Marine Fisheries Advisory

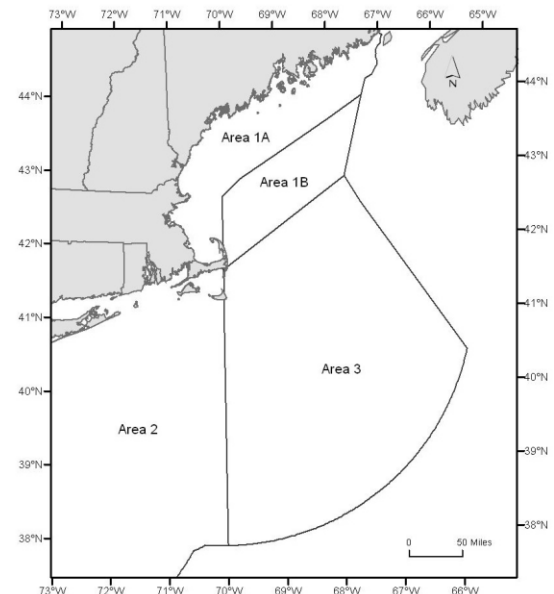

Updated Management Measures for Trimester 2 Atlantic Sea Herring Fishery in Management Area 1A

The Atlantic States Marine Fisheries Commission's Atlantic Herring Section met by conference call on July 17, 2018 to review days-out and landing limit measures for federal Category A permit holders during the Trimester 2 Atlantic Sea Herring Fishery in Management Area 1A.

Vessels that have declared into the fishery will receive [permit conditions](#) from DMF establishing the limits adopted by the Section and described below:

- Beginning on July 23, 2018, vessels with federal Category A permits who have declared into the fishery may fish for, possess and land sea herring taken from Management Area 1A beginning at 0001 hours on Monday and continuing until 2359 hours on Friday. From Saturday at 0001 hours through Sunday at 2359 hours, fishing for, possessing or landing of sea herring taken from Management Area 1A is unlawful. Participating vessels may land up to 640,000 pounds (16 trucks) of sea herring per week. A week is defined as Sunday – Saturday.
- The use of carrier vessels is authorized. However, a fishing vessel may only utilize one carrier vessel per week. Carrier vessels are limited to landing up to 160,000 pounds (4 trucks) of sea herring per week. The carrier vessel's weekly landing limit is not in addition to the harvester vessel's weekly landing limit. The at-sea transfer of sea herring between fishing vessels is allowed. A carrier vessel is a vessel with no gear on board capable of catching or processing fish. A harvester vessel is a vessel that is required to report the catch it has aboard as the harvesting vessel on the Federal Vessel Trip Report.

Federal Category A permits are issued to large scale sea herring harvesters, including mid-water trawl and purse seine vessels. While Category A permits may be issued to mid-water trawl

vessels, the use of this gear is prohibited during the Trimester 2 fishery. Federal regulations at 50 CFR §648.202 establish Management Area 1A as a purse seine and fixed gear only area from June 1 through September 30.

Declared Federal Category C and D permit holders (e.g., small mesh bottom trawlers) are authorized to participate in the Trimester 2 Management Area 1A fishery under the exempted sea herring limit [322 CMR 9.05(3)]. This allows these vessels to fish for, possess and land sea herring seven days per week.

The Section is scheduled to meet again on August 8th to review landings data and determine if adjustments to fishing limits are necessary to optimize quota availability throughout the Trimester.
