchise, as defined by 47 U.S.C. § 522(9).

(b) If the Town enters into any contract, license, agreement, or the like with a MVPP, which is not an affiliate of Licensee, the terms of that contract, license or agreement shall be on substantially equivalent terms and conditions contained in this agreement or such terms and conditions equitably modified to reflect any differences between this License and any additional license, contract or agreement in terms of benefit to the respective MVPP, including, but not limited to, such considerations as (i) length of term; (ii) extent of

service area; (iii) system design and construction specifications; (iv) the payment of any franchise fees; (v) any payments for the support PEG access programming; (vi) any grants for capital equipment for PEG access programming; (vii) the provision of any service or service connections to schools or public buildings; (viii) the construction of an I-Net; and (ix) customer service standards. To the extent that any term of this License is less favorable and more burdensome to the Licensee than those of an equivalent provision of such subsequent or additional MVPP license, contract, or agreement, the Town, upon written request of the Licensee, after providing public notice, shall hold a public hearing to afford Licensee the opportunity to demonstrate the disparate nature of the terms of the additional license(s) and, following said hearing, the Town shall take actions to rectify said differences, including, but not limited to, amending the additional license, contract, or agreement so that they are not on more favorable or less burdensome terms than the terms of this License or amending this License so that its terms are not less favorable or more burdensome than those of any additional license, contract, or agreement. In devising an appropriate remedy, the Town shall consider that, in certain instances, eliminating ongoing obligations after the implementing construction has been undertaken may be inadequate to provide meaningful relief.

(c) In the event the services of any MVPP competing with the Licensee is not licensed or under contract or under agreement with the Town ("unlicensed MVPP"), and the number of households subscribing to the unlicensed MVPP in combination with the number of Subscribers of all other unlicensed MVPPs available to franchise area households is in excess of five percent (5%) which percentage shall be calculated from the effective date of this License, then to the extent such MVPP is not required to (i) pay any franchise fee; (ii) pay for support of PEG access programming; (iii) make grants for PEG access facilities; (iv) provide drops and service to public buildings; (v) construct an I-Net; or (vi) comply with customer service standards, the Town upon written request of the Licensee citing this provision and requesting relief sought, after providing public notice, shall hold a public hearing at which it will consider the reasonableness of Licensee's request for relief from complying with the above mentioned requirements and afford Licensee the opportunity to demonstrate the disparate burdens and inequities on Licensee of having to comply with said requirements. Following said hearing, the Town shall issue a report ascertaining the reasonableness of continuing to require Licensee to engage in the above-mentioned requirements and what relief, if any, Licensee may be afforded. In the absence of any applicable federal law that occupies the field specifically aimed at equalizing competition or otherwise creating a "level playing field" between municipally licensed and unlicensed MVPPs, should the conditions which Licensee demonstrates in the aforementioned hearing give rise to a competitive disadvantage for the Licensee, the Town shall rectify said differences by modifying

this License in such a manner as to relieve the Licensee of the burdens which are not imposed on or provided by the Licensee's competitors or by imposing similar requirements on the MVPP.

SECTION 2.5 — FUTURE RENEWALS

Renewal rights shall be afforded the Licensee at the expiration of this license consistent with applicable state and federal law. In no event shall such renewal rights be less favorable to the Licensee than those set forth in 47 U.S.C. § 546, as it exists on the date hereof.

ARTICLE 3

(a) The Licensee shall continue to operate and maintain a technologically suitable Cable System, which offers a full range of services and equipment, taking into account appropriate economic circumstances and feasibility and customer demand.

Nothing herein shall be construed to preclude Licensee from charging a fee to any Subscriber or potential Subscriber for a standard or non-standard installation, as may be applicable.

(c) Standard drops and installations shall include aerial drops up to 300 feet in length. Larger aerial drops and underground drops shall be priced based on cost.

(d) The Cable System may operate with bi-directional capability but in no case shall be less than 750 Megahertz (Mhz),

(e) Licensee retains full ownership rights and interest in all portions of its Cable Television System, including, but not limited to, converters that it leases to subscribers, the Distribution Plant, the Cable Drops, the Outlets, the Subscriber Network, and the Trunk and Distribution System, as authorized in accordance with applicable law.

(c) All future line extensions and developments shall be built within six (6) months of notification from the Town or developer of the availability of access to poles for aerial construction, or within six (6) months of written notification from the Town or developer of the availability of access to a joint trench in underground areas subject to Section 4.1(d). Where said notification is not provided to the Licensee or when a developer does not make joint trenches available in underground areas, such line extensions and developments shall be built within six (6) months after the roads within said line extensions or developments

are accepted as Public Ways, subject to Section 4.1(d) below; provided, however, that in the case of underground construction, the six (6) month requirement shall not apply where asphalt is not available or where the Town or State has a “road-cut moratorium” in place, or with respect to both aerial and underground construction, when homes are not expected to be occupied within the next six (6) months.

