Adverse Effects ³						38	--	--

Source: *Registry of Vital Records and Statistics, Massachusetts Department of Public Health.*

¹ Legal Intervention includes fatalities resulting from police actions and operations of war.

² Rates are per 100,000 residents. Rates provided here are not age-adjusted and may differ slightly from other department publications. Rates are not calculated on counts of less than five. Rates that are based on counts less than twenty may be unstable.

³ Adverse Effects can be related to medical and surgical care procedures, or to the use of therapeutic substances (including allergic reactions). Please note that in 2012, we began using the the same definition for injury deaths as the Centers for Disease Control and Prevention (CDC) which excludes adverse effects. The numbers are still provided, but are not included as part of the total.

—An injury-related fatality is defined as any death with an ICD-10 code of U01-U03 or V01-Y89 in the underlying cause field.

—Categories and groupings are based on the CDC's "Recommended framework of E-code groupings for presenting injury mortality and morbidity data." This framework does not provide for intentionality for certain cause categories as indicated by gray shading.

—Injury subcategories are italicized.

—Analysis is based on a calendar year (Jan 1 - Dec 31, 2013).

—Massachusetts residents who died in or out-of-state are included in this analysis: non-Massachusetts residents are excluded from the analysis.

—Population data used to calculate rates are based on Census Estimates for 2013 MA population (6,646,144).

—Data were extracted and compiled by the Injury Surveillance Program, MDPH, July 2015.
