Director

Town of Orleans Selectboard
Town Hall
Orleans, MA 02653

May 16, 2024

Ladies & Gentlemen:

The Division of Marine Fisheries has determined that **bivalve shellfish** from growing area SC63, defined below, **do not contain biotoxins associated with Paralytic Shellfish Poisoning (PSP)** from the phytoplankton *Alexandrium* (spp.) in excess of established standards. All growing areas in the Pleasant Bay System, SC53 through SC64, remain closed to the harvesting of all carnivorous snails.

Therefore, under authority of Massachusetts General Laws, Chapter 130, sections 74A, the PSP closure for **bivalve shellfish** issued on March 19, 2024, **will be rescinded at sunrise on Friday, May 17, 2024**, in growing area **SC63 Namequoit River, Frostfish Cove and Meetinghouse Pond in Orleans**. Bivalve shellfish, except wild bay scallops (currently in the closed season), may now be harvested for direct human consumption subject to local rules and regulations under authority of Massachusetts General Laws Chapter 130, section 52.

Status: Open to Bivalve Shellfish Harvesting

This area remains CLOSED to the harvesting of all carnivorous snails.

SC63

Namequoit River, Frostfish Cove and Meetinghouse Pond

"The waters, flats and all tributaries of the Namequoit River in the Town of Orleans, northwest of a line drawn from Namequoit Point to Old Field Point."

Sincerely,

Daniel J. McKiernan, Director
MA Division of Marine Fisheries
