

2018 Schedule CIR Instructions

Consolidated Return Income Reconciliation

Schedule CIR, Consolidated Income Reconciliation, reconciles the net income of corporations filing in Massachusetts that are part of a U.S. consolidated return with the consolidated net income reported to the IRS.

Taxpayers must file this schedule if their income is included in a U.S. consolidated return. For corporations that are filing as members of a Massachusetts unitary group, only one Schedule CIR must be filed by the principal reporting corporation.

Taxpayers must identify the parent corporation filing the federal consolidated return (if different than the corporation filing the Massachusetts return) and must also report the number of members participating in the federal consolidated return and the total assets as shown on the federal consolidated Schedule L.

Taxpayers must list each corporation included in the U.S. consolidated return and its separate company income. The total number of these entries must equal the number of corporations participating in the return as reported in the header. A single entry is also required for the total change to group income from all consolidation adjustments made in reaching the U.S. consolidated return total.

The total of the amounts in column d must match the total income as shown on the U.S. consolidated return of income before the NOL deduction or any special deductions (from U.S. Form 1120, line 28 or equivalent).
