Annual PWS Compliance Report
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, N.W. – Mail Code 2227A
Washington, DC 20460
Attn: Joyce Chandler

Dear Ms. Chandler,

Attached please find the Calendar Year 2014 Annual PWS Compliance Report (ACR) from the Commonwealth of Massachusetts, Department of Environmental Protection, Drinking Water Program (MassDEP/DWP).

The ACR is in the following four parts:

- Detail by Chemical,
- Detail by Rule,
- State Summary and
- Detail by PWS.

The Detail by PWS lists all PWSs with one or more MCL, MRDL or TT violations (note that the standard SDWIS ACR Details report also includes PWSs that only incurred monitoring violations). The full ACR is posted on the web at: <http://www.mass.gov/eea/agencies/massdep/water/drinking/water-systems-ops.html#1>

Please note the following information regarding our 2014 ACR submittal:

1. The Massachusetts drinking water regulations differ from the federal regulations for three contaminants:
 - Perchlorate – where a state Maximum Contaminant Level (MCL) and monitoring requirements exist,
 - Ethylene dibromide – where the state MCL of 0.00002 mg/L is more stringent than the federal MCL of 0.00005 mg/L and
 - Para-dichlorobenzene – where the state MCL of 0.005 mg/L is more stringent than the federal MCL of 0.075 mg/L.

This information is available in alternate format. Call Michelle Waters-Ekanem, Diversity Director, at 617-292-5751. TTY# MassRelay Service 1-800-439-2370
MassDEP Website: www.mass.gov/dep

Printed on Recycled Paper

2. The 2014 ACR does not include violations of both the state MCL and monitoring requirements for perchlorate.
3. In the attached standard SDWIS ACR the Massachusetts MCLs for all three contaminants do not appear and we are unable to replace the default values in the PDF.
4. No variances or exemptions were issued or were in effect during 2014.
5. The following terms and abbreviations appear in the ACR:
 - **Maximum Contaminant Level (MCL)** – means the maximum permissible level of a contaminant in water which is delivered to any user of a public water system.
 - **Monitoring and Reporting Violations** – occur when a PWS fails to properly collect, analyze or report a water quality sample to the MassDEP.
 - **Other Violation** – Includes consumer confidence report (CCR) violations, public notification requirement violations, state notification violations relating to the total coliform rule, and record keeping related to interim enhanced surface water treatment rule.
 - **Primacy Agency** – MassDEP has been granted authority by the U.S. EPA to implement the Safe Drinking Water Act in Massachusetts.
 - **Public Water System (PWS)** - means a system for the provision to the public of water for human consumption, through pipes or other constructed conveyances, if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days of the year. Such term includes any collection, treatment, storage, and distribution facilities under control of the operator of such a system and used primarily in connection with such system, and any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system.
 - **Return to Compliance (RTC)** – indicates that a formal record has been reported to the federal Safe Drinking Water Information System reflecting that a violation has been closed. RTC reporting is not required for most violations.
 - **Treatment Technique (TT)** - means a required process, practice, or device intended to reduce the level of a contaminant or other constituent in drinking water. Treatment Techniques are typically promulgated in lieu of a numerical standard such as an MCL.

If you have any questions about this report please contact Andrew Durham at (617) 574-6855 or Andrew.Durham@state.ma.us.

Sincerely,

Yvette DePeiza
Program Director
Drinking Water Program