(d) All future line extensions and developments shall be built at the Licensee’s sole cost and expense; provided, however, that in cases where underground construction is required and the Licensee is not required or permitted to construct in accordance with section 4.1(c) supra, or the density of such new construction, aerial or underground, is less than twenty (20) homes per mile, the Licensee shall have the right to charge line extension fees to cover the costs of building such underground cable plant along the Public Way.

SECTION 4.2 — LOCATION OF CABLE SYSTEM

The Licensee shall construct, install, operate, and maintain the Cable System within the Town. Poles, towers, and other structures shall be erected so as not to interfere with vehicular or pedestrian traffic over the Public Way. The erection and location of all poles, towers, and other obstructions shall be in accordance with all laws, regulations, and/or by-laws. The Town shall cooperate with Licensee in all respects concerning the construction, installation, operation, and maintenance of Licensee's Cable System, including but not limited to the timely issuance of any permits or other authorizations necessary to perform such work at no charge to Licensee and upon such other reasonable terms and conditions as permitted by applicable law.

SECTION 4.3 — UNDERGROUND FACILITIES

(a) For residential subdivisions constructed after the Effective Date of this License with all utilities located underground, the Licensee shall install its Distribution Plant underground, provided: (i) the

subdivision contractor building the subdivision shall make the necessary easements available without cost to Licensee; and (ii) the subdivision contractor provides at least sixty (60) days' notice to the Licensee in order for the Licensee to place the Distribution Plant in utility trenches opened by the contractor.

(b) To facilitate the orderly development of new residential subdivisions with underground utilities, the Issuing Authority shall use its best efforts to encourage the Planning Board to (i) require that subdivision developers work with the Licensee during the planning of subdivisions to provide for Distribution Plant installation; (ii) require that a plan for the Distribution Plant be included in the subdivision plan as a condition for Planning Board approval; and (iii) require that the developer provide a copy of the approved plans to the Licensee.

SECTION 4.4 — CONSTRUCTION AND MAINTENANCE STANDARDS

Licensee shall construct and maintain the Cable System in accordance with applicable technical standards and standards generally observed by the cable television industry. During the term hereof, the Licensee shall comply with all applicable FCC statutes, regulations, and standards relating to the quality of signals transmitted over the Cable System. The Licensee shall construct, upgrade, install, operate, maintain and remove the Cable Television System in conformance with the Massachusetts Electrical Code, the National Electric Code, the National Electrical Safety Code, the National Electrical Code of the National Fire Protection Association, the National Cable Television Association Safety Manual, the rules and regulations of the FCC and the MDTE, building and zoning codes, and land use restrictions as the same exist or may be amended hereafter. If the Licensee fails to make such restoration within a reasonable time, the Issuing Authority may fix a reasonable time for such restoration and repairs and shall notify the Licensee

in writing of the restoration and repairs required and the time fixed for performance thereof. Upon the failure of the Licensee to comply within the specified time period, the Issuing Authority may cause proper restoration and repairs to be made and the reasonable expense of such work shall be paid by the Licensee upon demand by the Issuing Authority. For the purpose of this section, "*reasonable expense*" shall provide for restoration to a condition similar to the original condition.

SECTION 4.6 — DISCONNECTION AND RELOCATION

The Licensee shall, at its sole cost and expense, protect, support, temporarily disconnect, relocate in the same street, or other Public Way or place, or remove from any street or other Public Way or place, any of its property as may be required by the Issuing Authority or its designee by reason of traffic conditions, public safety, street construction, change or establishment of street grade, or the construction of any public improvement or structure by any Town department acting in a governmental capacity.

SECTION 4.7 — PRIVATE PROPERTY

The Licensee shall be subject to applicable law regarding private property in the course of constructing, upgrading, installing, operating, and maintaining the Cable Television System in the Town. SECTION 4.8 — COMMERCIAL ESTABLISHMENTS

The Licensee shall make cable services available to any commercial establishments in the Town, which are located on the residential Subscriber Network, subject to the Licensee and each commercial

establishment reaching a reasonable agreement regarding the terms and costs of initial installation and service which may or may not differ from the terms and costs that apply to residential Subscribers. It is herein acknowledged that certain programming services may not be available to commercial establishments, or may be available only upon certain terms and conditions, pursuant to Law or the Licensee's agreements with its program suppliers.

SECTION 4.9 — CONTINUITY OF SERVICE

(a) It shall be the right of all subscribers, in any area of the Town when and where Licensee is providing service pursuant to this Renewal License, to receive service as long as their financial and other obligations to Licensee are honored. Licensee shall ensure that all Subscribers receive continuous, uninterrupted service, except for necessary or unforeseen service interruptions.

(b) Licensee may disconnect service to a Subscriber if, after providing notice of signal leakage, Subscriber does not permit Licensee to enter property and correct a signal leakage problem, in conformance with FCC technical specifications.

