- Data were extracted and compiled by the Injury Surveillance Program, BCHAP, MDPH, August 2014
- Analysis is based on a calendar year (Jan. 1 - Dec. 31, 2012) and analyzed by ICD-10 code.
- Data is for occurrent deaths only. Massachusetts residents who died out-of-state are excluded from this analysis.
- Rates are crude rates and were not calculated on counts of less than five. Rates that are based on counts less than twenty may be unstable.
- Population data used to calculate rates are based on 2012 population estimates generated by the National Center for Health Statistics in collaboration with the US Census Bureau (http://www.cdc.gov/nchs/nvss/bridged_race.htm) and the U.S. Census Bureau American Community Survey 2010-2012 3 year estimates.
- For additional information and technical notes, please refer to the annual report, "Violent Deaths in Massachusetts: Surveillance Update," which can be found at www.mass.gov/dph/isp
