

**Letter from the Chair of the Board of Trustees,  
Treasurer Steven Grossman**

January 2011

Dear Friends and Colleagues:

It is with great pleasure that I serve as Chair of the Board of Trustees for the Massachusetts Water Pollution Abatement Trust. The Trust is a critical financial resource to communities across the Commonwealth and a model for state revolving funds across the nation. Today, as our cities and towns are faced with serious budgetary challenges, as a major provider of subsidized financial assistance, the Trust has an important role to play in offering some relief.

This site will provide you with a sampling of the accomplishments of the Trust and its contribution to a cleaner environment for the citizens of the Commonwealth. Since its inception in 1989, the Trust has provided over \$4.6 billion of project financing to Massachusetts' communities. The Trust ranks in the top five nationally in nearly every category of the Environmental Protection Agency's state revolving fund indicators including total loan assistance provided and loan assistance as a percentage of our federal grant.

I hope that you find this website helpful and informative. And I look forward to working with you to the benefit of all the citizens of the Commonwealth.

Sincerely,

Steven Grossman  
State Treasurer & Receiver General