(c) Nothing in this License shall be construed to restrict Licensee from detecting and preventing unauthorized reception or interception of any service offered by Licensee through its Cable System; provided further that Licensee may decline to provide service to any person or entity who, whether by action, word or deed, refuses to cease and desist from the unauthorized reception or interception of Licensee's service.

(b) Nothing in this rule should be construed to prevent or prohibit:

(1) A franchising authority and a cable operator from agreeing to customer service requirements that exceed the standards set forth in paragraph (c) of this section;

(2) A franchising authority from enforcing, through the end of the franchise term, pre-existing customer service requirements that exceed the standards set forth in paragraph (c) of this section and are contained in current franchise agreements;

(3) Any State or any franchising authority from enacting or enforcing any consumer protection law, to the extent not specifically preempted herein; or

(4) The establishment or enforcement of any State or municipal law or regulation concerning customer service that imposes customer service requirements that exceed, or address matters not addressed by the standards set forth in paragraph (c) of this section.

(c) Effective July 1, 1993, a cable operator shall be subject to the following customer service standards:

(1) Cable system office hours and telephone availability:

(i) The cable operator will maintain a local, toll-free or collect call telephone access line which will be available to its subscribers 24 hours a day, seven days a week.

(A) Trained company representatives will be available to respond to customer telephone inquiries during normal business hours.

(B) After normal business hours, the access line may be answered by a service or an automated response system, including an answering machine. Inquiries received after normal business hours must be responded to by a trained company representative on the next business day.

(ii) Under normal operating conditions, telephone answer time by a customer representative, including wait time, shall not exceed thirty (30) seconds when the connection is made. If the call needs to be transferred, transfer time shall not exceed thirty (30) seconds. These standards shall be met no less than ninety (90) percent of the time under normal operating conditions, measured on a quarterly basis.

(iii) The operator will not be required to acquire equipment or perform

surveys to measure compliance with the telephone answering standards above unless an historical record of complaints indicates a clear failure to comply.

(iv) Under normal operating conditions, the customer will receive a busy signal less than three (3) percent of the time.

(v) Customer service center and bill payment locations will be open at least during normal business hours and will be conveniently located.

(2) Installations, outages and service calls. Under normal operating conditions, each of the following four standards will be met no less than ninety five (95) percent of the time measured on a quarterly basis:

(i) Standard installations will be performed within seven (7) business days after an order has been placed. "Standard" installations are those that are located up to 125 feet from the existing distribution system.

(ii) Excluding conditions beyond the control of the operator, the cable operator will begin working on "service interruptions" promptly and in no event later than 24 hours after the interruption becomes known. The cable operator must begin actions to correct other service problems the next business day after notification of the service problem.

(iii) The "appointment window" alternatives for installations, service calls, and other installation activities will be either a specific time or, at maximum, a four-hour time block during normal business hours. (The operator may schedule service calls and other installation activities outside of normal business hours for the express convenience of the customer.)

(iv) An operator may not cancel an appointment with a customer after the close of business on the business day prior to the scheduled appointment.

(v) If a cable operator representative is running late for an appointment with a customer and will not be able to keep the appointment as scheduled, the customer will be contacted. The appointment will be rescheduled, as necessary, at a time which is convenient for the customer.

(3) Communications between cable operators and cable subscribers:

(i) Notifications to subscribers:

(A) The cable operator shall provide written information on each of the following areas at the time of installation of service, at least annually to all subscribers, and at any time upon request:

(1) Products and services offered;

(2) Prices and options for programming services and conditions of subscription to programming and other services;

(3) Installation and service maintenance policies;

(4) Instructions on how to use the cable service;

(5) Channel positions programming carried on the system;

and,

(6) Billing and complaint procedures, including the address and telephone number of the local franchise authority's cable office.

(B) Customers will be notified of any changes in rates, programming services or channel positions as soon as possible in writing. Notice must be given to subscribers a minimum of thirty (30) days in advance of such changes if the change is within the control of the cable operator. In addition, the cable operator shall notify subscribers thirty (30) days in advance of any significant changes in the other information required by paragraph (c)(3)(i)(A)

of this section. Notwithstanding any other provision of Part 76, a cable operator shall not be required to provide prior notice of any rate change that is the result of a regulatory fee, franchise fee, or any other fee, tax, assessment, or charge of any kind imposed by any Federal agency, State, or franchising authority on the transaction between the operator and the subscriber.

(ii) *Billing:*

(A) *Bills will be clear, concise and understandable. Bills must be fully itemized, with itemizations including, but not limited to, basic and premium service charges and equipment charges. Bills will also clearly delineate all activity during the billing period, including optional charges, rebates and credits.*

(B) *In case of a billing dispute, the cable operator must respond to a written complaint from a subscriber within 30 days.*

(iii) *Refunds: Refund checks will be issued promptly, but no later than either:*

(A) *The customer's next billing cycle following resolution of the request or thirty (30) days, whichever is earlier, or*

(B) *The return of the equipment supplied by the cable operator if service is terminated.*
