Ladies & Gentlemen:

The Division of Marine Fisheries has determined that all species of bivalve shellfish from areas OC:2 through OC:6, defined below, **no longer contain biotoxins (Paralytic Shellfish Poison-(PSP))** from the phytoplankton *Alexandrium (spp.)* in excess of established standards. As a result, the Division has determined that these below defined areas now meet the established criteria for the harvest of shellfish and has changed the status to "OPEN TO SHELLFISHING" as of sunrise on June 17, 2021.

Therefore, under authority of Massachusetts General Laws, Chapter 130, sections 74A and 75 and 322 CMR sections 7.01 (7), 7.02 and 10.00, **the PSP closures for bivalve shellfish issued on March 17, 2021 will be rescinded at sunrise on Thursday, June 17, 2021** in areas OC:2 through OC:6 for all species. Bivalve shellfish in areas currently classified as APPROVED may now be harvested for direct human consumption subject to local rules and regulations under authority of Massachusetts General Laws Chapter 130, section 52. Similarly, those areas classified as CONDITIONALLY APPROVED and in the "open" status are subject to the classification conditions. All areas OC:2 through OC:6 remain closed to the harvesting of **Moon snails (*Polinices duplicatus and Lunatia heros*)**.

Status: Open to Bivalve Shellfish Harvesting. These areas remain closed to the harvesting of **Moon snails (*Polinices duplicatus and Lunatia heros*)**.
