THIS POSITION IS UNPAID

Brief Description of Internship Position:

The Department of Public Utilities (DPU) Siting Division Summer Intern would provide a brief, but intensive opportunity for the candidate to participate in ongoing Siting Division cases, and special project areas. The Summer Intern will be an integral part of case teams working on pending cases, and participate to the fullest extent possible. Existing case topics include off-shore wind facilities, energy storage facilities, interstate and intrastate gas pipelines, and electric transmission facilities. Special project areas to be determined based on Division needs, and mutual interests.

Description of Duties and Responsibilities:

- Reviewing filings by project proponents;
- Preparing written questions and/or cross-examination for hearings;
- Conducting site visits of proposed or existing facilities;
- Preparing briefing memos and/or presentations for Commissioners and Board Members;
- Conducting special projects involving research, analysis, solution development, and briefings and/or memos;
- Participating in all facets of Siting Division activities including team meetings, trainings, briefings with high-level state officials, industry research, and collaboration with other divisions and staff at the DPU, and those of other state agencies.

Preferred Knowledge and Skills:

- Solid research, analytical abilities, and writing skills;
- Familiarity with energy and environmental policy issues
- Engineering background
- Ability to collaborate with a diverse group of staff and decision-makers, with often diverse points of view;
- Good inter-personal skills and communications style;
- Desire to learn and accept new challenges in the realm of energy facilities siting, energy technology expertise, and energy regulation.

Hours per week: 15-20 hours
