Ladies & Gentlemen:

The Division of Marine Fisheries has determined that all species of bivalve shellfish, **except for blue mussels (*Mytilus edulis*)**, from areas OC:2 through OC:6 defined below, **no longer contain biotoxins (Paralytic Shellfish Poison-(PSP))** from the phytoplankton *Alexandrium (spp.)* in excess of established standards. These areas OC:2 through OC:6 also remain closed to the harvesting of **Moon snails (*Polinices duplicatus and Lunatia heros*)**.

Therefore, under authority of Massachusetts General Laws, Chapter 130, sections 74A and 75 and 322 CMR sections 7.01 (7), 7.02 and 10.00, the PSP closures for **bivalve shellfish** issued on March 19, 2020 **will be rescinded at sunrise on Friday, May 1, 2020** in areas OC:2 through OC:6 for all species except blue mussels. Bivalve shellfish, other than blue mussels, in areas currently classified as APPROVED and in the “open” status may now be harvested for direct human consumption subject to local rules and regulations under authority of Massachusetts General Laws Chapter 130, section 52. Similarly, those areas classified as CONDITIONALLY APPROVED and in the “open” status are subject to the classification conditions. All areas OC:2 through OC:6 remain closed to the harvesting of **blue mussels and Moon snails (*Polinices duplicatus and Lunatia heros*)**.

Status: Open to Bivalve Shellfish Harvesting. These areas remain closed to the harvesting of **blue mussels (*Mytilus edulis*) and Moon snails (*Polinices duplicatus and Lunatia heros*)**.
